Nutrition and Wellness for Life stresses the importance of healthful eating and physical activity across the life span. The text explores how decisions affect wellness at various stages of life. Your students will learn the body's need for various nutrients may be greater at some stages of the life cycle. Nutrition and Wellness for Life includes strategies for staying physically active and for meeting the special needs of the competitive athlete. The nutrition link to social and mental health is explained. Students will learn how to recognize sources of stress and reduce its negative impact on total wellness. The text also explains how to handle food safely, plan nourishing meals, and make healthy food choices when eating out. This bundle includes a copy of the Student Text and an Online Text (6-Year Classroom Subscription). Students can instantly access the Online Text with browser-based devices, including iPads, netbooks, PCs, and Mac computers. With G-W Online Textbooks, students easily navigate linked table of contents, search specific topics, quickly jump to specific pages, enlarge for full-screen reading mode, and print selected pages for offline reading.

24 Dimensions of Wellness for Adolescents Human Kinetics
Social and Health Services are at the core of the debate in Europe. On the one hand the topic tackles one of the vital points of the claimed European social Model. On the other hand, politics around these services are very much about their liberalisation

and managerialisation. The 21 contributions that are gathered in this volume take up on this topic and show the complexity of the topic. And it is only by spanning from the fundamental questions around human and social rights to the concrete analysis of service provision and use of services. The contributors to this volume span across different fields of expertise and come as well from different national and regional backgrounds. This opens the way of communicating common grounds but as well the way of engaged discussions that are concerned with the actual meaning of general positions when it comes to societal and social practice. This reflects very much Guy B ckman's research that includes many areas of health-, social- and welfare policy. The Festschrift "Health, Wellness and Social Policy" had been compiled in his honor. The authors want to recognize the important contribution Guy B ckman made over the years; and they want it by fostering the further debates in this area.

Heal your body and discover your deepest purpose with this transformative guide to integrating wellness and restorative solutions into your everyday life. Everyone comes into this world with the ability to be a visionary, access Divine wisdom, and follow their internal guidance system. The challenge is accessing and utilizing the inner compass we all have. In *The Secret of Life Wellness*, Inna Segal goes beyond physical healing to demonstrate that life wellness reflects health wellness. By answering twenty-one of life's biggest questions, Segal guides you through every stage of your personal well-being and invites us all to look within to find answers. From losing weight to raising confident children and dealing with loss, Segal covers the full spectrum of human challenges. With simple wisdom and easy and impactful exercises that can be integrated into one's day-to-day life, Segal clears away the complexity to offer "must have tools" for healing, transformation, and evolution. Discover life-changing secrets to enable you to:

- Develop your intuition
- Dramatically improve your health
- Create harmony in your relationships
- Discover your soul's purpose
- Attract money and success into your life
- Embrace your shadow side
- Deal with challenging emotions
- Use your energy centers to heal and evolve
- Attract

and understand soul mates • Experience unconditional love and much more... Plus, Microsoft tags throughout the book give you the option of listening to Segal guide you first hand through powerful healing techniques.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented

blueprint for the future of nursing.

Experienced educators share their best, classroom-tested ideas in this teacher-friendly, activity-based resource. The grade 5 book is divided into four units: Human Organ Systems Forces Acting on Structures and Mechanisms Properties of and Changes in Matter Conservation of Energy and Resources STAND-OUT COMPONENTS custom-written for the Ontario curriculum uses an inquiry-based scientific and technological approach builds understanding of Indigenous knowledge and perspectives TIME-SAVING, COST-EFFECTIVE FEATURES includes resources for both teachers and students a four-part instructional process: activate, action, consolidate and debrief, enhance an emphasis on technology, sustainability, and personalized learning a fully developed assessment plan for assessment for, as, and of learning a focus on real-life technological problem solving learning centres that focus on multiple intelligences and universal design for learning (UDL) land-based learning activities and Makerspace centres access to digital image banks and digital reproducibles (Find download instructions in the Appendix of the book.)

