Building on the work presented in Styran and Taylor's *This Great National Object*, which told the story of the first three Welland canals built in the nineteenth century, *This Colossal Project* chronicles an impressive milestone in the history of Canadian technological achievement and nation building.

This open access book explores the complex relationship between schooling as a set of practices embedded in educational institutions and their specific spatial dimensions from different disciplinary perspectives. It presents innovative empirical and conceptual research by international scholars from the fields of social geography, pedagogy, educational and social sciences in Germany, the United

Kingdom, France, Czechia, Hungary, Austria, Switzerland, Norway and Canada. The book covers a broad range of topics, all examined from a spatial perspective: the governance of schooling, the transition processes of and within national school systems, the question of small schools in peripheral areas as well as the embeddedness of schooling in broader processes of social change. Transcending disciplinary boundaries, the book offers deep insights into current theoretical debates and empirical case studies within the broad research field encompassing the complex relationship between education and space.

Nation and Genre in Contemporary Canadian Narrative

Fundamental world changes that simultaneously undermine a nation-state's charisma and promote the rise of a supra-national system have wide-ranging effects upon national states within a modern global society. My dissertation empirically examines the effects of social and cultural globalization on

systems of mass schooling, which are central institutions in every country. Globally, primary and secondary education initially emerged as the premier tool for nation-states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition. I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education. The analyses consist of two sections. Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74 countries during the period 1970-2008. These findings show a worldwide increase in emphasis on human rights and increases in discussions of diversity in well-established liberal democracies. Cross-national, quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia (BC), which examines nation-building within a context

of strong emphasis on diversity and human rights. The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871. It also draws on a selection of historical documents, including Ministry of Education reports, curricular frameworks, and high school exit exams. Process-wise, I find the incorporation of human rights and diversity reflects macro-level changes in national and global society. Content-wise, I find four main approaches to reconciling ideas of human rights and diversity with national identity: (1) framing human rights and multiculturalism as part of national identity, (2) using pedagogical approaches that promote multiple perspectives and individual agency, (3) celebrating social and scientific figures and accomplishments as the source of national pride, and (4) drawing on exogenous sources to affirm state legitimacy. This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical

evidence of this trend. A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world. Further, students are increasingly taught that the global civil society and non-state actors are important and legitimate agents of social change.

Explore the broad, fascinating history of the Eaton's department store empire. Exhaustively researched and thoughtfully written by a prominent department store historian. Canada's largest and most well-known department store, Eaton's was an icon of Canadian culture. From its founding in 1869 to its famed catalogue and network of large stores spreading coast to coast, Eaton's offered something for everyone, in grand style. Relive the days

when this remarkable store was a fixture in every Canadian province and served its customers with a distinctive personality that has all but vanished from the retail landscape. *Changes in Civic Education Textbooks Cross-nationally (1970-2008) and in British Columbia (1871-2008)* Dundurn

Unholy States is the first collection of foundational essays of Canadian postcolonial theory. The essays span the period from 1965 to the present day and approach broad issues of Canadian culture and society. They represent the impassioned conflicts, dissonances, and intersections among postcolonial theorists in English Canada. Theories of Canadian postcolonialism are various and often contending. The questions proliferate: Is Canada postcolonial? Who in Canada is postcolonial? Are some Canadians more postcolonial than others? Together, the essays in this collection demonstrate both the historical development of this vigorous debate and its most prominent current perspectives. The anthology comprises work

originally written in English, selected and arranged in order to demonstrate the dynamic nature of these discussions. Included here are essays by many well-known writers and theorists, such as George Grant, Northrop Frye, Margaret Atwood, Dennis Lee, Robert Kroetsch, Linda Hutcheon, Diana Brydon, Thomas King, Terry Goldie, Arun Mukherjee, Smaro Kamboureli, Stephen Slemon, and Roy Miki. The collection covers such topics as anti-colonial nationalism, settler-invader theory, First Nations contexts, postcolonial pedagogy, and critiques of Canadian postcolonialism. A general introduction surveying the current field of postcolonial discourse in English Canada is also included.

Postcolonialism McGill-Queen's Press - MQUP
This book argues that Canada and its international policies are at a crossroads as US hegemony is increasingly challenged and a new international order is emerging. The contributors look at how Canada has been adjusting to this new

environment and resetting priorities to meet its international policy objectives in a number of different fields: from the alignment of domestic politics along new foreign policies, to reshaping its international identity in a post-Anglo order, its relationship with international organizations such as the UN and NATO, place among middle powers, management of peace operations and defense, role in G7 and G20, climate change and Arctic policy, development, and relations with the Global South. Embracing multilateralism has been and will continue to be key to Canada's repositioning and its ability to maintain its position in this new world order. This book takes a comprehensive look at Canada's role in the world and the various political and policy variables that will impact Canada's foreign policy decisions into the future. Embattled Nation explores Canada's tense wartime

election of 1917. Amidst the drama of the First World War, Canada's most divisive election ever raised pivotal questions about Canada's place in the war and the world. This book examines the issues, people, and events behind one of the most important elections in Canada's history.

