Water Quality Instructional Resources Information System (IRIS) Wizard Books

The volume seeks to establish socio-onomastics as a field of linguistic inquiry not only within sociolinguistics, but also, and in particular, within pragmatics. The linguistic study of names has a very long history, but also a history sometimes fraught with skepticism, and thus often neglected by linguists in other fields. The

volume takes on the challenge of instituting onomastic study into linguistics and pragmatics by focusing on recent trends within socio-onomastics, interactional onomastics, contact onomastics, folk onomastics, and linguistic landscape studies. The volume is an introduction to these fields – with the introductory chapter giving an overview of, and an update on, recent onomastic study – and in addition offers detailed in-depth analyses of place names, person names, street names and commercial names from different perspectives: historically, as well as from

the point of view of the impact of globalization and glocalization. All the chapters focus on the use and function of names and naming, on changes in name usage, and on the reasons for, processes in, and results of names in contact.

The Planet in a Pebble VIZ Media LLC

"This comprehensive volume - containing 27 chapters and contributions from six continents - presents and discusses key principles, perspectives, and practices of social learning in the context of sustainability. Social learning is explored from a range of fields challenged by sustainability including: organizational learning, environmental management and corporate social responsibility; multi-stakeholder governance; education, learning and

educational psychology; multiple land-use and integrated rural development; and consumerism and critical consumer education. An entire section of the book is devoted to a number of reflective case studies of people, organizations and communities using forms of social learning in moving towards sustainability. 'This book brings together a range of ideas, stories, and discussions about purposeful learning in communities aimed at creating a world that is more sustainable than the one currently in prospect. ...The book is designed to expand the network of conversations through which our society can confront various perspectives, discover emerging patterns, and apply learning to a variety of emotional and social contexts.' From the Foreword by

Fritjof Capra, co-founder of the Center of Ecoliteracy. 'Joining what is so clear and refreshing in this book with the larger movements toward a critically democratic and activist education that is worthy of its name, is but one step in the struggle for sustainability. But it is an essential step if we are to use the insights that are included in this book.' From the Afterword by Michael Apple, author of 'Educating the "Right" Way: Markets, Standards, God, and Inequality'."

Social learning towards a sustainable world John Benjamins Publishing Company

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective

health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and

masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Marvel Weddings University of Chicago Press

Deep within the Crystal Caves of Icefinger Mountains, the dreaded Snow Witch is plotting to bring on a new Ice Age. A brave trapper dies in your arms and lays the burden of his mission on your shoulders. But time is running out - will YOU take the challenge.

A pair of fierce but beautiful eyes look out from the undergrowth of conifers. She is an intelligent killer... So begins one of the most extraordinary novels you will ever read. The time is 120 million years ago, the place is the plains of prehistoric Utah, and the eyes belong to an unforgettable heroine. Her name is Raptor Red, and she is a female Raptor dinosaur. Painting a rich and colorful picture of a lush prehistoric world, leading paleontologist Robert T. Bakker tells his story from within Raptor Red's extraordinary mind, dramatizing his revolutionary theories in this exciting tale. From a tragic loss to the fierce struggle for survival to a daring migration to the Pacific Ocean to escape a deadly new predator, Raptor Red combines fact and fiction to capture for

the first time the thoughts, emotions, and behaviors of the most magnificent, enigmatic creatures ever to walk the face of the earth.

Social Learning in Environmental Management McFarland

The importance of small-scale fisheries for sustainable livelihoods and communities, food security, and poverty eradication is indisputable. With the endorsement of the 'Voluntary Guidelines for Securing Sustainable Small-Scale Fisheries', FAO member

states recognize that governments, civil society organizations, and research communities all have a role to play in helping small-scale fisheries achieve these goals. This book argues that policies targeting small-scale fisheries need to be based on a solid and holistic knowledge foundation, and support the building of governance capacity at local, national, and global levels. The book provides rich illustrations from around the world of why such knowledge production needs to be transdisciplinary, drawing from multiple disciplinary perspectives and the knowledge that small-scale fisheries actors have, in order to identify problems and explore innovative solutions. *Transdisciplinarity for Small-Scale Fisheries Governance: Analysis and Practice*, edited by Ratana

