Now more than ever,
kids want to know

about our country's
great struggles during
World War II. This book
is packed with
information that kids
will find fascinating,
from Hitler's rise to
power in 1933 to the
surrender of the
Japanese in 1945.

Much more than an
ordinary history book,
it is filled with excerpts
from actual wartime
letters written to and
by American and
German troops,
personal anecdotes
from people who lived
through the war in the
United States,
Germany, Britain,
Russia, Hungary, and
Japan, and gripping
stories from Holocaust
survivors—all add a

humanizing global perspective to the war. This collection of 21 activities shows kids how it felt to live through this monumental period in history. They will play a rationing game or try the butter extender recipe to understand the everyday sacrifices made by wartime families. They will try their hands at military strategy in coastal defense, break a code, and play a latitude and longitude tracking game. Whether growing a victory garden or staging an adventure radio program, kids will appreciate the hardships and joys experienced on the home front.

Bestseller: A “powerful and epic story . . . the best account of

infantry combat I have ever read” (Col. David Hackworth, author of *About Face*). In November 1965, some 450 men of the First Battalion, Seventh Cavalry, under the command of Lt. Col. Harold Moore, were dropped into a small clearing in the Ia Drang Valley. They were immediately surrounded by 2,000 North Vietnamese soldiers. Three days later, only two and a half miles away, a sister battalion was brutally slaughtered. Together, these actions at the landing zones X-Ray and Albany constituted one of the most savage and significant battles of the Vietnam War. They were the first major engagements between the US Army and the People’s Army of

Vietnam. How these Americans persevered—sacrificing themselves for their comrades and never giving up—creates a vivid portrait of war at its most devastating and inspiring. Lt. Gen. Moore and Joseph L. Galloway—the only journalist on the ground throughout the fighting—interviewed hundreds of men who fought in the battle, including the North Vietnamese commanders. Their poignant account rises above the ordeal it chronicles to depict men facing the ultimate challenge, dealing with it in ways they would have once found unimaginable. It reveals to us, as rarely before, man’s most heroic and horrendous endeavor.

 "The purpose of this Roadmap is to articulate a vision and strategy for the continued development, production, test, training, operation , and sustainment of unmanned systems technology across DoD. This "Unmanned Systems Integrated Roadmap" establishes a technological vision for the next 25 years and outlines actions and technologies for DoD and industry to pursue to intelligently and affordably align with this vision."--Page v.

Background and Issues for Congress Open Road Media
 France and the Nazi Menace examines the

French response to the challenge posed by National Socialist Germany in the years 1933-1939. It focuses on the relationship between the intelligence on German intentions and capabilities and the evolution of French national policy from the rise of Hitler in 1933 to the outbreak of the Second World War in 1939. Based on extensive archival research, it considers the nature of the intelligence process and the place of intelligence within the French policy making establishment during the inter-war period. The central argument in the book is that the German threat was far from the only challenge facing French national leaders in an era of economic

depression and profound ideological discord. Only after the national humiliation at the Munich Conference did the threat from Nazi Germany take precedence over France's internal problems in the making of policy.

The ocean covers 70

percent of the Earth's

surface, and is

essential for life on our

planet - even for those

of us who live nowhere

near the sea! It

provides us all with

food and other

materials that we

need, regulates our

climate and provides half of the oxygen we breathe. The ocean also offers us various means of transport and opportunities for recreation. People have long thought that the ocean was so wide and bountiful that it would go on supplying our needs forever, but this is not the case: human activities are causing significant damage to life in the ocean. People are often unaware of the problems created by this heavy reliance, as few of us have the opportunity to look beneath the surface of the sea and see the damage that our actions have caused. This is where the Ocean Challenge Badge comes in: let it take you on a journey to discover the ocean! It is packed with

activities to help you learn about how the ocean works, the creatures that live in it, and just how important it is in our everyday lives. You will also discover how YOU can play a role in protecting our ocean for future generations. We hope you will be inspired to take the challenge and celebrate our ocean. So dive in and begin your aquatic discoveries!

It exists only in his mind until he begins a secret love affair with Julia, a fellow worker. Is this enough to push him to revolution? Or is it the beginning of his downfall? A masterwork of dystopian fiction, *Nineteen Eighty-Four* is harrowingly prescient, and its impact has stretched around the globe. With a new introduction by political editor and writer Ian Dunt, this brand new edition of a science fiction classic is a must-have for any collector.

 Unmanned Aerial
 Vehicles (UAVs) have
 been referred to in
 many ways, such as

RPV (remotely piloted
 vehicle), drone, robot
 plane, and pilotless
 aircraft. Most often
 called UAVs, they are
 defined by the Dept. of
 Defense (DOD) as
 powered, aerial
 vehicles that do not
 carry a human
 operator, use
 aerodynamic forces to
 provide vehicle lift, can
 fly autonomously or be
 piloted remotely, can
 be expendable or
 recoverable, and can
 carry a lethal or
 nonlethal payload. The
 war on terrorism has
 put a high premium on
 the primary mission of
 UAVs, intelligence
 gathering. The military
 effectiveness of UAVs
 in conflicts such as Iraq

provided by unmanned aircraft. Long relegated to the sidelines in military operations, UAVs are now used in ways normally reserved for manned aircraft. This 2003 report includes background information on UAVs; considerations for Congress; and DOD UAV programs current in 2003, both operational and developmental. Figures and tables. This is a print on demand report.

World War II for Kids

Ediciones Díaz de Santos
Through a compilation of foreign policy documents and statements, harnessed together by a section of analytic works, this book seeks to highlight the shift in Russian foreign policy at the

beginning of the twenty-first century. This compilation presents the work of formative scholars in this field who are concerned with the evolution of Russia Foreign policy thinking and behavior. This volume compiles critical documents and statements (treaties, addresses and articles) that deal with the formation of new conceptions of security in the New World order. The articles critically evaluate the implications of these new initiatives and lend insight to these documents and statements in practice. They address a wide range of topics from the crisis in Kosovo to domestic Russian policy, with an eye to the future of Russian policy.
