DAISY BLANKENSHIP

International Affairs Westview Press
R.T. Naylor demonstrates that economic warfare fails almost everywhere it is attempted, and that even when it succeeds, it has consequences that are not only unintended, but also frequently the precise opposite of their advertised result.

A Concise History Of The Middle East Academic Resources Corp
First published in 1979, this college-level introductory text ranges chronologically

from the beginnings of Islam to the present. Extensive revisions reflect new scholarship and the most recent events in the Middle East including the aftermath of the Gulf War and issues surrounding the "Palestinian Question." Annotation copyright by Book News, Inc., Portland, OR

La historia oculta de la creación del estado de Israel Routledge

Using declassified documents from Israeli archives, Alisa Rubin Peled explores the development, implementation, and reform of the state's Islamic policy from 1948 to 2000. She addresses how Muslim communal

institutions developed and whether Israel formulated a distinct "Islamic policy" toward shari'a courts, waqf (charitable endowments), holy places, and religious education. Her analysis reveals the contradictions and nuances of a policy driven by a wide range of motives and implemented by a diverse group of government authorities, illustrating how Israeli policies produced a co-opted religious establishment lacking popular support and paved the way for a daring challenge by a grassroots Islamist Movement since the 1980s. As part of a wider debate on early Israeli history, she challenges the idea that Israeli policy was part of a greater monolithic policy toward the Arab minority.

MQUP

Internet technology has arguably changed the rules by which individuals, social movements, and institutions compete for political and cultural influence in technologically advanced societies. The author considers this reality through reference to the concept of hegemony; looking to the ways in which diverse actors in American civil society compete with one another while simultaneously challenging dominant sources of authority. The Arab/Israeli conflict is drawn upon as a boundary object holding direct interest to a wide range of state-aligned lobbies, broadly-based social movements, and marginalized 'extremist' groups, each of which hopes to affect the course of U.S. Mid-East policy. While various

dimensions of internet use and activism are explored, Stephen Marmura directs particular attention to the importance and limitations of the World Wide Web as a mass medium. Examining phenomena ranging from mainstream news dissemination to the propaganda warfare visible online amongst racist, religious fundamentalist, and ultra-nationalist organizations, he argues the Net's greatest advantages are ultimately accrued by those most vested in the political status quo. Marmura argues further that widespread use of the Web is likely contributing to processes of social fragmentation, even as it reinforces ideological discourses favorable to state power.

Quest Lynne Rienner Publishers
Politics & government.

Partitioning Palestine Cambridge University Press

The Palestinian diaspora currently comprises roughly five and a half million people. Dollar, Dove, and Eagle, based on historical and ethnographic research in Honduras, Israel, and the West Bank, is the first full-length description of Palestinian immigration to Latin America. *The Palestine Question in Maps, 1878-2002* State University of New York Press

Arab perspective of the history of the struggle for Palestine.

A History of Modern Palestine University of Chicago Press

Recognized as the most objective, best-selling terrorism text in the market, **TERRORISM: AN INTRODUCTION- 9/11 UPDATE** strives to discuss the most

sophisticated theories by the best terrorist analysts in the world, while still focusing on the domestic and international threat of terrorism and the basic security issues surrounding terrorism today. The student-oriented writing style is complemented by rich pedagogy, and there is an adequate amount of research and theoretical discussion to make this an ideal text for both the undergraduate and graduate level courses.

Patriots and Profiteers Pluto Press (UK)
A history of Palestine and Jewish-Arab relations in the twentieth century.

Bitter Harvest Columbia University Press

This book tracks the long years of Palestinian history from the fateful Balfour Declaration of 1917 through the

times of loss, dispossession and occupation, and on to the triumphs and tragedies of the historic uprising that began in 1987, right up to the 1990 Gulf crisis.

