 Intercultural communication has become
 more and more important over the past
 years because we live in a world where
 everything is becoming global. A few
 centuries ago, only people who dealt with
 international businesses needed to think
 about intercultural communication and its
 problems. Today, also ordinary people
 from different cultures come into contact
 with each other. Companies work more

and more globally instead of locally. We
 live in a multicultural society with a variety
 of cultures. Intercultural communication
 has become a topic which concerns
 everybody. It will become more and more
 important in our world of globalization
 where people from all over the world come
 together and get in contact with each
 other. Because of the aspects mentioned
 above, intercultural learning is an
 essential part in learning as well as in
 teaching. Intercultural aspects are
 involved in our daily life and this is why
 intercultural teaching is becoming more
 important. It should be an essential part of
 modern teaching. The subject English
 should help to develop students
 intercultural awareness. The
 Kultusministerkonferenz considers
 intercultural learning as a key element of
 English language teaching. Because of this
 fact, the KMK put intercultural competence

Fantasy World Stories Rigby Educational Publishers

NEW YORK TIMES BESTSELLER • The legendary biologist and bestselling author mounts a timely and passionate defense of science and clear thinking with this career-spanning collection of essays,

including twenty pieces published in the United States for the first time. For decades, Richard Dawkins has been a brilliant scientific communicator, consistently illuminating the wonders of nature and attacking faulty logic. *Science in the Soul* brings together forty-two essays, polemics, and paeans—all written with Dawkins's characteristic erudition, remorseless wit, and unjaded awe of the natural world. Though it spans three decades, this book couldn't be more timely or more urgent. Elected officials have opened the floodgates to prejudices that have for half a century been unacceptable or at least undercover. In a passionate introduction, Dawkins calls on us to insist that reason take center stage and that gut feelings, even when they don't represent the stirred dark waters of xenophobia, misogyny, or other blind prejudice, should stay out of the voting booth. And in the essays themselves, newly annotated by the author, he investigates a number of issues, including the importance of empirical evidence, and decries bad science, religion in the schools, and climate-change deniers. Dawkins has equal ardor for "the sacred truth of nature" and renders here with typical virtuosity the glories and complexities of the natural world. Woven into an exploration of the vastness of geological time, for instance, is the peculiar history of the giant tortoises and the sea turtles—whose journeys between water and land tell us a deeper story about evolution. At this moment, when so many highly placed people still question the fact of evolution, Dawkins asks what Darwin would make of his own legacy—"a mixture of exhilaration and exasperation"—and celebrates science as possessing many of religion's virtues—"explanation, consolation, and uplift"—without its detriments of superstition and prejudice. In a world grown irrational and hostile to facts, *Science in the Soul* is an essential collection by an indispensable author. Praise for *Science in the Soul* "Compelling . . . rendered in gloriously spiky and opinionated prose . . . [Dawkins is] one of the great science popularizers of the last half-century."—*The Christian Science Monitor* "Dawkins is a ferocious polemicist, a defender of reason and enemy of superstition."—John Horgan, *Scientific American*