Glencoe Health, Student Activity Workbook W. W. Norton & Company

“Describes a larger medicine . . . rooted in the natural world and our own internal resources. This is the next step in the evolution of health care.”—Dr. Andrew Weil, #1 New York Times bestselling author For nearly a decade, award-winning radiation oncologist Dr. Matt Mumber and yoga instructor Heather Reed have led retreats for people facing health challenges of all kinds. Through their eight-week Sustainable Wellness program, participants have found that using simple tools consistently creates remarkable health benefits. Whether you’re looking for improved physical health, better ways to manage stress, or just a greater sense of inner peace and wellness, Sustainable Wellness offers a simple but powerfully effective plan for transformation. You will learn how to: Empower yourself to reclaim your health and play a more active role in shaping it. Become aware of the daily choices that affect your health and how you can transform them in a positive way. Let go of destructive habits and embrace new ones that enhance wellness. Sustainable Wellness combines modern scientific research with ancient methods that benefit the

individual on all levels. The authors share tested techniques, personal stories of triumph, and daily exercises that will guide you on the path to sustainable wellness. “Offers a refreshingly mature and practical synthesis of wisdom from the field of integrative healthcare . . . proven pathways to living with greater mindfulness and satisfaction.”—William Collinge, PhD, author of *Partners in Healing* “A powerful, inspiring approach to creating sustainable body/mind/spirit health and wellbeing.”—Jeremy Geffen, MD, FACP, author of *The Journey Through Cancer*

The Magic Loop, How to Use Your Words to Heal Yourself!
McGraw-Hill Education

Since 1900, the nation has witnessed unprecedented improvement in the health of its people thanks, in large part, to the public health movement that works to prevent disease and its spread, and to promote mental, physical and emotional well-being. As a result of a century of public health initiatives, such as vaccinations, improved nutrition and sanitation, and new treatments to combat acute illnesses, millions of people have led longer, healthier lives. As a result, the emphasis of the nation's work in public health has shifted from a focus solely on acute illnesses to a more balanced approach that has added attention to chronic medical conditions and the factors that cause them. The perception of disability—a condition of the body, mind, or senses of a person of any age that may affect the ability to work, learn or participate in community life—also is in transition. With the recognition that disability is not an illness, the emphasis increasingly is on continuity of care and the relationship between a person with a disability and the environment at the physical, emotional and environmental levels. This approach is based on the knowledge that good health means the same thing for everyone, and that the best possible health status and quality of years of life should be a goal for everyone, whether experiencing a disability or not. Today, 54 million Americans—more than one fifth of us—are living with at least one disability. Some individuals are born with a disability; others acquire disabilities over the course of their lifetime. At any time, each of us is at risk for acquiring a disability, whether through an illness, an injury, genetics, or any number of other causes. This Call to Action to Improve the Health and Wellness of Persons with Disabilities is built on the need to promote accessible, comprehensive health care that enables persons with disabilities to have a full life in the

community with integrated services, consistent with the President's New Freedom Initiative. Persons with disabilities must have accessible, available and appropriate health care and wellness promotion services. They need to know how to—and to be able to—protect, preserve and improve their health in the same ways as everyone else. This Call to Action encourages health care providers to see and treat the whole person, not just the disability; educators to teach about disability; a public to see an individual's abilities, not just his or her disability; and a community to ensure accessible health care and wellness services for persons with disabilities. This volume provides a roadmap for change. It delineates the challenges and strategies to address this critical public health concern. Because it is based on input not only from health specialists in the disability field, but also from individuals with disabilities and their family members, this Call to Action presents not just a scientific perspective on disability, but also the reality experienced by those living daily with disabilities. This Call to Action can, and must, resonate with community leaders in both the public and private sectors (including employers and the media) and with policymakers who craft or influence the creation of community programs. The principle and goals of this document can both incentivize and yield dividends for employers of persons with disabilities, including greater productivity and lower overall health costs by preventing illnesses and injuries secondary to a disability. Advocates for persons with disabilities can use this Call to Action to promote the involvement of individuals with disabilities as equal partners in all aspects of American life. With concerted action—undertaken through public-private partnerships spanning all levels of government and all service, education and research systems—the full potential of legal, health policy and health program initiatives to improve access to health and wellness services by persons with disabilities can be realized.