Chuenpagdee and Svein Jentoft, successfully demonstrates how small-scale fisheries are important and what social and political conditions are conducive to their wellbeing. The volume contributes tremendously to building capacity of fisheries communities and policy-makers to make the ideals of small-scale fisheries a reality. It establishes the ecological, social, and economic sense behind small-scale fisheries. A milestone reference for all those who believe in small-scale fisheries and are keen to defend them with quality evidence! -- Sebastian Mathew, Executive Director, International Collective in Support of Fishworkers (ICSF) The Small-Scale Fisheries Guidelines guiding principles call for holistic and integrated

approaches for their implementation. This book will help a new generation of scientists, policy-makers, and small-scale fisheries actors make the fundamental connections between different disciplines in science, traditional knowledge, and policy to guide a collective process towards sustainable small-scale fisheries. The book contains an inspiring collection of practical cases from around the world, complemented by deep dives into dimensions of small-scale fisheries, like food security, stewardship, climate change, and gender, which all call for transdisciplinary approaches. -- Nicole Franz, Fisheries and Aquaculture Department, Food and Agriculture Organization of the United Nations (FAO) Rome, Italy.--

Fullmetal Alchemist, Vol. 6 Canberra, Australia ; Miami, Fla. : Australian National University Press
 From Nelson George, supervising producer and writer of the hit Netflix series, "The Get Down, Hip Hop America is the definitive account of the society-altering collision between black youth culture and the mass media.

 During a revolution of discovery in the late eighteenth and early nineteenth centuries, geologists reconstructed the immensely long history of the earth--and the relatively recent arrival of human life. *Bursting the Limits of Time* is a

herculean effort by one of the world's foremost experts on the history of geology and paleontology to illuminate this scientific breakthrough that radically altered existing perceptions of a human's place in the universe as much as the theories of Copernicus and Darwin did. Rudwick examines here the ideas and practices of earth scientists throughout the Western world to show how the story of what we now call "deep time" was pieced together. He explores who was responsible for the discovery of the earth's history, refutes the concept of a rift between science and religion in dating the earth, and details how the study of the history of the earth helped define a new branch of science called geology. *Bursting the Limits of Time* is the first detailed account of this

monumental phase in the history of science. "Bursting the Limits of Time is a massive work and is quite simply a masterpiece of science history. . . . The book should be obligatory for every geology and history of science library, and is a highly recommended companion for every civilized geologist who can carry an extra 2.4 kg in his rucksack."-- Stephen Moorbath, *Nature Our Fragile World* Kensington Books

The past - ecological background; Ecological perspectives; Land, nature and people; Life conditions and biopsychic state in early Hong Kong; The present - Hong Kong in the 1970s; Conceptual framework; Modern Hong Kong - an overview; Extrasomatic energy; Energy in the Hong Kong food system; Nutrients and water supply in

Hong Kong; The built environment and transportation; The population; Material aspects of human experience; Social relationships and some important intangibles; Behavioural aspects of human experience; Environment, life style and health: problems and principles; The future - human ecological imperatives; The future of urban settlements; Life conditions check list; Common behavioural tendencies; Biosocial survey.

Bursting the Limits of Time Troll Communications

Sustainability Science: Key Issues is a comprehensive textbook for undergraduates, postgraduates, and participants in executive trainings from any disciplinary background studying the theory and practice of sustainability

science. Each chapter takes a critical and reflective stance on a key issue or method of sustainability science. Contributing authors offer perspectives from diverse disciplines, including physics, philosophy of science, agronomy, geography, and the learning sciences. This book equips readers with a better understanding of how one might actively design, engage in, and guide collaborative processes for transforming human-environment-technology interactions, whilst embracing complexity, contingency, uncertainties, and contradictions emerging from diverse values and world views. Each reader of this book will thus have guidance on how to create and/or engage in similar initiatives or courses in their own context. Sustainability Science:

Key Issues is the ideal book for students and researchers engaged in problem and project based learning in sustainability science.

IRC Bulletin Routledge

While En seeks out a new partner with unique magic powers, his crew has a run-in with an underground organization that controls the distribution of "black powder," a magic-enhancing drug used by weaker Sorcerers. Meanwhile, Caiman and Nikaido spend New Year's in the haunted mansion of a mysterious doctor who specializes in the anatomy of Sorcerers. The doctor reveals to them the only known portal to the Sorcerers' dimension... -- VIZ Media

The Caverns of Snow Witch Philip's Maritime history is littered with maritime casualties involving the loss of vessels,

cargo, crew and often passengers. Since the first edition was published over 8 years ago, many serious maritime disasters have occurred.

Dorohedoro, Vol. 3 BRILL

A biography of a premier French scientist of the Enlightenment and the director of France's Royal Botanical Garden, using Buffon's enormous literary production as the major source of insight into his and his age's beliefs about the natural world. Includes bandw illustrations from his Natural History. First published in 1989 as Buffon, un philosophe au Jardin du Roi, by Librarie Artheme Fayard.
