WARNING: THIS BOOK MAY CAUSE HYSTERICAL LAUGHTER. In the hallowed literary tradition of The Darwin Awards and Headlines comes this mind-boggling collection of the most outrageous warning labels ever slapped onto perfectly good products. Before you try to dry your hair with a blowtorch or iron a shirt while you're wearing it, read this hilarious collection of crazy caveats. You'll be surprised how far frightened manufacturers (and their

lawyers) must go these days to protect themselves from frivolous lawsuits!

With over 200 indicators available to traders, it is impossible to pick the ones that will make money over and over again...until now. A two-time, best-selling author and writer of a weekly commentary at www.incometrader.com, Mark Larson is an expert trader willing to share the secrets of his favorite technical tools. To maximize the power of this guide, you'll also receive the full 90-minute DVD and access to an interactive online review tool at Traders' Library's Education Corner, including self-tests that make sure you absorb every valuable strategy. Inside this coursebook, you will learn how to: Leverage parameters to make your indicators profitable in both bear and bull markets; Combine the most powerful indicators on one chart to create a winning trading system; Optimize your entries and exits with specific indicators; Use ATR for setting stop losses; Utilize stock scans for a competitive edge. From standards like the MACD to newer tools like Time Segmented Volume and Inertia, Larson will teach you how each indicator works, how to use it effectively, and how to adopt it to your own unique trading style.

This book 'Signals and Systems' is a detailed textbook designed for undergraduate students of various branches of Engineering. The book uses a student-friendly approach to explain the fundamental concepts of Signals and Systems. It includes a large

number of solved examples with step-by-step solutions for easier understanding of the theoretical concepts. Beginning with concepts of signals, the book moves on to other topics such as convolution and correlation of signals, CTFS, DTFS, CTFT, Sampling, Laplace Transform, and Z-Transform. Further, the subject matter is presented by illustrating the concepts first through theoretical concepts along with mathematical reasoning and then through solved examples. Solving the number of multiple choice questions and numerical exercises at the end of the chapters will help students to apply the concepts learnt in the chapters.

Glamour is one of the most tantalizing and bewitching aspects of contemporary culture - but also one of the most elusive. The aura of celebrity, the style of the fashion world, the vanity of the rich and beautiful, and the publicity-driven rites of café society are all imbued with its irresistible magnetism. But what exactly is glamour? Where does it come from? How old is it? And can anyone quite capture its magic? Stephen Gundle answers all these questions and more in this first ever history of the phenomenon, from Paris in the tumultuous final decades of the eighteenth century through to Hollywood, New York, and Monte Carlo in the twentieth and twenty-first centuries, from Napoleon to Marlene Dietrich and Marilyn Monroe, from Beau Brummell to Gianni Versace. Throughout, the book captures the excitement and sex appeal of glamour while exposing its mechanisms and exploring its sleazy and sometimes tragic underside. As Gundle shows, while glamour is exciting and magnetic, its promise is ultimately an illusion that can only ever be partially fulfilled.
