ESTHER EMERSON

The Theory of Crisis and the Great Recession in Spain Taylor & Francis

The essays in this volume range from questions of cultural self-representation in China to more general problems of reconceptualizing global relationships in response to contemporary changes. Although the new era of global capitalism calls for the remapping of global relations, such remapping must be informed both by a grasp of contemporary structures of economic, political, and cultural power and by memories of earlier radical visions of society. Without these two conditions, Arif Dirlik argues, the current preoccupation with Eurocentrism, ethnic diversity, and multiculturalism distract from issues of power that dominate global relations and that find expression in murderous ethnic conflicts. Dirlik offers multi-historicalism, which presupposes a historically grounded conception of cultural difference, seeks in different histories alternative

visions of human society, and stresses divergent historical trajectories against a future colonized presently by an ideology of capital. Arguing that the operations of capital have brought the question of the local to the fore, he points to indigenism as a source of paradigms of social relations, and relationships to nature, to challenge the voracious developmentalism that undermines local welfare globally.

Radical Markets JHU Press

Early Modern Social Theory: Selected Interpretive Readings is a collection of essays that illuminates the course of development of modern social thought, from the Enlightenment to the 1920s. The essays focus on the most prominent social theorists, including Smith, Durkheim, Marx and Engels, and Weber. Each essay has been chosen to provide the main contributions of the theorist and the political and economic context in which he worked. The editor, a noted scholar in the field, has written clear, concise introductions to each section and provided a glossary of frequently used philosophical terms. The collection includes two famous feminist critiques of the literature, by Rosalind Sydnie and Lise Vogel, as well as papers by Tom Bottomorw on Max Weber, Anthony Giddens on the division of labour, and essays by Mandel and Trotsky on Marx.

Contending Economic Theories Princeton University Press

The principal theme of the book is that social science is at its best, and most exciting, when it confronts and refutes "cultures of prejudice"—intricate systems of beliefs and attitudes that sustain many forms of social oppression and that are, themselves, sustained by ignorance and fear of the unknown and the unfamiliar.

Theoretical Considerations Simon and Schuster

In the 21st century, the capitalist system has little more to offer than a menu of despair: pandemics, deepening inequality, worsening depression, out-of-control climate change, growing authoritarianism and intensifying militarism. This book offers a wide-ranging analysis of the origins, implications and scope of the "combined" crises of 2020 and beyond. It makes a compelling case that Karl Marx's critical analysis of capitalism, as well as his program of class-struggle socialism, are essential to understanding and addressing the most important social, economic, and ecological problems of our time.

Marx's Law of Value in the Twilight of Capitalism BRILL

"Very few men," said Bakunin, "have read as much, and, it may be added, have read as

intelligently, as M. Marx.” S. S. Praver’s highly influential work explores how the world of imaginative literature—poems, novels, plays—infused and shaped Marx’s writings, from his unpublished correspondence, to his pamphlets and major works. In exploring Marx’s use of literary texts, from Aeschylus to Balzac, and the central role of art and literature in the development of his critical vision, Karl Marx and World Literature is a forensic masterpiece of critical analysis.

Invisible Leviathan Routledge

Brett Christophers shows how laws help capitalism maintain a crucial balance between competition and monopoly. When monopolistic forces dominate, antitrust law discourages the growth of corporations and restores competitiveness. When competition becomes dominant, intellectual property law protects corporate assets and encourages investment.

Arguments in Critical Social Science Routledge

This updated and expanded edition critically explores and makes significant contributions to the debate surrounding Karl Marx’s “capitalist law of value.”

Uprooting Capitalism and Democracy for a Just Society Routledge

This book has a dual purpose. First, it analyses the concept of economic crises within economic theory, showing the various theoretical foundations and controversies amongst different schools of economic thought. Second, it presents an empirical analysis of the Great Recession in Spain, addressing the growth period of 1995 to 2007-08, the subsequent depression until 2013-14 and the recovery that followed. It also shows the way in which the inner contradictions of capital manifests itself in an European peripheral economy under a real estate bubble, emphasizing the role of the Spanish economy in European capitalism. This theoretical and empirical heterodox approach will be of interest to students and scholars in political economy, and those with an interest in the Eurozone.

