Provides a symptom-driven approach to the diagnosis and treatment of major neuro-ophthalmic conditions. With the focus on the patient this book emphasizes examination and appropriate adjunctive studies including a discussion of diagnostic imaging modalities and leads the reader through the sometimes subtle manifestations of neuro-ophthalmic disease to anatomical localization of lesions and definitive diagnosis. An overview of the anatomy of visual pathways is accompanied by many illustrations.

Fundamentals and Principles of Ophthalmology 2010-2011 SLACK Incorporated

The 13-volume 2005-2006 Basic and Clinical Science Course (BCSC) is the foundation for residents and a definitive source of up-to-date clinical knowledge for practitioners. Revised annually by a faculty of leading ophthalmologists, the BCSC covers everything from basic anatomy, optics and pathology to such specialized topics as retina, glaucoma and cataract. The BCSC draws on a solid foundation of scientific research and clinical experience, and features thousands of photos and illustrations. Each section includes self-assessment study questions and answers. BCSC Sections

Basic and Clinical Science Course Complete Set 2012-2013 SLACK Incorporated

Provides the essential scientific grounding for ophthalmic practice. This work includes ocular anatomy, embryology, biochemistry, and pharmacology. It features substantive coverage of the advances in molecular genetics related to ophthalmology.

2018-2019 BASIC AND CLINICAL SCIENCE COURSE, SECTION 05 Amer Academy of Ophthalmology

The new Fourth Edition of the Massachusetts Eye and Ear Infirmary Review Manual for Ophthalmology provides a comprehensive self-assessment review and serves as a valuable study aid for any ophthalmologist or ophthalmologist-in-training. The text contains over 1,500 multiple-choice questions covering the entire field of ophthalmology, including all of its major subspecialties. Answers with explanations are provided for each question, and references are included at the end of each chapter. This edition includes more than 250 new full-color photographs and drawings depicting ocular pathology and ophthalmic conditions. All chapters have been updated with new questions to reflect the latest teaching in the field. A companion website features an interactive test bank with images. The test bank includes all 1,540 questions from the book plus over 300 unique

questions for additional self-assessment practice.

2017-2018 Basic and Clinical Science Course (BCSC): Complete Print Set American Academy of Ophthalmology

Covers the developments and controversies regarding glaucoma. This book includes numerous clinical images that illustrate both disease entities and surgical techniques. It also intends to guide the reader to further discussion of clinical trials.

Oculofacial Plastic and Orbital... Surgery

American Academy of Ophthalmology
Comprehensive and clinically focused, *Refractive Surgery, 3rd Edition*, brings you the knowledge and expertise of leading ophthalmology experts and refractive surgeons from around the world. Together they provide practical coverage of the latest advances in this fast-changing field, including improved optics and biomechanics, improved diagnostics, new surgical techniques, and more. Hundreds of high-quality photographs guide you from patient selection to mastery of surgical techniques. Offers step-by-step guidance on a wide range of common refractive procedures. Covers new topics such as management of LASIK complications; SMILE and management of SMILE complications; collagen cross-linking, including instrumentation and applications in keratoconus and ectasia; intracorneal lenses; and multifocal and accommodating IOLs. Contains a new chapter on Preoperative Evaluation of Keratoconus and Ectasia. Uses high-quality surgical video clips to demonstrate a variety of surgical techniques. Addresses initial as well as ongoing management of patients. Includes tables of indications, preferences, hot tips, and management of complications throughout, making

guidance quick and easy to access.

Elsevier Health Sciences

OphthoBook is the printed version of the amazing OphthoBook.com online book and video series. The combination of this text, along with the online video lectures, creates the most informative and easy-to-understand ophthalmology review ever written. It is geared toward medical students, optometry students, and non-ophthalmologists who want to learn more about the eye without getting bogged down with mindless detail. The book is broken down into ten chapters: 1. Eye History 2. Anatomy 3. Glaucoma 4. Retina 5. Infection 6. Neuroophthalmology 7. Pediatric Ophthalmology 8. Trauma 9. Optics 10. Lens and Cataract Each chapter also includes "pimp questions" you might be asked in a clinic. Also, an entire chapter of ophthalmology board-review questions, flashcards, and eye abbreviations. Perhaps most useful, each chapter corresponds to the 20-minute video lectures viewable at OphthoBook.com. And lots of fun cartoons!

