Lao-Tzu, Or the Way of  
the Dragon Mister  
Descartes and His Evil  
Genius At its most  
basic, philosophy is  
about learning how to  
think about the world  
around us. It should  
come as no surprise,

then, that children  
make excellent  
philosophers! Plato &  
Co. introduces  
children--and curious  
grown-ups--to the lives  
and work of famous  
philosophers, from  
Socrates to Descartes,  
Einstein, Marx, and  
Wittgenstein. Each  
book in the series  
features an engaging--  
and often funny--story  
that presents basic

tenets of philosophical thought alongside vibrant color illustrations. On a peaceful winter night while the rest of the town sleeps, Mister Descartes stays up late reading the great books of the world. Suddenly, by the light of the moon, he sees a strange and fearsome shape in the shadow of his pet parrot, Baruch. Is it an illusion, or could it be that his faithful pet is but a figment of his imagination? Could the same be true of his room and all of sleepy Holland? Quite obviously, he cannot rely on his senses, so how can Mister Descartes arrive at any certainty about the world around him? How will he determine what is a clever trick and what is real? Plato & Co.'s clear approach

and charming illustrations make this series the perfect addition to any little library. Leibniz, Or the Best of All Possible Worlds Vienna, 1714: Late in life, Gottfried Wilhelm Leibniz, the universal genius of his time, puts down his pen and declares his description of the universe to be complete. In the evening, he sits in his study room among letters, books, and manuscripts as his young friend Theodor comes for a visit. Theodor is bothered by one question: Why is there evil? And why do people commit crimes? With an example from ancient Greek mythology, Leibniz develops his theory about the best of all possible worlds. With this vivid "story within

a story" Jean Paul Mongin successfully imparts the complex philosophical ideas of Leibniz to young readers. At its most basic, philosophy is about learning how to think about the world around us. It should come as no surprise, then, that children make excellent philosophers! Naturally inquisitive, pint-size scholars need little prompting before being willing to consider life's "big questions," however strange or impractical. that presents basic tenets of philosophical thought alongside vibrant color illustrations. Why Do Things Have Names? Why is a horse called a horse and not a giraffe or a flapdoodle? Why did Plato go from being called Aristocles, after his grandfather, to being called Plato, which means muscleman? Where do any names come from? In this delightful book, readers young and old will explore with Plato and ponder why anything or anyone has a name at all. Do readers know where their own name comes from? In Lao-Tzu, or the Way of The Dragon, we follow the ancient Chinese philosopher who founded Taoism, from the comet that announced his birth up to his inspired

composition, more than fifty years later, of the Tao Te Ching, the Book of the Way. In body and mind an old sage from birth, Lao-Tzu devotes his life to deciphering the endless book of the world. But he soon becomes frustrated with the silliness of human order, impatient kings, and greedy people, and rides off on the back of a water buffalo in search of the Way. He encounters clouds that solidify under his feet, a cave guarded by a golden monkey, and the venerable Confucius himself, and ultimately finds the wisdom of the dragon already residing deep in his own heart. Though living in a coral palace and betrothed to the handsomest and tenderest of all the water sprites, our heroine soon finds herself heartbroken. She must look deep into the world of the spirit to find out what it all means. Wittgenstein's *Rhinoceros* 1914. Europe is at war. In the disguise of a fictive and adventurous biography, the book allows for amusing and profound philosophising on the sense and non-sense of language. Interestingly enough, it is oftentimes Wittgenstein himself

who speaks to the reader, as the text is intermingled with many quotes from his books.
