You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, "lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely." The three books are *The Timeless Way of Building*, *The Oregon Experiment*, and this book, *A Pattern Language*. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by

architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain "languages," which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. "Patterns," the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today.

A weird secret is concealed in the very core of Italy, an enigma rooted into a distant past: Mount Sibyl, with the eerie legend concerning the gloomy cave that once existed on the mountain-top. Is a deity or an oracular priestess concealed beneath a remote Italian peak? Why have travellers from Germany, France, Flanders and other European countries journeyed for centuries up to that cliff? What is truth hidden behind the tales of sensual damsels and unbelievable treasures? Can a connection to the old tale of Tannhäuser be established? Follow the main character of this compelling novel in his quest for the truth. A real Italian legend, once known all over Europe, is staged in 'The Eleventh Sibyl' for the delight of the refined reader. The myth of the Apennine Sibyl is narrated by the major expert in the legends and lore of the Sibillini Mountain Range in Italy.

Translocality in Contemporary City Novels responds to the fact that twenty-first-century Anglophone novels are increasingly characterised by translocality—the layering and blending of two or more distant settings. Considering translocal and transcultural writing as a global phenomenon, this book draws on multidisciplinary research, from globalisation theory to the study of narratives to urban studies, to explore a corpus of thirty-two novels—by authors such as Chimamanda Ngozi Adichie, Dionne Brand, Kiran Desai, and Xiaolu Guo—set in a total of ninety-seven cities. Lena Mattheis examines six of the most common strategies used in contemporary urban fiction to make translocal experiences of the world narratable and turn them into relatable stories: simultaneity, palimpsests, mapping, scaling, non-places, and haunting. Combining and developing further theories, approaches, and techniques from a variety of research fields—including narratology, human geography, transculturality, diaspora spaces, and postcolonial perspectives—Mattheis develops a set of cross-disciplinary techniques in literary urban studies.

"Growth" is the only political, economic and social goal recognized today. But it brings us up against the ecological limits of the planet - and against the increasingly widespread recognition of the fact that material wealth alone cannot make us happy. For this reason, ever growing numbers of people are seeking and discovering alternative and sustainable ways of living. This is to be welcomed, but it is not enough. We need a politics of sufficiency that will make it easier to live with fewer resources but with stronger relationships. This book outlines the political framework and policy guidelines that will enable us to reduce the speed, complexity, clutter and commercialization currently blighting our lives. And it demonstrates what that would mean in practice for where we live, how we get around, and how we eat, work and learn.

Paper Towns er historien om Margo og Q. Men også historien om et mysterie. Mysteriet om de mennesker, vi idealiserer så højt, at vi i vores jagt på at finde dem opdager, at vi leder efter de forkerte... John Green udforsker med Paper Towns, hvordan vi føler med, forelsker os i og idealiserer mennesker, som i virkeligheden er irriterende eller træffer forfærdelige beslutninger.

Kærlighedshistorien om Margo & Q giver læseren mere end bare en romantisk og sjov fortælling, men også noget at tænke over - hvilket efterhånden er John Greens specialitet. Barndomsvennerne Q og Margo går på samme high school, men er vokset fra hinanden. Q følger fascineret fra sidelinjen den gådefulde, smukke Margo, som flirter rundt med de populære elever på skolen. Men hun bliver først et mysterium, da hun en tilfældig aften kravler ind gennem Qs vindue og tilbage i hans liv - med planer om en hævnkampagne mod alle der nogensinde har såret hende. Efter deres eskapade nat forsvinder Margo, og Q dropper sin eksamen og sætter sig for at finde hende, død eller levende, ved at følge de spor, hun har efterladt ham. Paper Towns er bogen bag filmen af samme navn og dermed biograf-opfølgeren til *En flænge i himlen*. Pressen skrev: »Der bliver ikke leflet for den unge læser, det er filosofi i fiktionsform, men det tunge serveres med let humor, stigende spænding og rappe dialoger.
