The Roots Of Coincidence Arthur

The Roots of Coincidence is a 1972 book by Arthur

Koestler. It is an introduction to theories

of parapsychology, including

extrasensory perception and

psychokinesis. Koestler postulates links

between modern physics, their

interaction with time and paranormal phenomena. It is influenced by Carl Jung's concept of synchronicity and the seriality of Paul Kammerer. In the book Koestler argues that science needs to take the possibility of the occurrence of phenomena that are outside our common sense. The Roots of Coincidence - Wikipedia.
