The little grey Fergie is Britain's best-loved tractor, the light user-friendly machine that finally replaced the horse on farms. This highly illustrated account covers the full history of Harry Ferguson's tractor products from his pioneering work before the 1930s to the merger with Massey in 1957. The author has had access to fresh archive material and has interviewed many of the surviving men who were associated with Ferguson. The appeal of the Fergie lay in its lightness and utility, and also in the system of mechanized farming of which it was a part. Throughout the book, reference is made to the implements which lay at the heart of the

system. Stuart Gibbard has won "Tractor and Machinery" magazine's award for the best British tractor book five years running.

To commemorate the 150th Anniversary of the end of the Civil War, Diversion Books is publishing seminal works of the era: stories told by the men and women who led, who fought, and who lived in an America that had come apart at the seams. The events leading up to the Civil War reveal a country divided by more than just a belief in, or revulsion of, slavery. It reveals a country still forming, even as it fissures and breaks apart. It reveals an industrial north and an agricultural south evolving into

enemies even as they mutually benefit one another. It reveals politicians playing to their bases, riling up young men especially to take up arms against their fellow countrymen. This astonishing historical work chronicles all this and more, exploring the fractious ideologies and the most important figures who led the country into its bloodiest conflict.

Considering the context of the present ecological and social crisis, this book takes an interdisciplinary approach to explore the relationship between globalism and localization. Globalism may be viewed as a positive emergent property of globalization. The latter depicts a worldwide economic and political system, and arguably a worldview, that has directly increased planetary levels of injustice, poverty, militarism, violence, and ecological destruction. In contrast, globalism represents interconnected systems of exchange and resourcefulness through increased communications across innumerable global diversities. In an economic, cultural, and political framework, localization centers on small-scale communities placed within the immediate bioregion, providing intimacy between the means of production and consumption, as well as long-term security and resilience. There is an increasing movement towards localization in order to counteract the destruction wreaked by globalization, yet our world is deeply and integrally immersed within a globalized

reality. Within this collection, contributors expound upon the connection between local and global phenomenon within their respective fields including social ecology, climate justice, ecopsychology, big history, peace ecology, social justice, community resilience, indigenous rights, permaculture, food justice, liberatory politics, and both transformative and transpersonal studies.

The fascinating story of a century-old automobile dynasty Fiat is one of the world's largest automakers, but when it made headlines by grabbing control of a bankrupt Chrysler in 2009 it was unknown in the U.S. Fiat's against-all-odds swoop on Chrysler---masterminded by Sergio Marchionne, the Houdini-like manager who saved Fiat from its own near-collapse in 2005 - has made the automaker one of the most unlikely winners of the financial crisis. *Mondo Agnelli* is a new book that looks at the chain of unpredictable events triggered by the death of Gianni Agnelli in 2003. Gianni, the charismatic, silver-haired power broker and style icon, was the patriarch who had lead the company founded by his grandfather in 1899. But Gianni's own son had committed suicide. Without a mature heir, the dynasty and Fiat were rudderless. Backed by Gianni's closest advisors, his serious, shy, and determined grandson John plucked Marchionne

from obscurity. Together, they saved the family company and, inadvertently, positioned Fiat as a global trailblazer when the global storm hit. A classic story of ingenuity and hard work, the book portrays a business dynasty that triumphed over adversity and family tragedy because of its own smarts, sweat, and ability to bend the rules. An engaging tale for those interested in the stories behind the economic crash, the book contains never-before reported material about how Fiat succeeded in making Chrysler profitable where both Daimler AG and Cerberus, its previous owners, had failed. A story for a wide audience, from car buffs, business readers, lovers of Italy, and anyone fascinated by the lifestyle of Europe's most glamorous industrial dynasty, this book tells the tale of how Fiat achieved the seemingly impossible -- turning around an American automotive icon everyone else had given up for dead.

For more than 120 years (1714–1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of

eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.