2018-2019 BASIC AND CLINICAL SCIENCE COURSE, COMPLETE PRINT SET. Elsevier Health Sciences

This work reviews the anatomy, physiology, embryology, and pathology of the lens. Also provides an overview of lens and cataract surgery including wound construction, viscoelastics, posterior capsule opacification, and refractive considerations such as phakic IOLs and clear lens extraction. Core curriculum for residency programs and a definitive source of up-to-date clinical knowledge for practitioners. Continually updated by a faculty of leading ophthalmologists in academia and

practice, the BCSC draws on a solid foundation of scientific research and clinical experience.

Neuro-ophthalmology Elsevier Health Sciences

The popular optics review manual, Last-Minute Optics, has been revised and updated into a second edition. This unique resource boils down the overwhelming subject matter of clinical optics and refraction, helping the ophthalmologist cover the essentials in a single review manual. The content is based upon the practical experience of two clinically active experts who lecture on ophthalmic optics around the world. American Academy of Ophthalmology Presents an emerging model in which occupational therapists practice as part of a team of vision rehabilitation professionals serving adults with low vision. Occupational therapists offer a unique contribution to the vision rehabilitation team, with a focus on meaningful occupational goals, the incorporation of occupation into therapy, and the orchestration of environmental, social, and non-visual personal factors into a treatment plan. The authors have developed a practical and straightforward text outlining an evaluation approach to interventions that focus on recovering occupational performance in adults.

Retina and Vitreous Jaypee Brothers Medical Publishers

Designed to maximize easy retention and quick recall, Review of Ophthalmology, 3rd Edition, by Drs. Neil J. Friedman, Peter K. Kaiser, and William B. Trattler, is the best-selling review book you can trust to get you successfully through your exams. An efficient, easy-to-digest format distills key information into highly relevant bullet points. You'll quickly master what

you need to know in all subspecialty areas, including the latest information on today's standard diagnostic techniques, medical treatments, and surgical options. Covers the most important and relevant aspects of each topic in a concise, bulleted format for easy recall and effective exam preparation.

Highlights the text with hundreds of clinical and histological images, OCT and other current imaging methods, anatomic details, common ophthalmic test findings, and more. Presents the findings of key clinical studies with which you are expected to be familiar. Provides thoroughly revised content in every chapter, with extensive updates on new imaging standards and diagnosis and treatment for eye disorders. Test your understanding of essential information with an expanded collection of review questions following every chapter.

2018-2019 BASIC AND CLINICAL SCIENCE COURSE, SECTION 10 Lippincott Williams & Wilkins

For more than 25 years, The Wills Eye Manual has been a best-selling source of authoritative guidance on treating ocular disorders in an office, emergency room, or hospital setting. The 7th Edition introduces exciting new changes to bring this pocket-sized reference thoroughly up to date - including high-quality multimedia content - while retaining the features that have made it so useful in daily practice.

This new edition provides ophthalmologists and trainees with the latest information and advances in their field. Presented in question and answer format, the book begins with discussion on optics and refraction, followed by genetics and embryology. The next chapters cover the diagnosis and management of disorders in different parts of the eye. The third edition has been fully revised and updated, and new topics added. Authored by a recognised team of experts led by Prof Myron Yanoff from Drexel University College of Medicine, Philadelphia, the text is further enhanced by clinical photographs and illustrations. Key points Comprehensive review of latest advances in diagnosis and management of ophthalmic disorders and diseases Presented in question and answer format, fully revised third edition with new topics added Internationally recognised author and editor team Previous edition (9789350255766) published in 2012 *Basic Techniques of Ophthalmic Surgery* Don't take chances with your exam prep! Trust Review of Ophthalmology to help you study all the current information you need to know to ace your exams! Efficiently review a wide spectrum of topics with an organization by common ophthalmologic subspecialties. Maximize retention with a popular outline approach that distills key information on each topic alongside sample review questions. Review the findings of many important clinical studies with which you are expected to be familiar. Test your understanding of essential information with questions at the end of each

