In this sweeping critique of how managers are educated and how, as a consequence, management is practiced, Henry Mintzberg offers thoughtful and controversial ideas for reforming both. "The MBA trains the wrong people in the wrong ways with the wrong consequences," Mintzberg writes. "Using the classroom to help develop people already practicing management is a fine idea, but pretending to create managers out of people who have never managed is a sham." Leaders cannot be created in a classroom. They arise in context. But people who already practice management can significantly improve their effectiveness given the opportunity to learn thoughtfully from their own experience. Mintzberg calls for a more engaging approach to managing and a more reflective approach to management education. He also outlines how business schools can become true schools of management.

The Essence of Managing Henry Mintzberg appreciates that managers are busy people. So he has taken his classic book *Managing*, done some updating, and distilled its essence into a lean 176 pages of text. The essence of the book remains the same: what Mintzberg learned from observing twenty-nine managers in settings ranging from a refugee camp to a symphony orchestra. Simply *Managing* considers the intense dynamics of this job as well as its inescapable conundrums, for example: • How is anyone supposed to think, let alone think ahead, in this frenetic job? • Are leaders really more important than managers? • Where has all the judgment gone? • Is email destroying management practice? • How can managers connect when their job disconnects them from what they are managing? If you read only one book about managing, this should be it!
