BRANDT NICHOLSON

**An Empirical Study of
EFL Writing at Primary
School** Multilingual

Matters

This book offers a
comprehensive
investigative study of the

argument realisation of
the concepts of causative
purpose, permit, let/allow
and transfer in a broad
cross-linguistic
typologically diverse mix
of languages with GIVE,
GET, TAKE, PUT, and LET
verbs. This volume stands
as the first systematic
exploration of these verbs
and concepts as they
occur in complex events

and clauses. This book
brings together scholars
and researchers from a
variety of functionally
inspired theoretical
backgrounds that have
worked on these verbs
within one language or
from a cross-linguistic
perspective. The objective
is to understand the
linguistic behaviour of the
verbs and their inter-

relationships within a contemporary cognitive-functional linguistic perspective. The languages represented include Irish, German, Slavic (West Slavic: Polish, Czech, Slovak and Sorbian and Western South Slavic: Slovenian and Bosnian/Croatian/Serbian), Germanic, Romance, Gan Chinese Yichun dialect, Māori, Bohairic Coptic, Shaowu Chinese, Hebrew, English, Lithuanian, Estonian, the Australian dialects Pitjantjatjara and Yankunytjatjara, Italian,

and Persian. Topics discussed include argument structure and the encoding of arguments under causation, permission and transferverbs, their lexical semantics and event structure.

Aspects of Multilingual

Aphasia Elsevier
Victor Dudman's revolutionary English Grammar brings grammar and logic together by conceiving grammar as 'the necessary preliminary to logic'. The focus, for logicians, is the discussion of 'conditionals'; for

grammarians it is the concise and accurate explanation of the infamous English modals. *Handbook of Natural Language Processing and Machine Translation* Cambridge University Press

Guiding learners to acquire sufficient knowledge of grammar constitutes an interesting domain in the field of teaching English as a second language. This research-based resource book focuses on the learning of English tenses and verbal categories,

which forms a huge and fascinating component of English grammar that merits attention in teachers' attempts to improve their students' English proficiency. Inspired by concepts relating to explicit learning, consciousness raising, contrastive analysis and error analysis, the author used a wealth of data derived from a set of elicitation procedures to reveal the linguistic interference encountered by second language learners. Arguing for the need to

conceptualise grammatical rules positively, this inquiry focuses on studying learners' wide-ranging responses to a large number of items designed to explore linguistic interference in the learning of English verb forms in eight major categories. The findings, explanations and illustration-based recommendations provided in this volume will give trainee teachers, instructors and researchers deeper insights into how

strategies can be aptly employed to enhance learners' performance in using English verb forms and related grammatical categories, which constitute a key dimension in the learning and teaching of English as a second language.

The Concepts of Time in Anglo-Saxon

England Routledge

This book presents a research study investigating young foreign language learners' ability to compose communicative texts in English. It reviews current

research on young learners' EFL writing, reports on the learners' EFL writing competence, describes text quality at different CEFR language levels, and discusses current teaching practices and the learners' perception of EFL writing. Effective Instruction for All Students in PreK-2 Cambridge University Press

An in-depth and meticulous study of the English-Spanish bilingual development of two siblings from their first word to age six.

The Past Tenses of the Mongolian Verb Hong Kong University Press

This volume reflects a consensus that the investigation of words in the mind offers a unique opportunity to understand both human language ability and general human cognition. It brings together key perspectives on the fundamental nature of the representation and processing of words in the mind. This thematic volume covers a wide range of views on the fundamental nature of

representation and processing of words in the mind and a range of views on the investigative techniques that are most likely to reveal that nature. It provides an overview of issues and developments in the field. It uncovers the processes of word recognition. It develops new models of lexical processing. *The Oxford Handbook of Psycholinguistics* OUP USA

Providing a distillation of knowledge in the various disciplines of arts education (dance, drama, music, literature and

poetry and visual arts), this essential handbook synthesizes existing research literature, reflects on the past, and contributes to shaping the future of the respective and integrated disciplines of arts education. While research can at times seem distant from practice, the Handbook aims to maintain connection with the live practice of art and of education, capturing the vibrancy and best thinking in the field of theory and practice. The Handbook is organized into 13

sections, each focusing on a major area or issue in arts education research. English Verbs and Tenses
BRILL
This book investigates language disorders in children who speak languages other than, or in addition to, English. The chapters in the first section of the volume focus on language disorders associated with four different syndromes in multilingual populations and contexts. This section discusses language disorders associated with autism spectrum

disorders, Down syndrome, fetal alcohol syndrome and Williams syndrome. The chapters in the second section of the book relate to language impairment in children who speak diverse languages, although the issues they address are relevant across languages and cultural contexts. The book also reviews assessment procedures and intervention approaches for diverse languages, including Bengali, Cantonese, French, Spanish, and