Subject index The Canadian Encyclopedia Free Books for All provides a detailed and reflective account of the people, groups, communities, and ideas that shaped library development in the decades between 1850 and 1930, from Egerton Ryerson to George Locke, from Mechanics Institutes to renovated Carnegie libraries. A chronological narrative, lively writings by the people involved, tables, maps, graphs, and period photographs combine to tell the stories of the librarians, trustees, educators, politicians, and library users who contributed to Ontario's early public library system. The book brings to life a fascinating period

of library history. The movement to use the power of local governments to furnish rate-supported library service for citizens was a successful Victorian and Edwardian thrust. Today, more than 500 public libraries span the province, serving as intermediary points between authors and readers and providing a wide scope of information and programming services for educational and recreational purposes. The libraries themselves are, in part, a tribute to the men and women who worked tirelessly to promote library service before 1930. This new study will deepen our understanding of the people and processes that established the foundation for modern public library service in Ontario and Canada. This edition of "The Canadian Encyclopedia is the largest, most comprehensive book ever published in Canada for the general reader. It is COMPLETE: every aspect of Canada, from its rock formations to its rock bands, is represented here. It is UNABRIDGED:

all of the information in the four red volumes of the famous 1988 edition is contained here in this single volume. It has been EXPANDED: since 1988 teams of researchers have been diligently fleshing out old entries and recording new ones; as a result, the text from 1988 has grown by 50% to over 4,000,000 words. It has been UPDATED: the researchers and contributors worked hard to make the information as current as possible. Other words apply to this extraordinary work of scholarship: AUTHORITATIVE, RELIABLE and READABLE. Every entry is compiled by an expert. Equally important, every entry is written for a Canadian reader, from the Canadian point of view. The finished work - many years in the making, and the equivalent of forty average-sized books - is an extraordinary storehouse of information about our country. This book deserves pride of place on the bookshelf in every Canadian Home. It is no accident that the cover of this book is based on the Canadian flag. For the proud truth is that this volume represents a great national achievement.

From its formal inception in 1979, this encyclopedia has always represented a vote of faith in Canada; in Canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated. At the start of a new century and a new millennium, in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations, this "Canadian Encyclopedia is offered in a spirit of defiance and of faith in our future. The statistics behind this volume are staggering. The opening sixty pages list the 250 Consultants, the roughly 4,000 Contributors (all experts in the field they describe) and the scores of researchers, editors, typesetters, proofreaders and others who contributed their skills to this massive project. The 2,640 pages incorporate over 10,000 articles and over 4,000,000 words, making it the largest - some might say the greatest - Canadian book ever published. There are, of course, many special features. These include a map of Canada, a special page comparing the key statistics of the 23 major Canadian cities, maps of

our cities, a variety of tables and photographs, and finely detailed illustrations of our wildlife, not to mention the colourful, informative endpapers. But above all the book is "encyclopedic" - which the "Canadian Oxford Dictionary describes as "embracing all branches of learning." This means that (with rare exceptions) there is satisfaction for the reader who seeks information on any Canadian subject. From the first entry "A mari usque ad mare - "from sea to sea" (which is Canada's motto, and a good description of this volume's range) to the "Zouaves (who mustered in Quebec to fight for the beleaguered Papacy) there is the required summary of information, clearly and accurately presented. For the browser the constant variety of entries and the lure of regular cross-references will provide hours of fascination. The word "encyclopedia" derives from Greek expressions alluding to a grand "circle of knowledge." Our knowledge has expanded immeasurably since the time that one mind could encompass all that was known. Yet now Canada's finest scientists,

academics and specialists have distilled their knowledge of our country between the covers of one volume. The result is a book for every Canadian who values learning, and values Canada.

Stanford University Masterful, ambitious, and groundbreaking, this is a major new history of our country by one of our most respected thinkers and historians -- a book every Canadian should own. From the acclaimed biographer and historian Conrad Black comes the definitive history of Canada -- a revealing, groundbreaking account of the people and events that shaped a nation. Spanning 874 to 2014, and beginning from Canada's first inhabitants and the early explorers, this masterful history challenges our perception of our history and Canada's role in the world. From Champlain to Carleton, Baldwin and Lafontaine, to MacDonald, Laurier, and King, Canada's role in peace and war, to Quebec's quest for autonomy, Black takes on sweeping themes and vividly recounts the story of Canada's development from colony to dominion to country. Black

persuasively reveals that while many would argue that Canada was perhaps never predestined for greatness, the opposite is in fact true: the emergence of a magnificent country, against all odds, was a remarkable achievement. Brilliantly conceived, this major new reexamination of our country's history is a riveting tour de force by one of the best writers writing today.