Bitter Harvest Indiana University Press
In a savage critique, R.T. Naylor investigates the American government's understanding of and response to 9/11, exposing the official story - and the resulting global War on Islamic Terror - as based on myth and misinformation. *Satanic Purses* examines how misguided notions about the structure and financing of terrorist groups have diverted attention from more useful measures, and perpetuated the "War on Terror."

The Hidden History of the Balfour Declaration Bloomsbury Publishing

Contributors examine how the Nakba has shaped the personal and collective memory of Palestinians and how that memory impels their claims for justice. The Makkah Massacre and Future of the Haramain Cambridge University Press Law lies at the heart of the Palestinian-Israeli conflict Israel's creation was rooted in the need for a Jewish homeland, as enshrined in 'public law'. Palestinian rights to return to their homes and livelihoods are also established in law. John Strawson argues that legal tools are being used to undermine Palestinian self-determination. His chronological account of modern Palestinian history shows that the League of Nations and the United Nations are responsible for developing a legal framework which marginalises the

Palestinian people. The book focuses on three key moments in the conflict: the League of Nations Mandate, the United Nations partition plan and the Oslo agreements. None of these documents are neutral but rather encode a variety of meanings. The book traces the way in which these legal narratives have shaped national identity. Law, far from offering conflict resolution, has reinforced the trenches from which Palestinians and Israelis confront each other.

Bitter Harvest OR Books

This unique resource offers the fascinating account of Donald E. Wagner's personal experience with the Middle East and calls Western Christians to work with Middle East Christians in healing the pain of Jews and

Palestinians. Wagner grippingly tells of his early involvement with streams of Christianity that treat Israel's possession of the Holy Land as fulfillment of a divine plan that will result in the apocalyptic battle of Armageddon.

Dollar, Dove, and Eagle Interlink Publishing Group

On the open landscape of Israel and the West Bank, where pine and cypress forests grow alongside olive groves, tree planting has become symbolic of conflicting claims to the land.

Palestinians cultivate olive groves as a vital agricultural resource, while the Israeli government has made restoration of mixed-growth forests a national priority. Although both sides plant for a variety of purposes, both have used tree planting to assert their presence

on—and claim to—disputed land. Shaul Ephraim Cohen has conducted an unprecedented study of planting in the region and the control of land it signifies. In *The Politics of Planting*, he provides historical background and examines both the politics behind Israel's afforestation policy its consequences. Focusing on the open land surrounding Jerusalem and four Palestinian villages outside the city, this study offers a new perspective on the conflict over land use in a region where planting has become a political tool. For the valuable data it presents—collected from field work, previously unpublished documents, and interviews—and the insight it provides into this political struggle, this will be an important book for anyone studying the Israeli-Palestinian conflict.

The Palestinians Indiana University Press
The war of 1948 in Palestine is a conflict whose history has been written primarily from the national point of view. This book asks what happens when narratives of war arise out of personal stories of those who were involved, stories that are still unfolding. Efrat Ben-Ze'ev examines the memories of those who participated and were affected by the events of 1948, and how these events have been mythologized over time. This is a three-way conversation between Palestinian villagers, Jewish-Israeli veterans, and British policemen who were stationed in Palestine on the eve of the war. Each has his or her story to tell. These small-scale truths shed new light on the Palestinian-Israeli conflict, as it was then and as it has

become.

The Unmaking of the Middle East
University of Michigan Press
Cutting through assumptions about Britain's support for a "national home for the Jewish people" in the creation of British Palestine, Carly Beckerman explores why and how elite political battles in London inadvertently laid the foundations for the establishment of the State of Israel. Drawing on foreign policy analysis and previously unused archival sources, *Unexpected State* considers the strategic interests, the high-stakes international diplomacy, and the tangle of political maneuvering in Westminster that determined the future of Palestine. Contrary to established literature, Beckerman argues that British policy toward the territory was dominated by

