BRADFORD JERAMIAH

Management Taylor & Francis

Public Organizations in Asia introduces students to the fundamental theories of organizations and teaches them how to analyze different types of public organizations in East and Southeast Asia. Moving away from traditional Western theory and examples, this textbook provides numerous case studies of Asian organizations where different ideologies, administrative tradition, and social circumstances prevail. Key pedagogical features of Public Organizations in Asia include: Learning objectives for each chapter End of chapter discussion questions Short student exercises Concise case studies throughout the chapters Training students to be future leaders of Asian public organizations, this book is an essential text for undergraduate and graduate courses on public administration in Asia. It will also be a useful supplementary text for courses on comparative public administration.

The Open Organization Routledge

Knowledge grows as ideas are tested against each other. Agreement is not resolved simply by naming concepts but in the dialectical process of thesis, antithesis, and synthesis. There are many echoes of these debates in The Evidence Book. The contributors make claims for both practitioner wisdom and the voice of experience. Against this is posed the authority of experimental science and the randomized controlled trial. The contributors are concerned, in their own ways, with collecting, ranking, and analyzing evidence and using this to deliver evaluations. As an expert group, they are aware that the concept of evidence has been increasingly important in the last decade. As with other concepts, it too often escapes precise definition. Despite this, the growing importance of evidence has been advocated with enthusiasm by supporters who see it as a way of increasing the effectiveness and quality of decisions and of professional life. The willingness to engage in evidence-based policy and the means to do so is heavily constrained by economic, political, and cultural climates. This book is a marvelously comprehensive and utterly unique treatise on evidence-based policy. It is a wide-ranging contribution to the field of evaluation.

Communities and Technologies Business Expert Press

An entrepreneur is different from a manager of a small business in many respects, but largely in attitude and approach. And the right approach hinges on appropriate entrepreneurial skills. Professor Nieuwenhuizen has brought together several experts in the field of entrepreneurship to describe the skills necessary for successful entrepreneurship. The entrepreneurial skills covered in this book include: achievement orientation; creativity and innovation; self-confidence and a positive attitude; goal-setting; assertiveness; time management; networking; leadership and teamwork; creative problem-solving; and, strategies for dealing with conflict and confrontation. This is a guide to success factors for students of business, as well as entrepreneurs starting up a business and those already running an enterprise. *Entrepreneurial Skills* Routledge
Responsible behaviors in the realm of business continue to remain a crucial component of organizational development. By exploring core aspects of contemporary corporate strategies, businesses can create more value in social welfare initiatives. CSR 2.0 and the New Era of

Corporate Citizenship is an authoritative reference source for the latest scholarly research on the ways in which corporate entities can implement responsible strategies and create synergistic value for both businesses and society. Featuring extensive coverage across a range of relevant perspectives and topics, such as corporate citizenship, stakeholder engagement, and business ethics, this publication is ideally designed for students, academics and researchers seeking current concise and authoritative research on the business case for corporate social responsibility.

New Era of Management in a Globalized World SAGE

Basic Strategy in Context centres on real-world firms and managers by giving each chapter's cases a higher weighting in importance and explanation than is normal. Given this emphasis on real-world as opposed to theoretical treatment the book enables the solving of practical business problems like those below. This emphasis on reality is cemented by the book's treatment of diversity as being the norm highlighted through European business cases from different countries. Giving example answers and links from case to theory rams home further the expected usefulness of the book to students about to enter industry. Often theory and cases are treated as different and separated topics; we believe that our integrated didactic treatment is quite unique. Finally we use the basic theories of strategy and then show how these mainly simple concepts can be extended to solve tricky business problems anywhere in any industry. Here is a sample of specific practical problems to which this book can show solutions: Why are resources important and how are they leveraged? Using the case of a British failure (Railtrack) we show the fatal consequences of neglecting existing resources, and then in a completely different country and industry (Carlo Gavazzi Space in Italy) how resources can be utilised from outside the firm to achieve leverage. Given our emphasis on diversity we highlight successful change in a foreign and inflexible environment (Japan and Carlos Ghosn). But can change be planned? Sometimes events or luck sabotage the best intentions as shown in the Samsung case. The book differentiates itself from the competition in four ways: Cases form the highlight of the book. Taking European and some international cases as the starting point, the objective is to link themes or topics to a description of their effect on the firm. The linkage will occur at the relevant point in the case, not in a separate section or in another book. The author team has used several longitudinal cases spread over a 15-20 year period. The longitudinal cases are supported by some new, non-longitudinal cases selected from award winning cases associated with the LRP Journal and the Gate2Growth Academic Network. We feel such an emphasis on cases is a novel feature. The theory is explained using a range of modern didactic methods not usually found in competitive offerings. Examples include colour coded and highlighted links from the theory to the case, questions inside each theory section with model answers and unanswered questions to test the student's grasp of the concepts. The book features a mixture of cases from short specific to academically challenging ones. Too often, superficial cases are placed at the end of chapters in strategy theory books. They are picked to emphasize the topics of the preceding chapters. The result is spoon-feeding, with little need or motivation to provoke individual thought or learning. The cases in this book are comprehensive, approximately 20 pages in length, with ample quantitative and qualitative data, thus forcing a modicum of effort from the student. Shorter cases are also included for ease of understanding and instructor flexibility. Another differentiating feature is the emphasis on diversity hence the use of European as opposed to US based cases.

