## YOUNG ASHER

A Frequency Dictionary of Dutch Multi  
 Linguis  
 All Dutch Vocabulary You'll Need, In One  
 Book. With this book, you can learn Dutch  
 fast and efficiently: This book contains  
 practical vocabulary for both spoken and  
 written Dutch. Why Study By Frequency?:  
 In any given language, you only use about  
 1000 different words a day in day-to-day  
 spoken language. These high frequency  
 words account for about 95% of all spoken  
 language When it comes to reading; the

2.000 most used words account for about  
 85% of all that is written. The most used  
 10.000 words account for 99% of all  
 spoken and 98% of all written Dutch text.  
 How Much Vocabulary Do You Need To  
 Know? While it's important to note it's  
 impossible to pin down these numbers and  
 statistics with 100% accuracy, these are a  
 global average of multiple sources.  
 According to scientific research, this is the  
 amount of vocabulary needed for varying  
 levels of fluency: 1. 250 words: the  
 essential core of a language. Without  
 these words, you cannot construct  
 sentences. 2. 750 words: those that are  
 used every single day by every person  
 who speaks the language. 3. 2500 words:

those that should enable you to express  
 everything you could possibly want to say,  
 although some creativity might be  
 required. 4. 5000 words: the active  
 vocabulary of native speakers without  
 higher education. You will understand 95%  
 of all written texts. 5. 10,000 words: the  
 active vocabulary of native speakers with  
 higher education. 6. 20,000 words: the  
 amount you need to recognize passively in  
 order to read, understand, and enjoy a  
 work of literature such as a novel by a  
 notable author. Keeping above facts in  
 mind, the value of a frequency dictionary  
 is immense. At least, that is if you want to  
 become fluent in a language fast. Study  
 the most frequent words, build your

vocabulary and progress naturally. Sounds logical, right? What is Inside This Book? A frequency list of the most frequently used Dutch words, based on analysis of 10 gigabytes of Dutch subtitles, the equivalent of 40.000 books of 200 pages each; a good-sized library. A large base text collection is absolutely vital to establishing a good general frequency list. Subtitles have the advantage of corresponding both to written and spoken language, so you get the best of both worlds. **NATIONAL BESTSELLER** • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Gifted* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