Tapping Into Wellness Portage & Main Press

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach

focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Health Education Ideas and Activities Jones & Bartlett Learning

Attachment theory is a concept well known to 'mainstream' psychologists, informing the literature in areas as diverse as psychodynamics, developmental psychology, social psychology and counselling. This important new book is the first to demonstrate the relevance of attachment theory to the psychology of sport, exercise and wellness, opening up important new avenues for research and professional practice. In this book, author Sam Carr explains that attachment theory can help us to better understand well established themes and processes in sport and exercise, including motivation, social relationships, cognitive models of coping, and group processes. By introducing the core elements of attachment theory and mapping out those areas in which it can inform the knowledge and practice of psychologists working in sport, exercise and wellness, this book represents an innovative and important contribution to the psychological literature.

Essays in Honour of Guy Bäckman Charisma Media Health & Wellness

The Secret of Life Wellness Simon and Schuster

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part

of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Sustainable Wellness Kendall Hunt

A psycho-educational model for assessing individuals and families. In *Family Wellness Skills*, Joseph Hernandez, a longtime Family Wellness trainer and practitioner, shares the foundational concepts of the Family Wellness model to make it accessible to an even broader audience. In it, he provides mental health professionals with a map to guide their clients from recognizing a need for change, to deciding to make a change, to achieving change itself. Hernandez lays out the core ideas behind Family Wellness—chief among them, balancing individuality with connection; fostering skills for interpersonal health (speaking, listening, and cooperating); and developing and maintaining patterns that work for families (mutual respect, parents in charge, interdependence, and expecting change). He shows all helping professionals how to develop effective treatment plans and practical interventions that take into account a family's inherent assets. *Family Wellness Skills* provides a complete, handy guide to the key points of this successful treatment model, so any mental health professional can help families discover and develop their gifts and abilities, making for stronger, healthier relationships.

Health Strategic Book Publishing

Fitness for Life is a comprehensive fitness education program that helps students take responsibility for their own activity, fitness, and health. Through *Fitness for Life*, students are prepared to be

physically active and healthy throughout their adult lives. This evidence-based and standards-based program follows a pedagogically sound scope and sequence to enhance student learning and progress. What's new in the Sixth Edition New to this book are three chapters (Strategies for Active Living, The Science of Active Living, and Lifelong Activity) that will help students transition from being active in school to sustaining the skills and motivation to remain active and fit for their lifetime. These chapters reinforce the Stairway to Lifetime Fitness concept, created by author Chuck Corbin, to serve as a guide for physical education standards nationwide. Some specifics include the following: · The New Physical Activity Pyramid for teens · Photos and art to illustrate concepts and engage students · Video that illustrates self-assessments and exercises · Information about the sciences on which physical education and fitness education are based · Information on scientific analysis of human movement using biomechanical principles · Information on simplified scientific method for use in decision making · Web icons and content · Technology features encouraging application as well as understanding · Science in Action feature that provides in-depth coverage of fitness, health, and wellness innovations · Exercise photos with art illustrating the muscles used · Taking Action feature that applies concepts and principles in physical activity · Planning activities for all activities in the Physical Activity Pyramid In addition, the authors went through an exhaustive process in revising and updating all the chapters to reflect current research and the new national physical education standards and fitness education standards. The entire book has been reorganized and completely rewritten. Award-Winning Text, Evidence-Based Approach The evidence-based *Fitness for Life* text earned a Texty Award for excellence from the Text and Academic Authors Association. It is based on scientific evidence and meets national and state physical education standards and national health and physical education guidelines. Materials have been field tested and used throughout the United States and the world. This comprehensive, interactive new resource will help students in the following ways: · Meet the national, state, and local grade-level standards and outcomes developed for K-12 physical education by SHAPE America based on the new standards outlined in Healthy People 2020 and published in 2014. · Learn the values and benefits of lifelong physical activity through the HELP

