Whip up some Frozen Bananoids, Buried Treasure Muffins, Tuna Wiggle, Disgustingly Rich Brownies, and 65 other foolproof examples of kid cuisine with this now-classic book. First published in 1987, KidsCooking has sold well over a million copies. All the recipes are designed to be prepared by chefs ages 5 and up (although a grown-up assistant can often be useful). The book is packaged with a set of sturdy, multi-colored measuring spoons that coordinate with the illustration. Printed on coated stock and wire-bound to lay flat, this is an abuse-proof cookbook designed for every modern, kid-equipped kitchen. And the fresh new cover? That's the icing on the cake.

In an effort to challenge the ways in which colonial power relations and Eurocentric knowledges are reproduced in participatory research, this book explores whether and how it is possible to use arts-based methods for creating more horizontal and democratic research practices. In discussing both the transformative potential and limitations of arts-based methods, the book asks: What can arts-based methods contribute to decolonising participatory research and its processes and practices? The book takes part in ongoing debates related to the need to decolonise research, and investigates practical contributions of arts-based methods in the practice-led research domain. Further, it discusses the role of artistic research in depth, locating it in a decolonising context. The book will be of interest to scholars working in art history, design, fine arts, service design, social sciences and development studies.

A bunch of scientifically proven ways to blow your mind. A Canadian Toy Testing Council 3-Star Award winner! The world is weirder than you think. Want proof? Look no further than this book - which actually looks back at you. In fact, its eyes follow you across the room. And there's more weirdness inside. The Book of Impossible Objects comes with all the plastic pieces, paper parts, and special pages you need to experience 25 impossible things. Spin the wobblestone and watch it reverse direction all by itself. Wander the paper labyrinth, an ever-changing folded maze. Use the Mirror Monster Maker to give yourself three eyes. Follow a road sign that points in a different direction every time you check it. These objects all work like magic, but there are no tricks here. All this weirdness has a solid scientific basis - from the mathematically amazing Möbius strip (a band of paper with only one side), to cardstock acrobats with astoundingly great balance, to a spinning top that changes colors before your eyes. The why behind each wow is explained with crystal clarity by the award-winning team of Pat Murphy and the scientists of Klutz Labs. Which makes for a book that's not only weird - it's wonderful.

If the truth be known, I am only a partially reformed idealist. In the secret depths of my soul, I still wish to make the world a better place and sometimes fantasize about heroically eradicating its faults. When I encounter its limitations, it is consequently with deep regret and continued surprise. How, I ask myself, is it possible that that which seems so fight can be a chimera? And why, I wonder, aren't people as courageous, smart, or nice as I would like? The pain of realizing these things is sometimes so intense that I want to close my eyes and lose myself in the kinds of daydreams that comforted me as a youngster. One thing is clear, my need to come to grips with my idealism had its origin in a lifetime of naiveté. From the beginning, I wanted to be a "good" person. Often when life was most treacherous, I retreated into a corner from whence I escaped into reveries of moral glory. When I was very young, my faith was in religion. In Hebrew school, I took my lessons seriously and tried to apply them at home. By my teen years, this had been replaced by an allegiance to socialism. In the Brooklyn where I grew up, my teachers and relatives made this seem the natural course. When I reached my twenties, however, and was obliged to confront a series of personal deficiencies, psychotherapy shouldered its way to the fore.

At a time when religion and spirituality have been divorced from one another and morality and ethics are viewed as being confining rather than liberating, Fr. James Keenan has developed a new edition to his beloved book *Moral Wisdom*. There are new discussions of social sin and Pope Benedict XVI's encyclical *Caritas in Veritate*, a clearer exploration of Jesus in the New Testament, and new study questions at the end of each chapter. 'Moral wisdom,' as Fr. Keenan calls it, is the distinctive gift of the Catholic tradition, a gift that helps us discern what values to pursue and which virtues to embody on the path to becoming who we really are and who God calls us to be. Fr. Keenan uses a conversational style filled with stories and examples to open the treasure trove of resources in the Catholic tradition for developing moral wisdom. He lifts up the lessons on love, conscience, sin, and suffering, helping readers connect with the formative influences of the Catholic heritage and appreciate what gives meaning to our lives and what enhances our relationships with friends and family

Somewhere, somebody is having more fun than you are. Or so everyone believes. Peter Sagal, a mild-mannered, Harvard-educated radio host—the man who puts the second "I" in "vanilla"—decided to find out if it's true. From strip clubs to gambling halls to swingers clubs to porn sets and back to the strip clubs (but only because he left his glasses there), Sagal explores what the sinful folk do, how much they pay for the privilege, and how exactly they got those funny red marks.

The revival of ideology, which began early in the second half of the last century, has led to reconsideration of the following questions: What underlies the pattern of the rise and decline of the ideological mode of thought? What leads young intellectuals to search for an ideology? What accounts for the changes in ideological fashion over time and nation, and shifts from one set of philosophical tenets to another? Who indeed are the "intellectuals?" Studies of ideology have tended to range themselves for or against particular viewpoints, or have concerned themselves with defining perspectives. The purpose of this book is to examine the common causal patterns in the development of various differing ideologies. Feuer finds that any ideology may be said to be composed of three ingredients: The most basic and invariant is some form of Mosaic myth. Every ideology also has its characteristic philosophical tenets spreading

from left to right, which conform to the cycle of ideas; and, finally, an ideology must be taken up by some section of the population who can translate it into action. Intellectuals in generational revolt find in some version of the ideological myth a charter and dramatization of their emotions, aims, and actions. Since each generation of intellectuals tends to reject its predecessors' doctrines, a law of intellectual fashion arises the alternation of philosophical doctrines. Ideology has inevitably made for an authoritarian presumption on the part of master-intellectuals and marginal ones and assumes their antagonism to objective truth and science. It is Feuer's contention that only when intellectuals abandon ideology in favor of science or scholarship will an unfortunate chapter in the history of human unreason be overcome.

#1 NATIONAL BESTSELLER #1 INTERNATIONAL BESTSELLER What does everyone in the modern world need to know? Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding boys and girls must be left alone, what terrible fate awaits those who criticize too easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. *12 Rules for Life* shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling the mind and spirit of its readers.

From the same brains who brought you The Encyclopedia of Immataturity comes The Klutz Book of Inventions, a 200-page catalog of never-before-seen contraptions that are equal parts brilliant, useful, and ridiculous. None of them exist as actual products, but in a better world, a funnier world, they would all be household essentials. One of the most ambitious projects we've ever undertaken, this compendium was created over the course of hundreds of brainstorm hours by an all-star team from Klutz and IDEO, the world's foremost product design firm. Each of the inventions was actually built in the legendary IDEO workshop before being photographed (usually in action) and described on its own page.
