**Assessing Writing** Cambridge University Press

The researchers in the field of theoretical and theoretically inclined descriptive linguistics have for a long time felt a need for detailed and clearly presented linguistic treatments of various syntactic phenomena in South Asian languages. *Clause Structure in South Asian Languages*: provides a comprehensive overview and covers major aspects of clause structure in a variety of South Asian languages; provides detailed analyses of several aspects of phrase structure of many prominent South Asian languages;

gives theoretically up-to-date treatment of several important issues in South Asian syntax and semantics; contains papers by some of the most prominent linguists working on South Asian languages.

**Health Care and Gender** Cambridge University Press

This book examines how and what teachers think in their practice of language teaching.

*Uncovering Grammar* Routledge

Nature has consistently provided human beings with bioactive compounds that can be used directly as drugs or indirectly as drug leads. Some of the major classes of natural bioactive compounds include phenolics, alkaloids, tannins, saponins, lignin, glycosides, terpenoids, and many more. They possess a broad

range of biological activities and are primarily useful in the treatment of various health issues. At the same time, the search for new and novel drugs is never-ending and, despite major advances in synthetic chemistry, nature remains an essential resource for drug discovery. Therefore, more and more researchers are interested in understanding the chemistry, clinical pharmacology, and beneficial effects of bioactive compounds in connection with solving human health problems. This book presents a wealth of information on natural metabolites that have been or are currently being used as drugs or leads for the discovery of new drugs. In addition, it highlights the importance of natural products against various human diseases, and their applications in the drug, nutraceuticals, cosmetics and herbal industries. Accordingly, the book offers a valuable resource for all students, educators, and healthcare experts involved in natural product research, phytochemistry, and pharmacological research.

**Oral and Maxillofacial Surgery for the Clinician** Springer Nature

A guide to Arabic syntax covering a broad variety of topics including argument structure, negation, tense, agreement phenomena, and resumption. The discussion of each topic sums up the key research results and provides new points of departure for further research.

**Success in Academic Surgery** Springer

Comprehensive issue on adolescent oral health which covers dental needs assessment and access to care; psychosocial behavior patterns; prevention strategies for dental caries; prevention strategies for periodontal diseases and soft tissue

lesions; developmental occlusion, orthodontic interventions, and orthognathic surgery; restorative, esthetic and replacement dentistry; dental trauma dental management for adolescent athletes; and common medications for adolescent dental patients.

**Machine Learning Paradigms: Theory and Application** Cambridge University Press

This book-length treatment of Exploratory Practice introduces five propositions about learners as practitioners of learning who are capable of developing their expertise through conducting research in and on their own classroom learning lives.

**Cambridge grammar of English : a comprehensive guide ; spoken and written English grammar and usage ; [Cambridge international corpus]** Cambridge University Press

The authors set out to define the aims, principles and objectives of recent research into what exactly happens in the language classroom, to describe the findings of this work, and to relate these to teaching practice.

**Education System in Saudi Arabia** Springer Nature

Clay Nanoparticles: Properties and Applications sets out the major properties of clay nanoparticles and their technological applications. The first part of the book focuses on the characterization of nanoclays, including layered, fibrous and tubular clay minerals. The second part illustrates the current and potential applications of nanoclays within material science and biotechnology. These include the development of geopolymers and bionanocomposites based on sustainable polymers filled with eco-compatible nanoclay. The potential use of nanoclays as flame retardants is also discussed, along with the correlation between

the properties and potential applications of several nanoclay types. In particular, the applications explored include nanoclays as drug delivery systems and for environmental protection. The book provides a complete and multidisciplinary exploration of nanoclays, highlighting a range of perspectives within current nanotechnology research. Assesses the advantages of using nanoclays instead of conventional clay materials in product design Describes the major characterization techniques – both experimental and computational – for nanoclays Explores new fabrication techniques based on pristine and modified clay nanoparticles that are being used both in materials science and biotechnology

**Dir'aiyah** Springer

The study concentrates on the origins, developments and current directions of the discipline called Teaching Arabic as a Foreign Language (TAFL) within the Arab world and partially outside of it during the last sixty years, namely between 1958 and 2018. The most influential scholars, authors, educators and those significant works that contributed to the development of the discipline are taken into account. In addition, special attention is paid to the TAFL institutes, which are considered as epicenters of the activities and that hosted important meetings, allowing scholars to gather around the same table and discuss approaches, trends and methods used in the field of TAFL. All these aspects converge in one comprehensive research, which is enriched by the narration of the main socio-political changes that affected the Middle Eastern region recent history.

**Techniques and Principles in Language Teaching** Springer

This book provides the first academically rigorous description and

critical analysis of the Higher Education system in the Kingdom of Saudi Arabia, and of the vision, strategies and policy imperatives for the future development of Saudi universities. The government of Saudi Arabia has recognized in both policy and practice the necessity of developing its university system to world-class standard. Significantly increasing access and participation in Higher Education across a range of traditional and non-traditional disciplines is directly relevant to the future social and economic growth of the country. This book addresses the way in which Saudi Arabia is moving to develop a quality university system that balances the need for students to gain the knowledge, skills and 'ways of doing' necessary to operate effectively on the world stage while simultaneously maintaining and demonstrating the fundamental values of the Islamic religion and culture. The book provides a description and critical analysis of the key components of the Saudi Higher Education system, and of system-level responses to the challenges and opportunities facing Saudi universities. It is written by a team of Saudi academics and authors of international standing from non-Saudi universities so as to provide both internal and external perspectives on all issues and to place information and ideas in the context of the international Higher Education scene.

