Conceptual Design Of Chemical Processes Process Design is the "capstone" course in the chemical engineering curriculum. It used to be divided into Equipment Design and Plant Design. With the publication of Rudd and Watson's "Process Engineering Strategy" in 1968, it was recognized that it's principles can be taught and

not "just has to be learned later" by a chemical engineer in his career. Amazon.com: Conceptual Design of Chemical Processes ... Conceptual Design of Chemical Processes. Explaining the concepts behind process design, this book uses a case study approach, guiding readers through realistic design problems, and referring back to these cases at the end of each chapter. It also uses shortcut techniques that help engineers to obtain the whole focus for a design in a very short period (generally less than two days).