philosophy, which specifies the goal of promoting health for everyone with an emphasis on lifetime activity designed to meet personal needs. · Become informed consumers on matters related to lifelong physical activity and fitness. · Learn self-management skills that lead to adopting healthy lifestyles. · Recognize and overcome the barriers to reaching activity and fitness goals. · Use technology to promote healthy living. · Separate fitness facts from fiction. · Take personal responsibility for program planning and setting individualized goals. This best-selling text, written by internationally renowned authors and educators Charles B. Corbin and Guy C. Le Masurier and contributing author and educator Karen McConnell, is suited for use in a general physical education or personal fitness class. It will help students meet national and state physical education standards—not only those focused on health-related fitness and physical activity but also those related to movement skills and concepts, diversity, and social responsibility. Fitness for Life can be modified to fit any schedule, including block and accelerated block. It can be taught as semester-long, yearlong, or multiyear courses. The HELP philosophy on which the book is based (health for everyone with an emphasis on lifetime activity designed to meet personal needs) teaches the value of lifelong physical activity as well as the idea that physical activity can and should be fun. The authors use the Stairway to Lifetime Fitness concept to show the importance of learning decision-making and problem-solving skills that enable students to develop their own health-related fitness programs and maintain a physically active lifestyle into adulthood. Special Features in Every Chapter Every chapter of Fitness for Life, Sixth Edition, includes self-assessments for the students to perform—including Fitnessgram assessments—and lessons on self-management skills such as reducing risk factors, resolving conflicts, setting goals, managing time, and overcoming barriers to success. The book devotes multiple lessons to personal program planning, implementation, and evaluation. The chapters have a series of prominent features: · Lesson objectives direct student learning. · Lesson vocabulary helps students understand multiple uses of words (definitions in glossary and online). · New art includes a version of the physical activity pyramid for teens. · New photos and design give the chapters a refreshing student-friendly look with its dynamic four-color design. · Muscle art identifies the muscles used in each exercise. · Fit Facts give quick

information about relevant topics. · Quotes from famous people reveal their thoughts on fitness, health, and wellness. · Fitness Technology offers opportunities for students to use or study technology. · Science in Action provides in-depth coverage of innovations in fitness, health, and wellness. · Self-Assessment allows students to evaluate their fitness, health, and wellness as the first step in personal planning for improvement. All of the self-assessments in Fitnessgram are included. · Taking Charge and Self-Management allow students to learn self-management skills for adopting healthy behaviors and interacting with other students to solve problems encountered by hypothetical teens. · Taking Action features activities that are supported by the lesson plans. · Consumer Corner is a once-per-unit feature that helps students become good consumers of information on fitness, health, and wellness as they learn how to separate fact from fiction. Digital and Web-Based Resources Fitness for Life offers students and teachers an array of supporting materials at www.FitnessForLife.org. In addition, Fitness for Life, Sixth Edition, is available in digital as well as print formats. Students and teachers can use e-books in a variety of platforms, in combination with the student and teacher web resources, to interact with the material. In addition, iBooks are available for students and teachers in an interactive iPad version. For students, web resources include the following: · Video clips that demonstrate the self-assessments in each chapter · Video clips that demonstrate the exercise in selected chapters · Worksheets (without answers) · Review questions from the text presented in an interactive format so students can check their level of understanding · Vocabulary flip cards and other essential interactive elements from the iBook edition · Expanded discussions of topics marked by web icons in the text Teacher web resources include the following: · An introduction that describes the body of knowledge and pedagogical foundations behind Fitness for Life as well as the evidence supporting its effectiveness · Daily lesson plans, including five lessons per chapter (two classroom plans and three activity plans) · Worksheets (with answers) · Premade chapter and unit quizzes with answers · Activity cards and task cards · Presentation package of slides with the key points for each lesson · A test bank that teachers can use to make their own quizzes if they prefer