Marxist Phoenix Verso Books

This three volume Encyclopedia offers the first comprehensive and authoritative survey of the rapidly developing field of international political economy. Its entries cover the major theoretical issues and analytical approaches within the field. The set also provides detailed discussion of the contributions of key individuals and surveys a wide range of empirical conditions and developments within the global political economy, including its major institutions. The Encyclopedia has been designed to be eclectic in approach and wide-ranging in coverage. Theoretical entries range from discussions of the definition and scope of the field, through core methodological questions such as rationalism and the structure-agent problem, to surveys of the major theories and approaches employed in the study of the international political economy.

Arguments in Critical Social Science BRILL

Prodigiously influential, Jacques Derrida gave rise to a comprehensive rethinking of the basic concepts and categories of Western philosophy in the latter part of the twentieth century, with writings central to our understanding of language, meaning, identity, ethics and values. In 1993, a conference was organized around the question, ‘Whither Marxism?’, and Derrida was invited to open the proceedings. His plenary address, ‘Specters of Marx’, delivered in two parts, forms the basis of this book. Hotly debated when it was first published, a rapidly changing world and world politics have scarcely dented the relevance of this book.

The Great Leveler BRILL

#1 NEW YORK TIMES BESTSELLER The seven-time #1 New York Times bestselling author, Fox News star, and radio host Mark R. Levin explains how the dangers he warned against in the “timely yet timeless” (David Limbaugh, author of *Jesus Is Risen*) bestseller *Liberty and Tyranny* have come to pass. In 2009, Mark R. Levin galvanized conservatives with his unforgettable manifesto *Liberty and Tyranny*, by providing a philosophical, historical, and practical framework for halting the liberal assault on Constitution-based values. That book was about standing at the precipice of progressivism’s threat to our freedom and now, over a decade later, we’re fully over that precipice and paying the price. In *American Marxism*, Levin explains how the core elements of Marxist

ideology are now pervasive in American society and culture—from our schools, the press, and corporations, to Hollywood, the Democratic Party, and the Biden presidency—and how it is often cloaked in deceptive labels like “progressivism,” “democratic socialism,” “social activism,” and more. With his characteristic trenchant analysis, Levin digs into the psychology and tactics of these movements, the widespread brainwashing of students, the anti-American purposes of Critical Race Theory and the Green New Deal, and the escalation of repression and censorship to silence opposing voices and enforce conformity. Levin exposes many of the institutions, intellectuals, scholars, and activists who are leading this revolution, and provides us with some answers and ideas on how to confront them. As Levin writes: “The counter-revolution to the American Revolution is in full force. And it can no longer be dismissed or ignored for it is devouring our society and culture, swirling around our everyday lives, and ubiquitous in our politics, schools, media, and entertainment.” And, like before, Levin seeks to rally the American people to defend their liberty.

Critique of Black Reason Routledge

Why should we pay attention to the great social critics like Marx? Americans, especially now, confront serious questions and evidences that our capitalist system is in trouble. It clearly serves the 1% far, far better than what it is doing to the vast mass of the people. Marx was a social critic for whom capitalism was not the end of human history. It was just the latest phase and badly needed the transition to something better. We offer this essay now because of the power and usefulness today of Marx’s criticism of the capitalist economic system. eBook: <https://bit.ly/2K6il8v>

A Radical Critique Penguin UK

*Invisible Leviathan*The Marxist Critique of Market Despotism Beyond Postmodernism

The Marxist Critique of Market Despotism Beyond Postmodernism John Hunt Publishing

In *Invisible Leviathan*, Murray E.G. Smith refutes the main criticisms of Marx’s theory of labour value and argues that human civilization is imperilled by the capitalist imperative to measure wealth in terms of ‘abstract social labour’ and money profit.