chapter and answers at the end of the book. Study on the go, search the complete text online, and download images at www.expertconsult.com. Be fully prepared for current exam topics with information on the latest techniques in corneal surgery, macular degeneration treatment and trials, and expanded treatment options for many sections. View anatomic details, common ophthalmic test findings, and examples of classic histopathology specimens through brand-new illustrations and photographs. Ace your exams with Trattler, Friedman and Kaiser's Review of Ophthalmology! *Expert Consult*

Keep your ophthalmic knowledge current with the Academy's 2012-2013 Basic and Clinical Science Course (BCSC). The BCSC is the most extensive compilation of ophthalmic scientific research and clinical experience, and it is continually updated by a faculty of more than 80 expert ophthalmologists. Each of the 13 sections includes up-to-date clinical knowledge, concise information and tables, self-assessment questions and answers, photos and illustrations, and opportunities for earning AMA PRA Category 1 Credits. Each BCSC section is available in the print or online format. The BCSC online sections contain the same, complete content as the print version and can be used on nearly any laptop, desktop computer or mobile tablet with an active Internet connection. Easy-to-use bookmarks and notes allow for personalized learning, and the search looks through text, images and your notes across all 13 BCSC sections. The BCSC includes: Section 1: Update on General Medicine Section 2: Fundamentals and Principles of Ophthalmology Section 3: Clinical Optics Section 4: Ophthalmic Pathology and

Intraocular Tumors Section 5: Neuro-Ophthalmology Section 6: Pediatric Ophthalmology and Strabismus Section 7: Orbit, Eyelids, and Lacrimal System Section 8: External Disease and Cornea Section 9: Intraocular Inflammation and Uveitis Section 10: Glaucoma Section 11: Lens and Cataract Section 12: Retina and Vitreous Section 13: Refractive Surgery Master Index

2019-2020 BASIC AND CLINICAL SCIENCE COURSE, SECTION 06

Extensive ocular immunology chapters feature clinical examples and new colour art that make this highly technical subject more accessible. A systematic approach to the classification, diagnosis, and management of uveitis is accompanied by numerous new clinical illustrations and up-to-date treatments and references. Extensive discussion of the ocular manifestations of AIDS includes new medications and approaches. Core curriculum for residency programs and a definitive source of up-to-date clinical knowledge for practitioners. Continually updated by a faculty of leading ophthalmologists in academia and practice, the BCSC draws on a solid foundation of scientific research and clinical experience.

External Disease and Cornea

Reviews the anatomy, physiology, embryology, and pathology of the lens. This book also provides an overview of lens and cataract surgery including wound construction, viscoelastics, posterior capsule opacification, and refractive considerations such as phakic IOLs and clear lens extraction.

Keep your ophthalmic knowledge current with the Academy's 2017-2018 Basic and Clinical Science Course (BCSC).

BCSC is the most extensive compilation of ophthalmic scientific research and clinical experience, and it is continually updated by a faculty of more than 80 expert ophthalmologists. This unparalleled, all-encompassing 13-volume set enhances your clinical knowledge with numerous images, videos and self-assessment questions. The Complete Print Set includes each of the 13 individual BCSC sections plus a Master Index. Each of the 13 sections include up-to-date clinical knowledge, concise information and tables, self-assessment questions and answers, photos and illustrations. Most sections include access to online video demonstrations of clinical and surgical techniques. The videos can be viewed by scanning the QR codes within the books. Section 5 (Neuro-Ophthalmology), Section 8 (External Disease and Cornea), and Section 13 (Refractive Surgery) have been completed revised for the 2017-2018 edition.

Basic and Clinical Science Course

Featuring many colour pathological and clinical photographs, this volume presents a logical, tissue-specific sequence from topography to disease process through general and differential diagnosis. It covers staining, specimen collection, clinicopathologic correlations, and clinical aspects of intraocular tumors, including staging.