Twenty-First Century Workplace Challenges SAGE Publications

As we begin a new century, the astonishing spread of nationally and internationally accessible computer-based communication networks has touched the imagination of people everywhere. Suddenly, the Internet is in everyday parlance, featured in talk shows, in special business "technology" sections of major newspapers, and on the covers of national magazines. If the Internet is a new world of social behavior it is also a new world for those who study social behavior. This volume is a compendium of essays and research reports representing how researchers are thinking about the social processes of electronic communication and its effects in society. Taken together, the chapters comprise a first gathering of social psychological research on electronic communication and the Internet. The authors of these chapters work in different disciplines and have different goals, research methods, and styles. For some, the emergence and use of new technologies represent a new perspective on social and behavioral processes of longstanding interest in their disciplines. Others want to draw on social science theories to understand technology. A third group holds to a more activist program, seeking guidance through research to improve social interventions using technology in domains such as education, mental health, and work productivity. Each of these goals has influenced the research questions, methods, and

inferences of the authors and the "look and feel" of the chapters in this book. Intended primarily for researchers who seek exposure to diverse approaches to studying the human side of electronic communication and the Internet, this volume has three purposes: * to illustrate how scientists are thinking about the social processes and effects of electronic communication; * to encourage research-based contributions to current debates on electronic communication design, applications, and policies; and * to suggest, by example, how studies of electronic communication can contribute to social science itself.

CSR 2.0 and the New Era of Corporate Citizenship CRC Press

NEVER BE ALONE AGAIN: How Bloghouse United the Internet and the Dancefloor is the first book dedicated to the music and Internet culture in the early 2000s known as bloghouse. With a foreword by DJ/producer A-Trak the book includes over 50 original interviews with musicians, bloggers, music industry professionals, and party people from around the world including Steve Aoki, The Bloody Beetroots, Girl Talk, The Cobra Snake, Chromeo, Flosstradamus, The Cool Kids, MySpace Music, MSTRKRFT, and Simian Mobile Disco. NEVER BE ALONE AGAIN chronicles the rise of the DJ-slash-It Girl, roaming party photography, illegal Mp3 file sharing, canonical scene reports of bloghouse capitals Los Angeles and Paris, the overlooked impact of suburban Latino communities on nightlife, Kanye West's contribution to the movement, and the slow death of the blog itself.

Principles of Management Harcourt Brace College Publishers

Leadership is inherent in every being despite one's job profile. But qualitative training and other traits are very important for the right behaviours. Every follower possesses attribute of a leader but because these are somewhat concealed, to lead effectively becomes a huge challenge to many. This book is as a result of many years of research. It focused on discovering those behavioural attributes that could combine effectively with the leader's competing roles to enhance his performance. A Competing Value Framework (CVF) was applied to understand the leadership behaviours, characteristics, attributes, and roles that could influence a leader even in the face of contingency factors. The result was quite revealing. Leaders that combine their roles with other attributes/skills achieve behavioural complexity, which are performance enhancing behaviours. Furthermore, leaders are distinguished by their unique mental attitude, particularly in four roles they play: motivation, vision, analytic, and task master roles. Combination of these with other attributes and characteristics enhances the leadership complexity. This book is a useful material for those in the ministries, academia, and organisations of different sizes. It's a book every leader must possess to comprehend the behavioural complexities relevant for organisational performance.

Culture of the Internet John Wiley & Sons

The transition from mass tourism to niche tourism has been a slow process. It is clear that mass tourism can damage local culture, authenticity, and resources, and niche tourism is considerably important for the future of tourism companies and destination managers. Thus, it is essential for tourism companies and destination managers to be proactive and adapt to market changes and challenges to hold a stronger position in the business environment in the future. Exploring Niche Tourism Business Models, Marketing, and Consumer Experience provides relevant theoretical and empirical research findings, an innovative and multifaceted perspective of the niche tourist experience, and an understanding of how companies adopt business models based on sustainable paradigms and innovative technologies as a way to create value. Covering topics such as business models, rural tourism, and visitor experience, this premier reference source is an essential resource for marketing managers, product developers, niche tourism executives, marketing and tourism students, business professionals, researchers, and academicians.

