Conway Functional Analysis Solution Functional analysis has become a sufficiently large area of mathematics that it is possible to find two research mathematicians, both of whom call themselves functional analysts, who have great difficulty understanding the work of the other. We have to assume that  $(Y; \|\cdot\|)$  is a Banach space. Then if  $x_n \in X$  and  $x_n \rightarrow x$  (with  $x \in V$ ) we know that  $\{x_n\}$  is Cauchy in  $V$ . So, since  $\|x_n - x_m\| \leq \|x_n - x\| + \|x - x_m\|$  it follows that  $\{x_n\}$  is a Cauchy sequence in  $Y$ . Since  $Y$  is complete, we know that  $\lim_{n \rightarrow \infty} \|x_n - x\|$  exists and is an element of  $Y$ .