seemingly unrelated domestic and international political battles that left little room for considerations of Zionist or Palestinian interests and arguments. Beckerman instead shows how the policy process was aimed at resolving issues such as coalition feuds, party leadership battles, spending cuts, and riots in India. Considering detailed analysis of four major policy-making episodes between 1920 and 1948, *Unexpected State* interrogates key Israeli and Palestinian narratives and provides fresh insight into the motives and decisions behind policies that would have global implications for decades to come. [Mandated Landscape](#) Wadsworth Publishing Company
 "Mark Tessler's highly praised, comprehensive, and balanced history of

the Israeli-Palestinian conflict from the earliest times to the present - updated to the first decade of the twenty-first century - provides a constructive framework for understanding recent developments and assessing the prospects for future peace. New chapters elucidate the Oslo peace process, including the reasons for its failure, and the political dynamics in Israel, the West Bank, and Gaza at a critical time of transition."--Jacket.
Bitter Harvest; Palestine Between 1914-1967 Terrace Books
 Contained on a single page, the Balfour Declaration was sent by Arthur Balfour, the British Foreign Secretary, to Lord Rothschild, a leader of the British Jewish community, in November 1917. It read, in part, "His Majesty's Government view

with favour the establishment in Palestine of a national home for the Jewish people.” This brief missive was to be critical in determining the history of the Middle East, from the creation of the state of Israel in 1948 to the present day. And yet, despite its importance, the true origins of the Declaration remain obscure. The Declaration, Sahar Huneidi observes, was a work of carefully crafted ambiguity. It was this deliberate openness that allowed the British government, years later, to reshape its meaning, and even the history of its drafting, to support specific foreign policy ends. This process, Huneidi argues, was facilitated by a subsequent document: a little-known, handwritten memo by the Under-Secretary of the Colonial Office, William Ormsby-Gore,

recounting from memory discussions surrounding the Declaration’s drafting. Employing careful detective work and a rich knowledge of the subject matter, Huneidi reveals how, faced with a paucity of official records, Ormsby-Gore’s account became the basis for a decision on Palestine that had devastating consequences for the stability of the region. This concise, eloquent book provides a vivid case study of the rewriting and repurposing of history, and compellingly recontextualizes the ongoing struggles of Israel–Palestine. Sahar Huneidi has a BA in Political Science from the American University of Beirut, and a Ph.D. from the University of Manchester, where her thesis formed the basis of her subsequent published work on Herbert

Samuel. She has contributed numerous articles to academic journals and has edited studies on Israel/Palestine. She has also received diploma certificates in art history from Christie's Education. She is the director of East & West Publishing and lives mainly in London.

Remembering Palestine in 1948

Westview Press

Colonialism has three foundational concerns - violence, territory, and population control - all of which rest on racist discourse and practice. Placing the Zionist project in Israel/Palestine within the context of settler colonialism reveals strategies and goals behind the region's rules of governance that have included violence, repressive state laws and racialized forms of surveillance. In Israel's Colonial Project in Palestine:

Brutal Pursuit, Elia Zureik revisits and reworks fundamental ideas that informed his first work on colonialism and Palestine three decades ago. Focusing on the means of control that are at the centre of Israel's actions toward Palestine, this book applies Michel Foucault's work on biopolitics to colonialism and to the situation in Israel/Palestine in particular. It reveals how racism plays a central role in colonialism and biopolitics, and how surveillance, in all its forms, becomes the indispensable tool of governance. It goes on to analyse territoriality in light of biopolitics, with the dispossession of indigenous people and population transfer advancing the state's agenda and justified as in the interests of national security. The book incorporates

sociological, historical and postcolonial studies into an informed and original examination of the Zionist project in Palestine, from the establishment of Israel through to the actions and decisions of the present-day Israeli government. Providing new perspectives on settler colonialism informed by

Foucault's theory, and with particular focus on the role played by state surveillance in controlling the Palestinian population, this book is a valuable resource for students and scholars interested in the Arab-Israeli Conflict and Colonialism.
