This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting descriptive, theoretical, and empirical chapters as well as case studies, this Handbook, on the one hand, provides a comprehensive view of the English language teaching

and learning scenario in Bangladesh, and on the other hand comes up with suggestions for possible decolonisation and de-eliticisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics, all related to English language teaching and learning in Bangladesh, and acquaints readers with different perspectives, operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education,

sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh, from history, policy and practice to assessment, pedagogy and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.

The UK's Changing Democracy presents a uniquely democratic perspective on all

aspects of UK politics, at the centre in Westminster and Whitehall, and in all the devolved nations. The 2016 referendum vote to leave the EU marked a turning point in the UK's political system. In the previous two decades, the country had undergone a series of democratic reforms, during which it seemed to evolve into a more typical European liberal democracy. The establishment of a Supreme Court, adoption of the Human Rights Act, Scottish, Welsh and Northern Irish devolution, proportional electoral systems, executive mayors and the growth in multi-party competition all marked profound changes to the British political tradition. Brexit may now bring some of these developments to a juddering halt. The UK's previous 'exceptionalism' from European patterns

looks certain to continue indefinitely. 'Taking back control' of regulations, trade, immigration and much more is the biggest change in UK governance for half a century. It has already produced enduring crises for the party system, Parliament and the core executive, with uniquely contested governance over critical issues, and a rapidly changing political landscape. Other recent trends are no less fast-moving, such as the revival of two-party dominance in England, the re-creation of some mass membership parties and the disruptive challenges of social media. In this context, an in-depth assessment of the quality of the UK's democracy is essential. Each of the 2018 Democratic Audit's 37 short chapters starts with clear criteria for what democracy

requires in that part of the nation's political life and outlines key recent developments before a SWOT analysis (of strengths, weaknesses, opportunities and threats) crystallises the current situation. A small number of core issues are then explored in more depth. Set against the global rise of debased semi-democracies, the book's approach returns our focus firmly to the big issues around the quality and sustainability of the UK's liberal democracy.

Weaving outwards from a centripetal force of biographical stances, this book presents the collective perspectives of

literacy researchers from Brunei, China, Hong Kong, Malaysia, Singapore, the Philippines and Taiwan. It represents the first all-Asian initiative to showcase the region's post-colonial, multilingual and multicultural narratives of literacy education. This book provides a much-needed platform that initiates important conversations about literacy as a sociocultural practice in a region that is both challenged and shaped by sociocultural influence unique to Asia's historical and geopolitical trajectory. Driven by the authors' lived experiences of becoming literate as well as their empirical research work in later years, each chapter brings decades of biographical narratives and collective empirical research findings to bear. Within the book are negotiations about

literacy across and within home and school contexts; transactions of literature, text and reader; and considerations of the literacy policy-practice nexus. These trajectories, while divergent in their issues, come together as shared lived experience located in local contexts considered through global perspectives. As Asia looks set to become the 21st century's new economic and labour force, the need to understand the sociocultural milieu of this region cannot be understated. This book on literacy education in Asia contributes to the larger narrative.

Despite increasing prevalence over the past three decades and a clear impact on school education policy and practice, education's connection to dog-whistle journalism and politics has not yet been fully explored. Addressing this gap, *Politics and the Mediatization of School Educational Policy* examines the emergence and current impact of dog-whistle politics and journalism on education in Australia, the US and the UK, questioning what is at stake when this political dog whistle is directed at school educational policy and practice. Exploring common targets for dog-whistling, such as teaching standards,

teacher quality and specific curriculum areas, such as history, sex and health education, the book considers the broader social issues of xenophobia and racism, as well as the decline of print media and rise of digital news sources in its place, with each chapter including an in-depth discussion using peer-reviewed literature on the subject. Following the trail of dog whistles impacting in school educational policy and practice across these three countries, this book explores: To what extent is the dog-whistle dynamic embedded in school educational policy and practice? To what extent does the dog-whistle dynamic affect our understanding of school educational policy and practice? How might we explain the continued flurry of dog whistles impacting school

educational policy and practice? As the phenomenon of the dog whistle intensifies both nationally and internationally, this timely and thought-provoking book is necessary reading for academics, postgraduate researchers and all members of school communities.
