The power of the subconscious is way beyond positive thinking... It is believing. The reason why it can bring you to success is that the subconscious part of the brain can enable you to aspire, believe that aspiration, and eventually allowing your "believing" makes your aspiration come true. To give you better understanding regarding this matter, Read along. Your subconscious mind, if you would only allow it, can bring you great riches, abundant happiness or just about anything you can imagine and that's a fact. The reason for this is that your subconscious is essentially the "inner you" and it never sleeps, for if it did sleep your body would cease to function and die. Your subconscious not only regulates your breathing but keeps every organ in your body functioning and doing its job to keep you alive. As well as that, your subconscious is also responsible for habitual behaviors and learned skills. The key to controlling the subconscious mind is in knowing that before any skill or habit is accepted by it, they must first pass through the conscious mind. NATIONAL BESTSELLER · From the bestselling author of The Drunkard's Walk, a startling, eye-opening examination of how the unconscious mind shapes our experience of the world. "Mlodinow plunges into the realm of the unconscious mind accompanied by the latest scientific research ... [with] plenty of his trademark humor." —Los Angeles Times Over the past two decades of neurological research, it has become increasingly clear that the way we experience the world—our perception, behavior, memory, and social judgment—is largely driven by the mind's subliminal processes and not by the conscious ones, as we have long believed. In Subliminal, Leonard Mlodinow employs his signature concise, accessible explanations of the most obscure scientific subjects to unravel the complexities of the subliminal mind. In the process he shows the many ways it influences how we misperceive our relationships with family, friends, and business associates; how we misunderstand the reasons for our investment decisions; and how we misremember important events—along the way, changing our view of ourselves and the world around us.
