 What is your favorite class? My favorite MCB class has been MCB 150 (Molecular Immunology). The class is structured to help you understand the basis of immunology and then challenges you to apply that knowledge to common diseases that we've all heard of.

 The Cell and Molecular Biology Graduate Group (CAMB) is an interdisciplinary graduate program, providing rigorous training in modern cell and molecular biology. Within this integrated program are six discipline areas: Cancer Biology (CB); Cell Biology, Physiology, and Metabolism (CPM); Developmental, Stem Cell, and Regenerative Biology (DSRB); Genetics and Epigenetics (G&E); Gene Therapy and ...

 Molecular Biology of the Cell is the classic in-depth text reference in cell biology. By extracting fundamental concepts and meaning from this enormous and ever-growing field, the authors tell the story of cell biology, and create a coherent framework through which non-expert readers may approach the subject. Written in clear and concise language, and illustrated with original drawings, the ...  
 Molecular Biology of the Cell - NCBI Bookshelf  
 The definitive text in cell biology. As the amount of information in biology expands dramatically, it becomes increasingly important for textbooks to distill this vast amount of scientific knowledge into concise principles and enduring concepts.

 Through its ability to bind the ends of poly(ADP-ribose) (PAR) chains, the function of the histone variant macroH2A1.1, including its ability to regulate transcription, is coupled to PAR polymerases (PARPs).