Basic Strategy in Context Springer Nature

What is it that makes certain organizations more successful? Organization design and its management has long been the fixation of leaders and scholars alike. Cracking the code to the perfect organizational ecosystem appears to be the dividing line between great success and mediocrity. The 21st century launched with great volatility and a level of cultural and global diversity unknown by previous generations. This instability demands new approaches and methods for the delivery of products, services and ideas. We can no longer afford to run organizations with 19th and 20th century ideas. The pressures of shifting demographics, culture and technology require new approaches to organizational leadership and structures. Welcome to the era of the Open Organization. The Open Organization: A New Era of Leadership and Organizational Development, by Dr Philip A Foster, is divided into three distinct parts; the first explores the

foundations of an Open Organization, covering the evolution of leadership and organization theories from the beginning of known time through to the 21st century; the second discusses the elements of such an organization, presenting the ecosystem of an Open System with its structure, culture and decision-making functions, while the third examines the 21st century organization, questioning 'who should go Open' and reviewing the reality of creating this type of organization, understanding control and resistance and addressing the matter of bringing about change.

The New Era of the CCO SAGE

The growth in mergers and acquisitions (M&A) activity around the world masks a high rate of failure. M&A can provide companies with many benefits, but in the optimism and excitement of the deal many of the challenges are often overlooked. This comprehensive collection, bringing together an international team of contributors, moves beyond the theory to focus on the practical elements of mergers and acquisitions. This hands-on, step-by-step volume provides strategies, frameworks, guidelines, and ample examples for managing and optimizing M&A performance, including: ways to analyze different types of synergy; understanding and analyzing cultural difference along corporate and national cultural dimensions, using measurement tools; using negotiation, due diligence, and planning to analyze the above factors; making use of this data during negotiation, screening, planning, agreement, and when deciding on post-merger integration approaches. Students, researchers, and managers will find this text a vital resource when it comes to understanding this key facet of the international business world.

Learning Organizations SAGE

Organizational communication as a field of study has grown tremendously over the past thirty years. This growth is characterized by the development and application of communication perspectives to research on complex organizations in rapidly changing environments. Completely re-conceptualized, The SAGE Handbook of Organizational Communication, Third Edition, is a landmark volume that weaves together the various threads of this interdisciplinary area of scholarship. This edition captures both the changing nature of the field, with its explosion of theoretical perspectives and research agendas, and the transformations that have occurred in organizational life with the emergence of new forms of work, globalization processes, and changing organizational forms. Exploring organizations as complex and dynamic, the Handbook brings a communication lens to bear on multiple organizing processes.

The 2nd International Conference on Recent Advances in Computing Sciences (RACS) was held from 29th to 30th November 2022 at Lovely Professional University, Jalandhar, India. The conference focused on discussing issues, exchanging ideas, and the most recent innovations towards advancing research in the field of Computing Sciences and Technology. All technical sessions were predominantly related to Data Science, Artificial Intelligence, Remote Sensing, Image Processing, Computer Vision, Data Forensics, Cyber-Security, Computational Sciences, Simulation and modeling, Business Analytics, and Machine Learning.

The New Faces of Organizations in the 21st Century CRC Press

In the context of the changing nature of universities, this book discusses the progression of enterprise and entrepreneurship education, and conceptualises 'best practice' with the aim of enhancing teaching and support for entrepreneurs. Including an overview of entrepreneurship, teaching entrepreneurship, enterprising universities and industrial ecosystems, the author also discusses stakeholder theory and analysis, concluding with a perspective on effective and enterprising learning spaces. An insightful read for researchers, educators and policy-makers, this comprehensive overview provides up-to-date literature and case studies to describe the need for entrepreneurship education, its growth, the influence of key institutional stakeholders, and the future of programme delivery and assessment.

Shaping Organization Form considers the role of new communication technologies in shaping organizations today and in the future. Four key themes are considered in depth: changes in technology, changes in organizational form, and their mutual influence on one another; evolutionary processes in organizations and the ways in which technology can influence these processes; the development of organizational communities and inter-organizational relationships that are mediated by electronic communication systems; and major controversies surrounding electronically mediated organizations and directions for future research that flow out of these controversies.
