This practical text equips students with the fundamental information and skills needed to be effective case managers, covering such central issues as the responsibilities of case management, competencies needed for ethical and multicultural

case management, participation in interdisciplinary and interorganizational teams, and engagement in advocacy and leadership. The first-person experience of a client and her case managers draws students into the text. To ensure that the book offers current and accurate information, the authors interviewed human service case managers nationwide about their jobs, skills, challenges, and clients. These interviews, combined with current research and numerous case studies, make *GENERALIST CASE MANAGEMENT: A METHOD OF HUMAN SERVICE DELIVERY*, 5th Edition, realistic and relevant. The text also aligns with NASW case management standards and helps to prepare students for earning C-SWMC certification and the HS-BCP credential. Market-Driven Thinking provides a useful mental model and tools for learning about how executives and customers think within marketplace contexts. When the need to learn about how executives and customer think is recognized, a solution is usually implemented automatically, with no thought given to the relative worth of alternative methods to learn fill the need. Thus, the "dominant logics" (most often implemented methods) to learn about thinking are written surveys and focus group interviews--two research methods that that almost always fail to provide valid and useful answers on how and why executives and customers think the way they do. Through descriptive research, MDT examines the actual thinking and actions by executives and customers related to making marketplace decisions. The book aims to achieve three objectives: \* Increase the reader's knowledge of the unconscious and conscious thinking processes of participants marketplace contexts \* Provide research tools useful for revealing the unconscious and conscious thinking processes of executives and customers \* Provide in-depth examples of these research tools in both business-to-business and business-to-consumer contexts This book asks how we actually go about thinking, examining this process and its influences within the context of B2B and B2C marketplaces in developed nations.

In recent years, the safety management field has placed leadership and commitment at the center of effective workplace health and safety programs. At the same time, personal liability for workplace health and safety has increased, resulting in poor outcomes for individual managers. Discussing the minimum expectations that courts and tribunals have of managers, *Management Obligations for Health and Safety* examines the relationship between those expectations and effective safety performance. The book looks at safety management from the perspective of management obligations. What expectations are placed on managers at all levels of an organization to ensure that the workplace and systems of work are safe, and how are these expectations considered and analyzed by courts and public inquiries? As importantly, the book explores how management actions in relation to these obligations and expectations influence, positively or negatively, the safety performance of an organization. With examples drawn from legal and quasi-legal processes, one of the more enlightening and thought-provoking features of this book is the extensive use of cross examination taken from various proceedings. No one person reacts the same to finding him- or herself responsible for managing the aftermath of a death at work, or having to deal with the immediate pressure of being subject to interviews and investigation by safety regulators (much less the drawn-out experience of the legal process), but one of the most constant reactions is "Why didn't anybody tell me about this?" Stressing the importance of safety culture, this book details the true nature of the expectations that

are placed on managers by virtue of their obligation to provide a safe workplace.