Hearing Before a Subcommittee of the Committee on

Appropriations, United States Senate, One Hundred Fifth Congress, Second Session, Special Hearing Human Kinetics

Fitness for Life Canada: Preparing Teens for Healthy, Active Lifestyles is the only health and fitness education program backed by research and focused on shifting teens from dependence to independence when it comes to lifelong healthy lifestyles. Through Fitness for Life Canada, students are engaged in the process of personal program planning for a variety of health behaviours including physical activity, fitness, and health eating. This evidence-based and standards-based program follows a pedagogically sound scope and sequence to enhance student learning and progress and presents the science of healthy living at age-appropriate levels. Research clearly demonstrates that active and healthy adults use a variety of self-management skills to maintain their positive behaviours. Fitness for Life Canada helps students develop numerous self-management skills—such as self-assessment, self-monitoring, goal setting, finding social support, overcoming barriers, and managing time—to prepare them to independently engage in healthy lifestyles. Students also learn to engage in community physical activity opportunities, with national sport and health organizations, and with technology that supports healthy lifestyles. Through Fitness for Life Canada, students explore these aspects: The foundations of active and healthy living, including adopting healthy lifestyles and self-management skills and setting goals and planning personal programs Learning the basics for lifelong activity and health, including engaging in smart and safe physical activity, knowing how much activity is enough, and understanding healthy eating Beginning activity and building fitness, including participating in moderate- and vigorous-intensity physical activity and developing cardiorespiratory endurance Building muscle fitness and flexibility, including understanding muscle fitness applications and ergogenic aids Maintaining a healthy lifestyle, including achieving a healthy body composition, choosing nutritious foods, and making good consumer choices Creating positive and healthy experiences, including managing stress, developing lifelong leadership skills, understanding reproductive and sexual wellness, and making wise choices regarding alcohol, drugs, and tobacco Fitness for Life Canada has extensive teacher resources with more than 100 lesson plans (classroom and activity based) that provide teachers with numerous options for student assessment

and opportunities to demonstrate evidence of student learning (e.g., quizzes, tests, worksheets, student demonstrations, student projects). Teachers can integrate the program with existing curricula or deliver it as a stand-alone program. They can also apply our Fitness Club approach to deliver fitness education to large numbers of students using multiple activity areas. Teacher Ancillaries are available free with the adoption and purchase of a class set of the student text. Special Features in Chapters and Units Every chapter in the student text features two classroom lessons, one feature that engages students with prominent Canadian sport organizations and health organizations, and a chapter review. The book devotes multiple lessons to personal program planning, implementation, and evaluation. Go to Sample Content to view sample page layouts that show these special features. Each unit offers a Consumer Corner feature. The teacher web resources feature the same chapter content as the student text plus three physical activity lessons per chapter that help students apply what they've learned from the classroom lessons. In addition, the chapters have a series of other prominent features: Lesson objectives direct student learning. Lesson vocabulary helps students understand multiple uses of words (definitions in glossary and online). Art includes a version of the physical activity pyramid for teens. Photos and design give the chapters a refreshing student-friendly look with its dynamic four-color design. Muscle art identifies the muscles used in each exercise. Fit Facts give quick information about relevant topics. Quotes from famous people reveal their thoughts on fitness, health, and wellness. Fitness Technology offers opportunities for students to use and study technology. Science in Action provides in-depth coverage of innovations in fitness, health, and wellness. Self-Assessment allows students to evaluate their fitness, health, and wellness as the first step in personal planning for improvement. Taking Charge and Self-Management allow students to learn self-management skills for adopting healthy behaviors and interacting with other students to solve problems encountered by hypothetical teens. Taking Action features activities that are supported by the lesson plans. Consumer Corner helps students become good consumers of information on fitness, health, and wellness as they learn how to separate fact from fiction. Web-Based Resources Fitness for Life Canada provides physical educators with numerous delivery and

