Shopping and Crimedraws on criminology, behavioural economics and marketing to help understand retail crime as a cultural phenomenon. Shopping is now the largest consumer leisure activity, and this has led to an exponential rise in the levels of retail crime. In this topical volume Professor Bamfield analyses important new datasets on employee theft and shoplifting to show the nature of the problem, its origins and possible solutions. Crime prevention is explored as a management issue, using criminomics, a new concept based on commercial realities rather than maximizing arrests. This emphasises communications and persuasion within organisations, supported by a web of collaborative projects between retailers, police and other crime agencies.

Inspiring You to Be a Champion Guard Elsevier

This book helps the reader to critically evaluate a security operation using modern research techniques. It focuses on all retail business security issues, emphasizing vulnerabilities, losses, and practical countermeasures to combat such crimes as internal theft and shoplifting. Coverage includes such key topics as: the impact of the Americans with Disabilities Act; proper testing procedures under Employee Polygraph Protection Act; Ernst and Young's Survey of Retail Loss Prevention Trends; and the National Retail Security Survey conducted by Security Magazine.

Small Business Bibliography CRC Press

Since the first edition of Security and Loss Prevention was published in 1983, much has changed in security and loss prevention considerations. In the past five years alone, security awareness and the need for added business continuity and preparedness considerations has been uniquely highlighted given events such as Katrina, 9/11, the formation of the Department of Homeland Security, and the increase in world terrorist events. This edition of Security and Loss Prevention is fully updated and encompasses the breadth and depth of considerations involved in implementing general loss prevention concepts and security programs within an organization. The book provides proven strategies to prevent and reduce incidents of loss due to legal issues, theft and other crimes, fire, accidental or intentional harm from employees, as well as the many ramifications of corporate mismanagement. The new edition contains a brand new terrorism chapter, along with coverage on background investigations, protection of sensitive information, internal threats, and considerations at select facilities (nuclear, DoD, government and federal). Author Philip Purpura once again demonstrates why students and professionals alike rely on this best-selling text as a timely, reliable resource. - Covers the latest professional security issues surrounding Homeland Security and risks presented by threats of terrorism - Recommended reading for ASIS International's prestigious CPP Certification - Cases provide real-world applications

Retail Loss Prevention Butterworth-Heinemann

Loss prevention engineering describes all activities intended to help organizations in any industry to prevent loss, whether it be through injury, fire, explosion, toxic release, natural disaster, terrorism or other security threats. Compared to process safety, which only focusses on preventing loss in the process industry, this is a much broader field. Here is the only one-stop source for loss prevention principles, policies, practices, programs and methodology presented from an engineering vantage point. As

such, this handbook discusses the engineering needs for manufacturing, construction, mining, defense, health care, transportation and quantification, covering the topics to a depth that allows for their functional use while providing additional references should more information be required. The reference nature of the book allows any engineers or other professionals in charge of safety concerns to find the information needed to complete their analysis, project, process, or design.

Retail Loss Prevention Description Retail loss prevention and profit protection isn't just about theft from retail stores. There are thousands of ways that assets can be lost from your retail business, normally caused by one of three things; theft, waste or negligence. All impact negatively on an organisation's bottom line and can come from internal or external activity. Introduction to Retail Loss Prevention explains key terms used in retail loss prevention and gives an overview of the main causes of loss in retail environments such as; shrinkage, litigation, fraud, supply chain losses, extortion, disaffected staff and reputation. The book then goes on to explain how and where to conduct loss prevention risk assessments in relation to; business premises, various retail security systems, stock, cash, personnel, terrorist activity, legal and regulatory compliance, distribution networks, IT systems, disaster recovery and industrial espionage. Case studies are used throughout the book to illustrate key points and concepts. Cost-effectiveness of the loss prevention effort within your retail environment is emphasised throughout the book. After all, it's of no benefit to save assets in one area if you are going to

waste them on ineffective or non-essential security measures. This and other books in the series are written for readers with little or no knowledge of retail loss prevention but the content makes them suitable for all managers and loss prevention specialists. Written in easy to understand language, this book will help any retail manager or loss prevention specialist who needs to prevent and deal with loss in their retail outlet(s). Retail loss prevention risk assessments will become simple using this book. Carry it with you on your e-reader and easily move to different sections of the book as you conduct your risk assessments. Use the book to make your own checklists and save hours of time having to think about what you should be looking for. Introduction to Retail Loss Prevention has been written by two retail loss prevention specialists who, combined, have over 60 years of experience in loss prevention and profit protection across many industries. Tim Trafford BEM has over 25 years experience working in and managing loss prevention and investigation departments including hospitality, sports retail, supermarket chains and distribution. He currently holds a senior position in the loss prevention department of a well known international distribution chain. Ian Watts MCMI. MIPI. MSyl has over 25 years experience investigating losses in various industries and 15 years experience in training managers and loss prevention personnel in several countries. This is the first book in a series of 10 books dealing with retail loss prevention and profit protection activities. The ideas promoted in this book are fully expanded in other books in the series. The full series provides a library of material which covers most areas of retail loss and profit protection and how to prevent, minimise and deal with those losses.
