Growth-Oriented Entrepreneurship New Africa Books

World Scripture: A Comparative Anthology of Sacred Texts is a topical journey through the sacred writings of the world's great religions. Comparing religious beliefs on similar themes demonstrates the existence of a vast sphere of spiritual common ground.

Handbook of Clinical Psychopharmacology for Psychologists Amsterdam University Press

This book provides an extensive introduction to research on growth-oriented entrepreneurship, /b> A number of different methods have been used to describe growth-oriented entrepreneurship; however, there is a consensus that there is a particularly desirable form of entrepreneurship that seeks to create and scale up businesses that will drive productivity growth, create new employment, increase innovation, promote business internationalization and achieve sustainable economic growth. Innovation is a condition of growth-oriented entrepreneurship that includes both

the development and commercialization of new products and services and the development and implementation of new or improved processes that enhance productivity or reduce costs associated with manufacturing or distributing existing products. Innovation involves firms pursuing distinctive business strategies and doing new things in new ways to increase productivity, product development, sales and profitability, including finding and developing new ways of identifying the needs of new and existing customers and making and marketing products that satisfy those needs. The goal of the launch phase for growth-oriented entrepreneurial ventures is to reach the point of scale up and common goals and activities associated with the launch phase include market disruption and penetration; gaining access to capital and markets and mentorship opportunities; organizational growth through management capacity, systems, resources (i.e., people, product and assets) management; embedding organizational culture; development of stakeholder relationships; monitoring and evaluation; and governance and reporting. This book provides an extensive introduction to research on growth-oriented entrepreneurship and continues with an assessment of attempts to create the appropriate framework conditions for growth-oriented

entrepreneurship to flourish and sustain including financial support; government policies; government programs; education and training; research and development transfer; commercial and professional infrastructure; internal market openness; access to physical infrastructure; cultural and social norms; and protection of intellectual property rights. The final chapter looks at growth-oriented entrepreneurs in practice as they work to launch and growth emerging companies. This book is a unique compendium of research and analysis on a dynamic and important segment of entrepreneurship and will be useful to entrepreneurs, academics and policymakers.

Women who Dared Living Justice Press

This stimulating, clearly written and well-structured text is a comprehensive introduction to the principles of management and organisational behaviour, as well as a corrective to the eurocentric bias of most management texts. It develops a trans-cultural perspective which draws on insights from across the world to examine different management styles, cultures and stages of business development. Contents include: * Orientation * Primal Management - Western including America *

Rational Management - Northern including Scandinavia * Developmental Management - Eastern including Japan * Metaphysical Management - Southern including South Africa * Developing yourself as a manager Each section examines core management theory and literature, cultural orientation and related prominent theories. The numerous case studies use appropriate examples from a wide range of international organisations. The uniquely wide-ranging perspective make this a valuable text for all those interested in general management, international business, organisational behaviour and corporate strategy.

[The Macho Paradox](#) Doubleday Canada

The book contains 24 research articles related to the emerging research field of Communities and Technologies (C&T). The papers treat subjects such as online communities, communities of practice, Community support systems, Digital Cities, regional communities and the internet, knowledge sharing and communities, civil communities, communities and education and social capital. As a result of a very quality-oriented review process, the work reflects the best of current research and practice in the field of C&T.

Foundations of Personality Psychology Press

Understanding the global hotel business is not possible without paying specific attention to hotel chain management and dynamics. Chains are big business, approximately 80 percent of hotels currently being constructed around the world are chain affiliated and, in 2014, the five largest brands held over a one million rooms. The high economic importance of the hotel chains and their global presence justifies the academic research in the field however, despite this, there is no uniform coverage in the current body of literature. This Handbook aids in filling the gap by exploring and critically evaluates the debates, issues and controversies of all aspects of hotel chains from their nature, fundamentals of existence and operation, expansion, strategic and operational aspects of their activities and geographical presence. It brings together leading specialists from range of disciplinary backgrounds and regions to provide state-of-the-art theoretical reflection and empirical research on current issues and future debates. Each of the five inter-related section explores and evaluates issues that are of extreme importance to hotel chain management, focusing on theoretical issues, the expansion of hotel chains, strategic and operational issues, the view point of the individual affiliated hotel and finally the current and future debates in the theory and practice of hotel chain management arising from globalisation, demographic trends, sustainability, and new technology development. It provides an invaluable resource for all those with an interest in hotel management, hospitality, tourism and business encouraging dialogue across disciplinary boundaries and areas of study. This is essential reading for students, researchers and academics of Hospitality as well as those of Tourism, Marketing, Business and Events Management.

