In Building Academic Vocabulary:

Teacher's Manual, Robert J. Marzano and

Debra J. Pickering give teachers a

practical way to help students master

academic vocabulary. Research has

shown that when teachers, schools, and

districts take a systematic approach to

helping students identify and master

essential vocabulary and concepts of a

given subject area, student

comprehension and achievement rises.

In the manual, readers will find the

following tools: \* A method to help

teachers, schools, and districts

determine which academic vocabulary

terms are most essential for their needs

\* A six-step process for direct instruction

in subject area vocabulary \* A how-to to

help students use the Building Academic

Vocabulary: Student Notebook. The six-

step method encourages students to learn critical academic vocabulary by connecting these terms to prior knowledge using linguistic and non-linguistic means that further encourage the refinement and deepening of their understanding. \* Suggestions for tailoring academic vocabulary procedures for English Language Learners. \* Samples and blackline masters for a variety of review activities and games that reinforce and refine student understanding of the academic terms and concepts they learn. The book also includes a list of 7, 923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. Building Academic Vocabulary: Teacher's Manual puts into practice the research and ideas outlined in Marzano's previous book Building Background Knowledge for Academic Achievement. Using the teacher's manual and vocabulary notebooks, educators can guide students in using tools and activities that will help them deepen their own understanding of critical academic vocabulary--the building blocks for achievement in each discipline.
