This handbook includes varying comparative African and global case studies on the use of language(s) in courtroom discourse and higher education institutions: Kenya; Morocco; Nigeria; Australia; Belgium Canada and India. These African and global case studies form the backdrop for the critique of the monolingual English language of record policy for South African courts, the core of this handbook, discussed in relation to case law and the beleaguered legal interpretation profession. This handbook argues that linguistic transformation and decolonisation of South Africa's legal and higher education systems needs to be undertaken where legal practitioners are linguistically equipped to litigate in a bilingual/ multilingual courtroom that enables access to justice for the majority of African language speaking litigants, enforcing their constitutional language rights.

From the National Book Award-winning author of *Underworld*, a "daring...provocative...exquisite" (The Washington Post) novel about five people gathered together in a Manhattan

apartment, in the midst of a catastrophic event. It is Super Bowl Sunday in the year 2022. Five people, dinner, an apartment on the east side of Manhattan. The retired physics professor and her husband and her former student waiting for the couple who will join them from what becomes a dramatic flight from Paris. The conversation ranges from a survey telescope in North-central Chile to a favorite brand of bourbon to Einstein's 1912 Manuscript on the Special Theory of Relativity. Then something happens and the digital connections that have transformed our lives are severed. What follows is a "brilliant and astonishing...masterpiece" (Chicago Tribune) about what makes us human. Don DeLillo completed this novel just weeks before the advent of the Covid pandemic. His language, the dazzle of his sentences offer a kind of solace in our bewildering world. "DeLillo's shrewd, darkly comic observations about the extravagance and alienation of contemporary life can still slice like a scalpel" (Entertainment Weekly). "In this wry and cutting meditation on collective loss, a rupture severs us, suddenly, from everything we've come to rely on. The Silence seems to absorb DeLillo's entire body of work and sand it into stone or crystal." —Rachel Kushner

The economies of China and of the Latin America and the Caribbean region are the current global growth poles and, over the coming years, will grow twice or three times as quickly as the industrialised economies, which will have to adjust to slower growth and higher unemployment. The present juncture offers an opportunity to rethink global and regional partnership strategies and to put greater emphasis on South-South ties in trade, foreign direct investment (FDI) and cooperation. In this document, the Economic Commission for Latin America and the Caribbean (ECLAC) posits that China and the Latin America and the Caribbean region now enjoy a sufficiently mature relationship and are poised to make a qualitative leap towards a mutually beneficial strategic alliance.

**The Big Nine** BoD – Books on Demand  
In this important and masterful synthesis of the Chinese and Japanese experience in America, historian Roger Daniels provides a new perspective on the significance of Asian immigration to the United States. Examining the period from the mid-nineteenth century to the early 1980s, Daniels presents a basic history comprising the political and socioeconomic background of Chinese and Japanese immigration and acculturation. He draws distinctions and points out similarities not only between Chinese and Japanese but between Asian and European immigration experiences, clarifying the integral role of Asians in American history. Daniels' research is impressive and his evidence is solid. In forthright prose, he suggests fresh assessments of the broad patterns of the Asian American experience, illuminating the recurring tensions within our modern multiracial society. His detailed supporting material is woven into a rich historical fabric which also gives personal voice to the tenacious individualism of the immigrant. The book is organized topically and chronologically, beginning with the emigration of each ethnic group and concluding with an epilogue that looks to

the future from the perspective of the last two decades of Chinese and Japanese American history. Included in this survey are discussions of the reasons for emigration; the conditions of emigration; the fate of first generation immigrants; the reception of immigrants by the United States government and its people; the growth of immigrant communities; the effects of discriminatory legislation; the impact of World War II and the succeeding Cold War era on Chinese and Japanese Americans; and the history of Asian Americans during the last twenty years. This timely and thought-provoking volume will be of value not only to specialists in Asian American history and culture but to students and general historians of American life.

A call-to-arms about the broken nature of artificial intelligence, and the powerful corporations that are turning the human-machine relationship on its head. We like to think that we are in control of the future of "artificial" intelligence. The reality, though, is that we -- the everyday people whose data powers AI -- aren't actually in control of anything. When, for example, we speak with Alexa, we contribute that data to a system we can't see and have no input into -- one largely free from regulation or oversight. The big nine corporations -- Amazon, Google, Facebook, Tencent, Baidu, Alibaba, Microsoft, IBM and Apple--are the new gods of AI and are short-changing our futures to reap immediate financial gain. In this book, Amy Webb reveals the pervasive, invisible ways in which the foundations of AI -- the people working on the system, their motivations, the technology itself -- is broken. Within our lifetimes, AI will, by

design, begin to behave unpredictably, thinking and acting in ways which defy human logic. The big nine corporations may be inadvertently building and enabling vast arrays of intelligent systems that don't share our motivations, desires, or hopes for the future of humanity. Much more than a passionate, human-centered call-to-arms, this book delivers a strategy for changing course, and provides a path for liberating us from algorithmic decision-makers and powerful corporations.

A Handbook on Legal Languages and the Quest for Linguistic Equality in South Africa and Beyond Simon and Schuster

"Provides background information and establishes the context for this episode in the international history of labor as well as in the histories of Cuba, Caribbean plantations, and the overseas Chinese."--Journal of Economic Literature. In 1873, prompted by reports of such abuse in the Spanish colony of Cuba, the government of China sent an Imperial Mission to investigate the living and working conditions of Chinese laborers on the island's sugar plantations. The result was The Cuba Commission Report, a gruesome record of the experience of Chinese workers in Cuba, corroborated by hundreds of depositions taken from the laborers themselves. This softcover edition reproduces the English-language text that was part of the original report of 1876. In a special note to the reader, Rebecca Scott and Sidney Mintz describe the kinds of information contained in this remarkable document. "This is, indeed, labor history and migration history," writes Helly, "but of a sort rarely narrated in so terrifying a manner."

For millennia' humankind has searched for an intellectual Holy Grail - a unifying theory to explain the origins of the universe and our place in it. Our greatest minds' from Pythagoras and Aristotle to Galileo' Newton and Einstein' have explained the universe in terms of symmetry' harmony and order. Yet despite their best efforts' a 'theory of everything' has remained elusive' and for good reason. In *Imperfect Creation*' Marcelo Gleiser argues that there is no grand plan' cosmic blueprint or overarching explanation for our existence. In fact' the latest evidence reveals that not only are there imperfections in the fabric of the universe - they are the driving' creative forces behind its very existence. The universe' it turns out' is not elegant. It is gloriously messy. In an absorbing narrative' Gleiser takes us to the first moments of creation' where an imbalance produced more matter than anti - matter - the birth of the physical universe. He explains the role of imperfection in the formation of galaxies and planets' and the accidents that led to the appearance of life on Earth. And his enquiries go beyond science; if there is no 'guiding principle' behind creation' then what is the nature and role of intelligent life. *Imperfect Creation* offers a fresh new perspective on life in an evolving cosmos. It will change the way we see ourselves and our place in the universe.

Violence is one of the most important

challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of ‘undoing violence’ by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading

authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.