assessment options in health and physical education. Specifically, the program has more than 100 detailed activity- and classroom-based lesson plans that can be delivered out of the box for beginner teachers and are modifiable for experienced teachers. The lesson plans are supported with assessment and teaching materials such as worksheets, activity cards, PowerPoint slides, quizzes, chapter and unit tests, an online test bank, portfolios (including digital), demonstrations (live, video, and pictures), journals and reflections (written and video), class presentations and video presentations, and supplemental project ideas. For students, web resources are included with each student text and feature the following: Video clips that demonstrate the self-assessments in each chapter Video clips that demonstrate the exercise in selected chapters Worksheets without answers Review questions from the text presented in an interactive format so students can check their level of understanding Expanded discussions of topics marked by web icons in the text Vocabulary terms with definitions Teacher web resources are available free with any class set purchase and include the following: An introduction that describes the body of knowledge and pedagogical foundations behind Fitness for Life Canada as well as the evidence supporting its effectiveness Daily lesson plans, including five lessons per chapter: two classroom plans and three activity plans Worksheets with answers Premade chapter and unit quizzes with answers Activity cards and task cards Presentation package of slides with the key points for each lesson A test bank that teachers can use to make their own quizzes if they prefer Summary Fitness for Life Canada develops higher-order physical literacy knowledge and skills that help students become active and healthy adults. Fitness for Life Canada focuses on developing students' knowledge of health and health-related fitness concepts, training principles, and personal physical activity and fitness program planning. That knowledge is combined with numerous self-management skills that are critical for maintaining physical activity, healthy eating, and general health behaviours. In short, Fitness for Life Canada enhances engagement, learning, and assessment while paving the way to a healthy lifestyle throughout the life span.

Essential Words for Middle-Grade Students, Grades 4 - 8 Springer

Synopsis: If you want to get well...really well, then you need this book! It is a quick, easy 'read' because it goes directly to the point and sticks to it! Your body is governed by your brain, and your brain is largely controlled by your mind. This book explains, illustrates and teaches a unique method of using imagination, analytical thought, logical phrasing, speech, and reflected sound to create a powerful self-healing technique, which Cage refers to as The Magic Loop. Cage uses widely accepted and well-known physical laws to illustrate the underlying truths behind the technique. You will understand how and why this works by understanding the workings of familiar, physical objects and the laws that govern them. The Magic Loop, can help restore you to health, and keep your maintenance systems functioning at their highest level. When your doctor does not have all the answers, this technique can help you to help yourself. --- About the Author: Author Roy Cage, is a Certified Hypnotherapist. Recently retired, he continues to keep an office in Fort Worth, Texas, where he practiced for more than thirty years. In addition to his own practice, Cage has trained students, as well as counselors and psychologists in Federal Mental Health Centers in therapeutic hypnosis. He served as President of the National Society of Hypnotherapists for three terms and even longer as Chairman of Education and Certification for the same organization. He has lectured under university auspices at a number of universities, including University of Missouri, Texas Wesleyan University, and Texas Women's University. He is a popular guest on radio and TV talk shows, and enjoys an excellent reputation among

professionals in Medicine, Dentistry and Psychotherapy. His course book: CONFLICT THERAPY HYPNOTHERAPY, which he originally created for TEA approval of his school, is still referenced

and used in other hypnotherapy training institutions around the country. He is a 'Certified Expert Witness' in Criminal Courts. He has developed the understanding and the technique of The Magic

Loop over years of actual experience, and has seen what many consider "miracles" happen in the lives of those with whom he has worked.