The North American entertainment industry is rapidly consolidating, and new modes of technological delivery challenge Canadian content regulations. An understanding of how Canadian culture negotiates its rapport with American genres has never been more timely. *West/Border/Road* offers an interdisciplinary analysis of contemporary Canadian manifestations of three American genres: the western, the border, and the road. It situates close readings of literary, film, and television narratives from both English Canada and Quebec within a larger context of Canadian

generic borrowing and innovation. Katherine Ann Roberts calls upon canonical works in Canadian studies, theories of genre, and a wide range of scholarship from border studies, cultural studies, and film studies to examine how genre is appropriated and sometimes reworked and how these cultural narratives engage with discourses of contemporary Canadian nationhood. The author elucidates Guy Vanderhaeghe's rewriting of the codes of the historical western to include the trauma of Aboriginal peoples, Aritha van Herk's playful spoof on American western iconography, the politics and perils of the representation of the Canada-US border in CBC-produced crime television, and how the road genre inspires and constrains the Québécois and Canadian road movie. A reminder of the power and limitations of American genres, *West/Border/Road* provides a nuanced perspective on Canadian engagement with cultural forms that may be imported but never foreign.

Canadians fell in love with the car at first glance.

They were scared by it too, and by its potential.

Canada was quick to become a car nation, as the automobile was enthusiastically adopted by Prairie grain farmers, the new modern woman, travellers to the north, and rough-and-tumble adventurers looking for a thrill by traversing the immense length of the country. The automobile was the symbol of the modern Canada of the twentieth century, and the final victory of technology over landscape. Canadians were building cars from the beginning.

Independent firms and branches of the big American manufacturers vied for the lucrative Canadian market.

Automaking has been an integral part of Canada's economy since the car's introduction. For more than a century, Canadians have lived with this automobile revolution, and all the consequences and permutations that it represents. Blending social, cultural and economic history, Dimitry Anastakis's engaging text tells the fascinating story of the car across Canada

from earliest days, when cars and horses jockeyed for parking space, to the multilane freeways of the twenty-first century.

This book is a comparison of the history and politics of two sister societies, comparing Canada with Australia, rather than, as is traditional, with the United Kingdom or the United States. It is representative of a particular interest in promoting more contact and exchange among Canadian and Australian scholars who were investigating various features of the two societies. Because some of them were individually involved in aspects of federalist studies, an examination of the early evolution of federalism in what once were the two sister dominions seemed quite an appropriate area in which to begin comparisons. The book discusses Canadian federalism from about 1864 to 1880 and Australian federalism from about 1897 to 1914. It examines the background and changes wrought on early Canadian federalism and early Australian federalism.

This collection brings together a wide array of writings on Canadian immigrant history, including many highly regarded, influential essays. Though most of the chapters have been previously published, the editors have also commissioned original contributions on understudied topics in the field. The readings highlight the social history of immigrants, their pre-migration traditions as well as migration strategies and Canadian experiences, their work and family worlds, and their political, cultural, and community lives. They explore the public display of ethno-religious rituals, race riots, and union protests; the quasi-private worlds of all-male boarding-houses and of female domestics toiling in isolated workplaces; and the intrusive power that government and even well-intentioned social reformers have wielded over immigrants deemed dangerous or otherwise in need of supervision. Organized partly chronologically and largely by theme, the topical sections will offer students a glimpse into Canada's complex immigrant past. In order

to facilitate classroom discussion, each section contains an introduction that contextualizes the readings and raises some questions for debate. A Nation of Immigrants will be useful both in specialized courses in Canadian immigration history and in courses on broader themes in Canadian history. Canada is a country of massive size, of diverse geographical features and an equally diverse population—all features that are magnificently reflected in its architecture. In this book, Rhodri Windsor Liscombe and Michelangelo Sabatino offer a richly informative history of Canadian architecture that celebrates and explores the country's many contributions to the spread of architectural modernity in the Americas. A distinct Canadian design attitude coalesced during the twentieth century, one informed by a liberal, hybrid, and pragmatic mindset intent less upon the dogma of architectural language and more on thinking about the formation of inclusive spaces and places. Taking a fresh perspective on design production, they map the unfolding of architectural modernity across the country, from the completion of the transcontinental railway in

the late 1880s through to the present. Along the way they discuss architecture within the broader contexts of political, industrial, and sociocultural evolution; the urban-suburban expansion; and new building technologies. Examining the works of architects and firms such as ARCOP, Eric Arthur, Ernest Cormier, Brigitte Shim, and Howard Sutcliffe, this book brings Canadian architecture chronologically and thematically to life.

external economic relations, regional disparities and regional development, social and economic classes, women, Native peoples, politics and the Canadian state, nationalism, culture and political thought. The book is indexed by author, and includes a helpful shortlist of the "staples" in Canadian political economy.