 Second Language Learning Theories is a clear and concise overview of the field of second language acquisition (SLA) theories. Written by a team of leading academics working in different SLA specialisms, this book provides expert analysis of the main theories from multiple perspectives to offer a broad and balanced introduction to the topic. The book covers all the main theoretical perspectives currently active in the SLA field and sets them in a broader perspective per chapter, e.g. linguistic, cognitive or sociolinguistic. Each chapter examines how various theories view language, the learner, and the acquisition process. Summaries of key studies and examples of data relating to a variety of languages illustrate the different theoretical perspectives. Each chapter concludes with an evaluative summary of the theories discussed. This third edition has been thoroughly updated to reflect the very latest research in the field of SLA. Key features include: a fully re-worked chapter on cognitive models of language and language learning a new chapter on information processing, including the roles of different types of memory and knowledge in language learning the addition of a glossary of key linguistic terms to help the non-specialist a new timeline of second language learning theory development This third edition takes account of the significant developments that have taken place in the field in recent years. Highly active domains in which theoretical and methodological advances have been made are treated in more depth to ensure that this new edition of Second Language Learning Theories remains as fresh and relevant as ever.

*Reference to Kinds in English* Taylor & Francis

The book focuses on machine learning. Divided into three parts, the first part discusses the feature selection problem. The second part then describes the application of machine learning in the classification problem, while the third part presents an overview of real-world applications of swarm-based optimization algorithms. The concept of machine learning (ML) is not new in the field of computing. However, due to the ever-changing nature of requirements in today's world it has emerged in the form of completely new avatars. Now everyone is talking about ML-based solution strategies for a given problem set. The book includes research articles and expository papers on the theory and algorithms of machine learning and bio-inspired optimization, as well as papers on numerical experiments and real-world applications.

*Advances in Data Science, Cyber Security and IT Applications*  
 Routledge

This book provides a practical overview of the most important methods in the field. Readers are drawn into classrooms where various teaching methods and approaches are being used. They are encouraged to reflect on their own beliefs and to develop their own approach to language teaching. - Publisher.

*The Developing Language Learner* Cambridge University Press  
 Teaching EFL Writing in the 21st Century Arab World addresses a range of issues related to researching and teaching EFL writing in different countries in the Arab World including Egypt, Morocco, Oman, Palestine, Tunisia, UAE and Yemen. Both theoretically and practically grounded, chapters within discuss the different contexts in which EFL writing is taught, from primary school to university. The book sheds light on how EFL writing is learned and

taught at each educational stage, exposing the different challenges encountered in the teaching and learning. The focus on EFL writing in the Arab World makes this a unique and long overdue contribution to the field of research around EFL writing and will be an invaluable resource for researchers, curriculum designers and students.

Teacher Cognition in Language Teaching Springer Science & Business Media

Providing practical guidance and resources, this book helps teachers harness the power of children's literature for developing ELLs' literacy skills and language proficiency. The authors show how carefully selected fiction, nonfiction, and poetry can support students' learning across the curriculum. Criteria and guiding questions are presented for matching books and readers based on text features, literacy and language proficiency, and student background knowledge and interests. Interspersed throughout are essays and poems by well-known children's authors that connect in a personal way with the themes explored in the chapters. The annotated bibliography features over 600 engaging, culturally relevant trade titles.

Design and Modeling of Mechanical Systems Amsterdam University Press

This book integrates recent research and practice in language teaching into a framework for analysing learning tasks.

**Clay Nanoparticles** International Center for Research on Bilingualism

This book constitutes the refereed proceedings of the First International Conference on Intelligent Cloud Computing, ICC 2019, held in Riyadh, Saudi Arabia, in December 2019. The two-volume set presents 53 full papers, which were carefully reviewed and selected from 174 submissions. The papers are organized in topical sections on Cyber Security; Data Science; Information Technology and Applications; Network and IoT.

**Clause Structure in South Asian Languages** Springer Science & Business Media

This book focuses on the links between deep earth (mantle) and shallow processes in areas of active tectonics in the Arabian Plate and Surrounding Areas. It also provides key information for energy resources in these areas. The book is a compilation of selected papers from the Task Force of the International Lithosphere Program (ILP). It comprises a set of research studies from the Middle East, North Africa and the Mediterranean domain focusing on (1) the architecture, geodynamic evolution and modelling of the Red Sea rift system and its surroundings, and tectonics and sedimentation in the Gulf of Corinth, (2) the crustal architecture and georesources of the North Algerian Offshore, (3) Reservoirs, aquifers and fluid transfers in Saudi Basins, Petroleum systems and salt tectonics in Yemen and (4) Cretaceous-Eocene foreland inversions in Saudi Arabia.

Focus on the Language Classroom Springer

This title is a comprehensive and practical 20-week course in translation method offering a challenging approach to the acquisition of translation skills.
