If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain

new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

We should thank a pollinator at every meal. These diminutive creatures fertilize a third of the crops we eat. Yet half of the 200,000 species of pollinators are

threatened. Birds, bats, insects, and many other pollinators are disappearing, putting our entire food supply in jeopardy.

Protecting Pollinators breaks down the latest science on environmental threats and takes readers inside the most promising conservation efforts. Efforts range from cities creating butterfly highways to citizen scientists monitoring migration. Along with inspiring stories of revival and lessons from failed projects, readers will find practical tips to get involved. And they will be reminded of the magic of pollinators--the iconic monarchs, dainty hummingbirds, and homely bats alike who bring food to our tables.

"Having been born a freeman, and for

more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." - an excerpt

Secret Bali Prabhat Prakashan

Black sand that has healing power, why you should not whistle while strolling down a nocturnal beach, Bali's most beautiful and least-visited rice terraces, a very

special gift to take home from Bali, a workshop where Batiks are created with unique natural dyes, a place to petition the spirits for a baby, the flute-playing pigeons of Ubud, an enchanting village of unique traditionally styled bamboo roofs, a haunting reunion of some of Bali's most outrageous demons, one of the world's best unofficial street-art exhibitions, a tree it is impossible to plant, an ancient fertility statue with "more than the usual quota of penises," the world's most mysterious breed of cattle, a village of the deaf, a miniature version of Java's Unesco-listed Borobudur, fantastic tranced bull races, the world's most spectacular traditional fishing craft, an architectural wonder of Bali's Christian heartland, Bali's only colonial-era rubber plantation ... Far from the crowds and the usual clichés, Bali is still a reserve of well-concealed treasures that only reveal themselves to those who know how to wander off the beaten track, whether residents or visitors. An indispensable guide for those who thought they knew Bali well, or who would like to discover the hidden face of the city.

2008 Outstanding Academic Title, Choice Magazine
From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not

come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat. *Field Guide to Trains* Christian Faith Publishing, Inc.

Making decisions at any age is not always an easy feat. When you are walking with the Lord Jesus Christ, it makes sense to pray and do the next right thing. As life moves at ninety miles an hour, moving with the flow can set you up to make split-second decisions. Taking what we think is the easy way is often the hardest of all. We are told in 1 Peter 5:7 to cast all our cares on Him because He cares for us. Taking the Jesus way out is always the best way. It may not be the easy that we are looking for, but it will not leave the collateral damage that our way leaves behind. The roads that we walk down in life are covered with attractive billboards drawing us to off-ramps that will lead us to destruction. It is so important to keep our eyes fixed on Jesus Christ as we walk life's highways and byways so we are not lured into the craziness that the world has to offer. Taking life one moment at a time is actually a doable thing. Life moves in seconds, not days. Don't let one trial take you down. Romans 8:13 says that we are more than conquerors, and thankfully, God is a god of do-overs!

Jet skis are immensely popular coastal 'playthings' - but they need careful handling and maintenance. This is a highly illustrated hands-on manual providing advice, hints and tips on choosing, driving, handling, maintaining and repairing a jet ski - the complete owner's manual. Many owners will prefer to service and maintain their own machine (much like they would with an outboard motor), rather than take it to a service agent, and the step by step photos in this book will enable them to do just this. This is a brand

new, highly illustrated step-by-step guide for the jet ski owner (of which there are

many in the UK alone) which provides helpful advice on all the aspects of ownership, handling and maintenance.

There is no other book on the market which does this.
