 "Among the Goldens at Emory high, Lilah Covington is Platinum - the hottest of the hot. She's popular, beautiful, and much smarter than she looks. But most importantly to Lilah, she's in complete control of her own destiny - if only someone would tell that to the mysterious ghost boy roaming the halls. Ever since Lissy and Lexie James arrived in town, Lilah's perfect world has been coming unhinged. No-one else can see the ghost who's trailing her around campus, and - forget the rumour mill - her memories have her more sidetracked than any gossip could. It looks as if the James family legacy of supernatural sight might be contagious. And to make matters worse, mutiny is brewing among the Goldens, and if Lilah isn't careful, she may just lose her top-tier boyfriend to her second-in-command. Lilah knows the rules better than anyone, but between her newfound visions, an absolutely fatal attraction to a boy who isn't real, and the threat of a supernatural enemy with a sting deadlier than any Queen Bee, it's going to take everything Lilah has to stay on top at Emory. And to prove once and for all that - highlights and high heels aside - those who make the rules are the only ones who can break them." -- Publisher.

"Entertaining, insightful and simply brilliant. Quantum Physics for Hippies shatters your perception of reality." - Dr. Mark Müller Bob, a spiritual hippie, meets the witty nerd Alice, who day-dreams about quantum physics all day long. This chance meeting starts them on a mind-blowing journey into the nature of reality that will change their lives forever. Written by quantum physicists and beautifully illustrated, Quantum Physics for Hippies takes the bizarre world of quantum physics and makes it understandable for everyone, hippies and nerds alike. Is this book for you? If you would love to know what quantum physics is really about, but complicated explanations or equations put you off, then this book is for you. Why? We found that there are two types of books about quantum physics. Type A is written by nerds. Usually, they have hundreds of pages, a lot of equations and bury you in useless details. They are mostly correct, but not fun to read. Type B is written by esoterics. They are easy to read, but often full of nonsense, not helping at all in your mission to find the truth. So we decided to write a new type of quantum physics book. Type Hippie-Nerd! Easy, fun to read and correct all at the same time, while still blowing your mind. Happy Readings!

In this wonderfully inventive book, Bella is taking her dog for a stroll across the page but halfway across, he disappears! Unable to quite believe what's just happened Bella watches, transfixed, with changing emotions of surprise, indignation, moments of renewed hope (as the authorities arrive to take control) followed by shock (as they too succumb to the book's inexplicable

behaviour) and finally action when Bella marches toward the dangerous middle of the book . . . only to disappear herself! At this point, the book has consumed its characters and it's down to the reader to step in to help. A note from Bella appears directly appealing for assistance and, with a rigorous shake, the characters reappear. Normality is restored and Bella is finally able to take her dog for an uninterrupted walk . . . or is she?!