The Living Library works exactly like a normal library - readers come and borrow a 'book' for a limited period of time. After reading it they return the Book to the library and ? if they want ? they can borrow another Book. There is only one difference: the Books in the Living Library are human beings, and the Books and readers enter into a personal dialogue. The Books in the Living Library are people representing groups frequently confronted with prejudices and stereotypes, and who are often victims of discrimination or social exclusion. The 'reader' of the library can be anybody who is ready to talk with his or her own prejudice and stereotype and wants to spend an hour of time on this experience. In the Living Library, Books cannot only speak, but they are able to reply to the readers' questions, and the Books can even ask questions and learn themselves.

Praise for Handbook of Clinical Psychopharmacology for Psychologists "Handbook of Clinical Psychopharmacology for Psychologists is a remarkably thorough introductory textbook for

integrating psychotropic drug prescribing into psychological practices. It covers basic concepts in physiology, neurology, and pharmacology in easily understood language. Not only is this book a requirement for any psychologist seeking to gain prescriptive authority, but it is also helpful for any mental health clinician who collaborates with prescribers of any discipline. I recommend it highly." Daniel Carlat, MD, Editor in Chief of The Carlat Psychiatry Report "An important resource for any psychologist who is preparing to become a prescribing psychologist or for any psychologist who wants to be informed about the practice of medical psychology." Joseph E. Comaty, PhD, MP, coauthor of A Primer of Drug Action "Handbook of Clinical Psychopharmacology for Psychologists is an excellent treatise written by psychologists for psychologists." From the Foreword by Patrick H. DeLeon, PhD, and Jack G. Wiggins, PhD, former presidents of the American Psychological Association An essential and practical guide to integrating psychopharmacology into clinical practice Edited by medical psychologists with contributions by notable experts in their respective specialties, Handbook of Clinical Psychopharmacology for Psychologists covers key topics including: Ethics, standards of care, laws, and regulations relevant to clinical psychopharmacology Disorders of the nervous system, with particular relevance to psychopharmacology Use of comprehensive diagnostic strategies to establish differential diagnoses among possible medical and psychological symptoms Integration of pharmacotherapy with psychotherapy This essential book also provides an introduction to the qualifying exam for psychologists seeking specialty training in psychopharmacology, the Psychopharmacology Exam for Psychologists (PEP). The PEP-like practice test is available on the companion CD-ROM.

16th European Conference on Management, Leadership and Governance Springer Science & Business Media

Asian American Mental Health is a state-of-the-art compendium of the conceptual issues, empirical literature, methodological approaches, and practice guidelines for conducting culturally informed assessments of Asian Americans, and for assessing provider cultural competency within individuals and systems. It is the first of its kind on Asian Americans. This volume draws upon the expertise of many of the leading experts in Asian American and multicultural mental health to provide a much needed resource for students and professionals in a wide range of disciplines including clinical psychology, medical anthropology, psychiatry, cross-cultural psychology, multicultural counseling, ethnic minority psychology, sociology, social work, counselor education, counseling psychology, and more.

The Routledge Handbook of Hotel Chain Management Hachette UK

Differences between people are a fascinating and long-standing area of psychological inquiry. However, previous research has largely been confined to studies at the descriptive level. This book tries to explain individual difference, rather than merely describe them. Explanations are derived from two major competing frameworks: the biological and social approaches to individuality. The book is based on the contributions of specialists from Europe and North America invited to represent the biological and social points of view. Thus, a direct confrontation is obtained of two approaches that, hitherto, have proceeded with virtually no reference to each other. Attention is paid to behavior genetics, psychophysiology and temperament, as well as to social learning, behavioral strategies and person-environment interactions. Differences and commonalities between the biological and social approaches are scrutinized and a common framework is outlined to stimulate future research. Due to its innovative character, the book is particularly relevant for investigators in the field. In addition, it may be fruitfully used in advanced graduate level courses in personality psychology.

"For the third time in three decades world leaders reaffirmed their promise of "Education For All" when adopting Sustainable Development Goal 4 in 2015. It is the most far-reaching commitment to quality and equity in education so far, yet, there is no consensus on what the agenda means in practice. With a decade left until the 2030 deadline, Grading Goal Four calls upon the education community to engage more thoughtfully and critically with SDG 4 and related efforts. As an ever-growing number of actors and initiatives claim to contribute to its achievement, it is becoming clear that the ambitious but broad priorities within the goal are vulnerable to cherry-picking and misrepresentation, placing it at the heart of tensions between instrumentalist and rights-based approaches to education. This text, a critical analysis of SDG 4, provides a framework for examining trends and developments in education globally. As the first volume that examines early implementation efforts under SDG 4, Grading Goal Four formulates a critique along with strategies for moving forward. By scrutinising the challenges, tensions and power dynamics shaping SDG 4, it

advances rights-based perspectives and strategies for effective implementation and builds capacity for strengthened monitoring and analysis of the goal"--