Twilight Capitalism Harvard University Press

In *Critique of Black Reason* eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world’s center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With *Critique of Black Reason*, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

Forces of Production, Climate Change and Canadian Fossil Capitalism MCM

Looking to an increasingly perilous and inequitable future, many progressive activists and scholars are seriously questioning the capacity of global capitalism to guarantee the conditions for human well-being and sustainability in the 21st century. This development inspires the central inquiry of *Marxist Phoenix*: Will the intensifying contradictions and multiple crises of contemporary capitalism incite the emergence of a mass socialist workers’ movement committed not merely to the “reform” of capitalism but to its overthrow? This collection of new and previously published essays, articles, and book chapters written over the last two decades makes the case for the indispensability of the Marxist-socialist project to the emancipation of humanity from material insecurity and ever-worsening social antagonism. Only a global workers’ movement committed to the fundamental tenets of Marxism—a triumphant Marxist Phoenix rising from the ashes of the multiple defeats of the 20th century—can open the road to real social progress. Interdisciplinary, rigorous, and

critically engaged with many currents in contemporary academic discourse, this volume is a timely contribution to the rebirth of a Marxist socialism that is at once scientific, emancipatory, and internationalist in its commitments.

Marx’s Law of Value in the Twilight of Capitalism Invisible LeviathanThe Marxist Critique of Market Despotism Beyond PostmodernismThe text is broad-ranging, integrating eleven studies that consider the theory of labour-value from historical, philosophical, and economic perspectives.

Smith incorporates a thorough review of the controversy that has raged around Marx’s theory of labour-value, reporting the key arguments of orthodox Marxists, neo-Ricardians, neo-orthodox Marxists, and fundamentalist Marxists. He concludes that the Marxian theory of labour-value remains a logically coherent and theoretically sound basis for understanding capitalism’s historical-structural crises. Also included is a reconsideration of Marx’s law of the falling tendency of the rate of profit along with a statistical analysis of long-term trends in the Canadian economy that lend support to Marx’s vies.*Invisible Leviathan*The Marxist Critique of Market Despotism Beyond PostmodernismThis original and important contribution to Marxist debates will appeal to an international community of political economists and Marx scholars. Its comprehensive reporting and analysis will also attract a broader audience of historians and philosopher.*Invisible Leviathan*Marx’s Law of Value in the Twilight of Capitalism

Case study research has a long history within the natural sciences, social sciences, and humanities, dating back to the early 1920’s. At first it was a useful way for researchers to make valid inferences from events outside the laboratory in ways consistent with the rigorous practices of investigation inside the lab. Over time, case study approaches garnered interest in multiple disciplines as scholars studied phenomena in context. Despite widespread use, case study research has received little attention among the literature on research strategies. The *Encyclopedia of Case Study Research* provides a compendium on the important methodological issues in conducting case study research and explores both the strengths and weaknesses of different paradigmatic approaches. These two volumes focus on the distinctive characteristics of case study research and its place within and alongside other research methodologies. Key Features Presents a definition of case study research that can be used in different fields of study Describes case study as a research strategy rather than as a single tool for decision making and inquiry Guides rather than dictates, readers’ understanding and applications of case study research Includes a critical summary in each entry, which raises additional matters for reflection Makes case study relevant to researchers at various stages of their careers, across philosophic divides, and throughout diverse disciplines Key Themes Academic Disciplines Case Study Research Design Conceptual Issues Data Analysis Data Collection Methodological Approaches Theoretical Traditions Theory Development and Contributions From Case Study Research Types of Case Study Research

Routledge Encyclopedia of International Political Economy: Entries G-O Routledge

Is regarded as the most important response to the philosophies of desire, as expounded by thinkers such as de Sade, Nietzsche, Bataille, Foucault and Deleuze and Guattari. It is a major work not only of philosophy, but of sexual politics, semiotics and literary theory, that signals the passage to postmodern philosophy.

The State of the Debt, the Work of Mourning and the New International Verso

Marx’s economic theories 200 years after his birth in 1818. Marx’s main ideas about the development of capitalism as the dominant mode of social organisation globally. And the critics of Marx’s ideas over the last 150 years. Finally whether Marx’s predictions about the future of capitalism have been and will prove to be right.

Routledge

This original and important contribution to Marxist debates will appeal to an international community of political economists and Marx scholars. Its comprehensive reporting and analysis will also attract a broader audience of historians and philosopher.
