 Kate Braverman grew up in Los Angeles in the late 1950s at the time when glitz was just beginning to be manufactured. Her Los Angeles was made up of stucco tenements, welfare, and the marginalized. It wasn't a destination city, it was the end of the line. Frantic Transmissions to and from Los Angeles chronicles the trajectory of Braverman's Left Coast generation with a voice of singular power. She was an antiwar activist in Berkeley, a punk-rock poet on Sunset Strip, a single mother in the East L.A. barrio, and a woman in recovery at AA meetings in Beverly Hills. By 1990 she was married and settled into a life of writing and teaching. In her forties, Braverman did the unthinkable and moved from Beverly Hills to New York's Allegheny Mountains to a 150-year-old farmhouse. In wide-ranging transmissions, Braverman deftly contrasts the social histories of Los Angeles with her new, timeless rural community; describes the effects of the changing seasons on her Californian, sun-drenched soul; and marvels at how a remote farmhouse can offer surprising consolations. Library Journal calls Braverman a "literary genius"; Rolling Stone describes her as having the "power and intensity you don't see much outside of rock and roll." Frantic Transmissions to and from Los Angeles offers an eccentric and insightful view of social and individual transformation.

 Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

 Use the internet like a real spy. Untangling the Web is the National Security Agency's once-classified guide to finding information on the internet. From the basic to the advanced, this 650-page book offers a fascinating look at tricks the "real spies" use to uncover hidden (and not-so-hidden) information online. Chapters include: Google hacks Metasearch sites Custom search engines Maps & mapping Uncovering the invisible internet Beyond search engines: Specialized research tools Email lookups Finding people Researching companies A plain english guide to interworking Internet toolkits Finding ISPs Cybergeography Internet privacy and security ....and over a hundred more chapters. This quote from the authors hints at the investigative power of the techniques this book teaches: Nothing I am going to describe to you is illegal, nor does it in any way involve accessing unauthorized data, [...but] involves using publicly available search engines to access publicly available information that almost certainly was not intended for public distribution. From search strings that will reveal secret documents from South Africa ( filetype: xls site: za confidential ) to tracking down tables of Russian passwords ( filetype: xls site: ru login ), this is both an instructive and voyeuristic look at how the most powerful spy agency in the world uses Google.

 You are holding a collection of stories, the aim of this collection is to equip and inspire you to make a positive impact in your own community, through relationships and creative initiatives. In this material, you will read about Dave and Will who developed gardens on wasteland in inner city London council estates, encouraging residents to be part of the process of renewal and creativity by growing plants and vegetables. Will hosts community harvest feasts, bringing together local residents to eat their own locally-grown produce. Andy in his 20s, started a lunch club for isolated elderly people, rallying his student friends to help

serve homemade meals in a borrowed church hall. Pauline responded to a news bulletin about the lack of housing for refugees and asylum seekers, by setting up homes across North London to provide safe housing. Annie set up regular meals in her church building for homeless people and rough sleepers. Mark started a football club for local lads from an estate in London, most of whom were from extremely difficult backgrounds and not in education or employment. Countless others have weeded gardens for families referred by social services, mentored children in foster care and painted a wall in a refuge. Abroad, Mick and Ruby moved into an inner city slum community in the heart of Manilla for 9 years with their young children. At the heart of City Lights are stories and friendships. The acclaimed author of *Strategic Capitalism* presents a provocative new vision of global industry in the age of 3-D printing: "essential business reading" (Kirkus, starred review). With books like *Hypercompetition* and *Strategic Capitalism*, Richard D'Aveni has established himself as a business strategist of uncanny prescience. In *The Pan-Industrial Revolution*, he demonstrates how the advent of industrial-scale 3-D printing is already happening under the radar, and that it will have a far-reaching impact that most corporate and governmental leaders have yet to anticipate or understand. 3-D printing, now called additive manufacturing, has moved far beyond a desktop technology used by hobbyists to churn out trinkets and toys. In this eye-opening account, D'Aveni reveals how recent breakthroughs have been secretly adapted by Fortune 500 companies to revolutionize the manufacture jet engines,

airplanes, automobiles, and so much more. D'Aveni explains how this technology will transform the landscape of manufacturing, and the dramatic effect this change will have on the world economy. A handful of massively powerful corporations—what D'Aveni calls pan-industrials—will become as important as any tech giant in re-structuring the global order.