A THOROUGH AND CONTEMPORARY EXPLORATION OF ISSUES FUNDAMENTAL TO MULTICULTURAL COMPETENCY Handbook of Multicultural Counseling Competencies draws together an expert group of contributors who provide a wide range of viewpoints and personal experiences to explore the identification and development of specific competencies necessary to work effectively with an increasingly diverse population. Beginning with a Foreword by Derald Wing Sue, this unique handbook offers a broad, comprehensive view of multiculturalism that is inclusive and reflective. The coverage in this important book lies beyond the scope of traditionally defined multiculturalism, with discussion of historically overlooked groups that have experienced prejudice and bias because of their size, social class, age, language, disability, or sexual orientation. This book provides readers with: Practical cases and examples to enhance skill development, promote critical thinking, and increase awareness A cross-section of diversity characteristics and best practice guidelines Examination of detailed, developmentally relevant competency categories Resources and exercises designed for practitioners at various levels of experience and expertise A forum for debate, discussion, and growth Designed to help readers enhance general multicultural competency and their ability to provide services to the populations specifically described, this thought-provoking text will prove useful in facilitating ongoing dialogues about multicultural competence in all its variations.

Personality Assessment Practice with Multicultural Populations Brill

Throughout the world as in the United States, psychologists are increasingly being called upon to evaluate clients whose backgrounds differ from their own. It has long been recognized that standard personality and psychopathology assessment instruments carry cultural biases, and in recent years, efforts to correct these biases have accelerated. The Handbook of Cross-Cultural and Multicultural Personality Assessment brings together researchers and practitioners from 12 countries with diverse ethnic and racial identities and training to present state-of-the-art knowledge about how best to minimize cultural biases in the assessment of personality and psychopathology. They consider research methodology, the design and construction of standard objective and projective tests, the use of measures of acculturation, racial identity, and culture-specific tests, the social etiquette of service delivery, and the interpretation of test data for clinical diagnosis. Ranging widely through all the relevant issues, they share a common collective vision of how culturally competent services should be delivered to clients. The Handbook offers the first comprehensive view of a consistent approach to cultural competence in assessment--a necessary precursor of effective intervention. It will become an indispensable reference for all those whose practice or research involves individuals with different ethnic and racial identities.

Innovation through Fusion John Wiley & Sons

"The Australian Constitution contains no guarantee of freedom of religion or freedom of conscience. Indeed, it contains very few provisions dealing with rights — in essence, it is a Constitution that confines itself mainly to prescribing a framework for federal government, setting out the various powers of government and limiting them as between federal and state governments and the three branches of government without attempting to define the rights of citizens except in minor respects. [...] Whether Australia should have a national bill of rights has been a controversial issue for quite some time. This is despite the fact that Australia has acceded to the ICCPR, as well as the First Optional Protocol to the ICCPR, thereby accepting an international obligation to bring Australian law into line with the ICCPR, an obligation that Australia has not discharged. Australia is the only country in the Western world without a national bill of rights.4 The chapters that follow in this book debate the situation in Australia and in various other Western jurisdictions." From Foreword by The Hon Sir Anthony Mason AC KBE: Human Rights and Courts
World Scripture A&C Black

The Deleuze and Guattari Dictionary is a comprehensive and accessible guide to the world of Gilles Deleuze and Felix Guattari, two of the most important and influential thinkers in twentieth-century European philosophy. Meticulously researched and extensively cross-referenced, this unique book covers all their major sole-authored and collaborative works, ideas and influences and provides a firm grounding in the central themes of Deleuze and Guattari's groundbreaking thought. Students and experts alike will discover a wealth of useful information, analysis and criticism. A-Z entries include clear definitions of all the key terms used in Deleuze and Guattari's writings and detailed synopses of their key works. The Dictionary also includes entries on their major philosophical

influences and key contemporaries, from Aristotle to Foucault. It covers everything that is essential to a sound understanding of Deleuze and Guattari's philosophy, offering clear and accessible explanations of often complex terminology. The Deleuze and Guattari Dictionary is the ideal resource for anyone reading or studying these seminal thinkers or Modern European Philosophy more generally.

The Dynamics of International Migration and Settlement in Europe Business Expert Press

Drawing on contemporary psychological insights, this book shows how both teaching and learning styles are rooted in the dynamics of personality. By opening the door to a whole range of teaching

techniques addressing the personality needs of different students, *Effective Teaching, Effective Learning* will prove an invaluable aid to classroom teachers, parents, school psychologists, counselors, administrators, and all those concerned with contemporary educational issues. Filled with practical, concrete suggestions, this book: clarifies the strengths and weaknesses of different teaching and learning styles, helps teachers get more satisfaction out of teaching by identifying new ways to reach students with various learning styles, matches the different types of learners with the teaching approaches and materials most likely to work for them, provides specific steps for handling conflict, discipline, and academic and interpersonal issues.