Turkish. The volume aims to stimulate thoughtful clinical practice and further research in language disorders in multilingual populations. Space in Tense Routledge This volume provides a broad overview of current work in aphasia in individuals who speak more than one language. With contributions from many of the leading researchers in the field, the material included, both experimental work and theoretical overviews, should prove useful to both researchers and

clinicians. The book should also appeal to a broader audience, including all who have an interest in the study of language disorders in an increasingly multicultural/multilingual world (e.g. students of speech-language pathology and linguistics). The areas of multilingual aphasia addressed in this collection include assessment and treatment, language phenomena (e.g. code-switching), particular language pairs (including a bidialectal study), and

the role of cultural context. *Multilingual Perspectives on Child Language Disorders* John Benjamins Publishing Company The Routledge Handbook of Second Language Acquisition brings together fifty leading international figures in the field to produce a state-of-the-art overview of Second Language Acquisition. The Handbook covers a wide range of topics related to Second Language Acquisition: language in context, linguistic,

psycholinguistic, and neurolinguistic theories and perspectives, skill learning, individual differences, L2 learning settings, and language assessment. All chapters introduce the reader to the topic, outline the core issues, then explore the pedagogical application of research in the area and possible future development. The Routledge Handbook of Second Language Acquisition is an essential resource for all those studying and researching Second Language

Acquisition.
Acquired Language Disorders in Adulthood and Childhood Corwin Press
 An examination of the language and style of the work to demonstrate Smith's engagement with the challenges which history and actuality offer to his beliefs in the natural system of liberty.
The Mental Lexicon
 Multilingual Matters
 English in Singapore provides an up-to-date, detailed and comprehensive investigation into the

various issues surrounding the sociolinguistics of English in Singapore. Rather than attempting to cover the usual topics in an overview of a variety of English in a particular country, the essays in this volume are important for identifying some of the most significant issues pertaining to the state and status of English in Singapore in modern times, and for doing so in a treatment that involves a critical evaluation of work in the field and new and thought-provoking

angles for reviewing such issues in the context of Singapore in the twenty-first century. The contributions address the historical trajectory of English (past, present and possible future), its position in relation to language policy and multiculturalism, the relationship between the standard and colloquial varieties, and how English can and should be taught. This book is thus essential reading for scholars and students concerned with how the dynamics of the English language are

played out and managed in a modern society such as Singapore. It will also interest readers who have a more general interest in Asian studies, the sociology of language, and World Englishes.

From Cædmon to Milton BRILL

The book examines the diachronic change of time perception throughout Anglo-Saxon England, with the conversion as a turning point. It draws evidence from a variety of sources, in particular from a close reading of Bede's historical writings and his

treatises on time, from Old English poetry, especially *The Dream of the Rood*, *The Phoenix*, *The Wanderer*, *Beowulf*, *The Ruin*, *Deor*, from the literature of the Alfredian period, and from the lexical and statistical analysis of Old English time words. It offers insights into the complexity of time in the Anglo-Saxon context, and shows how the change of time can help to understand the conceptual system of the Anglo-Saxons.

Multicultural Language

Education English Grammar for the Utterly Confused
This volume comprises refereed papers and abstracts of the 8th International Conference on the Evolution of Language (EVOLANG8), held in Utrecht on 14-17 April 2010. As the leading international conference in the field, the biennial EVOLANG meeting is characterized by an invigorating, multidisciplinary approach to the origins and evolution of human language, and brings

together researchers from many subject areas, including anthropology, archaeology, biology, cognitive science, computer science, genetics, linguistics, neuroscience, palaeontology, primatology and psychology. The latest theoretical, experimental and modelling research on language evolution is presented in this collection, including contributions from many leading scientists in the field.

A One-Stop Source for

Every Writing Assignment Psychology Press

The study of genre is scattered across research disciplines. This volume offers an integrative perspective starting from the assumption that genres are cognitive constructs, recognized, maintained and employed by members of a given discourse community. Its central questions are: What does genre knowledge consist of? How is it organized in cognition? How is it applied in discourse

production and interpretation? How is it reflected in language use?

The Language of Early English Literature

Cambridge University Press

This book details a new and comprehensive account of the meanings and uses of the four past tense endings of Modern Mongolian, in both the spoken and written languages.

Time in Languages, Languages in Time

World Scientific

The Routledge Handbook of World Englishes

constitutes a comprehensive introduction to the study of World Englishes drawing on the expertise of leading authors within the field. The Handbook is structured in nine sections covering historical perspectives, core issues and topics and new debates which together provide a thorough overview of the field taking into account the new directions in which the discipline is heading. Among the key themes covered are the development of English as

a lingua franca among speakers for whom English is a common but not first language, the parallel development of English as a medium of instruction in educational institutions throughout the world and the role of English as the international language of scholarship and scholarly publishing, as well as the development of 'computer-mediated' Englishes, including 'cyberprose'. The Handbook also includes a substantial introduction and conclusion from the

editor. The Routledge Handbook of World Englishes is the ideal resource for postgraduate students of applied linguistics as well as those in related degrees such as applied English language and TESOL/TEFL.

DARPA Global Autonomous Language

Exploitation Walter de Gruyter GmbH & Co KG An essential guide to Russian syntax, which examines major syntactic structures and grammatical puzzles of the language.
