Bloomsbury Publishing

The Jeep as we know it from WW2 news reels, big screen movies and television shows such as M.A.S.H. or The Rat Patrol was the result of the US War Department's requirement for a light

command-reconnaissance car to meet the US Army's needs under the threat of a looming European war. After only a few weeks of development the Jeep would end up in all of the Allied armies of the world courtesy of Bantam, Willys and Ford. Many of the Jeeps built during the war would go on to serve for over 60 years in various parts of the world

in both military and civilian use. This book is a basic guide to building a WW2 Jeep using restored, rebuilt and modern reproduction parts for those who have never done it before, just as I hadn't either. You'll find a clear step by step process used to build a truly historical vehicle. Combined with the other books and websites that will be noted in this

volume as well as some basic auto mechanical knowledge on your part you should be able to have your own piece of Jeep history rolling in no time.

Drawing on an immense range of archival records, memoirs, and photographs collected over decades of diligent research, author Carl Vincent provides a unique insight into some of the men and machines covered under the broad

title Canadian Aircraft of WWII. Each entry's narrative is loaded with history, much of it previously unpublished and is illustrated by rare and relevant photos plus deeply researched large-format color profiles, all complemented by highly informative captions. Discover how the oddball little Fleet Fort came into its new role, why the Bolingbroke was much more than "just a Canadian Blenheim", when chewing gum could prove vital for a Sunderland crew, who

was one of the Allies' premier train-busters, and much more... Covered in this AviaDossier:  
DeHavilland Fox Moth (with 2 profiles & 5 photos) Consolidated Catalina I (with 2 profiles & 5 photos) North American Mustang I (with 3 profiles & 6 photos ) Fleet Fort (with 2 profiles & 2 photos) Short Sunderland III (with 2 profiles & 5 photos) Hawker Hurricane XII (with 2 profiles & 2 photos) Bristol Bolingbroke IV (with 3 profiles & 5 photos)

Northrop Delta (with 4 profiles & 5 photos)  
 Douglas Boston III & IIIA (with 2 profiles & 3 photos)  
 Consolidated Liberator GR.V(Can) (with 1 profile & 4 photos)  
 Bristol Bolingbroke IVW (with 2 profiles & 3 photos)  
 Blackburn Shark II (with 2 profiles & 2 photos)  
 Supermarine Stranraer (with 1 profile & 2 photos)  
 Supermarine Spitfire FR.IX &FR.XIV (with 1 profile ea. & 2 photos)  
 Beaufighter TF.X (with 5 profiles & 10 photos)  
 Lysander IIIATT (with 2 profiles & 2

photos) Curtiss Kittyhawk Mk.IV (with 2 profiles & 2 photos)  
 Lockheed Hudson I (with 4 profiles & 5 photos)  
 Stocky Edwards' Spitfire & Fw190 (with 1 profile ea. & 3 photos)  
 Foreword by Canadian Second World War Ace, and Canada's highest scoring living fighter pilot, W/C JF "Stocky"Edwards. 2 useful appendices. Fully indexed. REVIEWS "Carl Vincent obviously wields a vast knowledge on this subject... fundamental information... balance this with rare photos and colorful anecdotes to

make an approachable, inviting and compact format, interesting even for those who are not fanatically devoted to the topic. The eclectic spectrum of subjects is completely at author's discretion, with motivation for inclusion ranging from personal interest, historic importance, technical uniqueness, pilot association, to the something completely different... it feels almost as if someone is telling to the reader: 'now, look at this one for a moment; I

find it quite interesting, how about you?'... Terry "Aviaeology" Higgins is responsible for the eye-candy in the AviaDossier, providing us with beautiful color profiles of every type under consideration. ...these give the book a third dimension and elevate it to the shelf that gets frequent dustings. Not only is Terry's art inspiring and lovely to look at, but also very well researched, accurate in detail and color and can be therefore used as a true reference."  
- Aleksandar Sekularac,

aircraftresourcecenter.com "Vincent is an engaging writer and I was quickly drawn in by the events in his stories. ... As with Aviaeology's decal releases it is the inclusion of this detailed supplementary information that makes this book stand out, by indicating the breadth and depth of research that has gone into the publication. ... Production quality is high. Printing is crisp and the quality of photographic reproduction is good. The profiles are beautifully

rendered... This book's combination of thorough research, interesting stories and great illustrations add up to another impressive release from Aviaeology."

### Aircraft in Profile

Voyageur Press (MN)

The events of World War 2 proved beyond any doubt that the strategic bombing campaign greatly contributed to the Allies' ultimate victory over Nazi Germany. British night bombing raids and daylight carpet bombing missions flown by the USAAF crews rained destruction on German cities killing thousands of civilians in the process. Amidst this massive loss of civilian life the destruction of German industrial targets seemed

almost like a side note. The arms race that kicked off even before the war began produced military aircraft capable of reaching ever higher operational ceilings. At first thin air at high altitudes was the domain of reconnaissance machines, but before long fighter and bomber aircraft began to venture there as well. In those early days high-altitude flight was a challenging business: it required the use of pressurized cockpits and boosted powerplants capable of

delivering adequate power at altitude.

**Fighters of the Iron Cross** Bloomsbury Publishing

The Messerschmitt Bf 110 was undoubtedly one of the most significant aircraft of World War II. Despite suffering setbacks in the summer of 1940 at the hands of the RAF, it continued to be used effectively in other theatres and roles until the last days of the war, particularly as a night fighter against RAF Bomber Command's strategic bombing

campaign over the Reich. This title shows you how to correct and convert basic 1/48-scale kits of the Bf 110 into many different variants, using a wide selection of aftermarket detail sets, conversions, accessories and decals for both day and night fighter schemes.

**Wingspan** Bloomsbury Publishing  
 Gunships: The Story of Spooky, Shadow, Stinger, and Spectre tells the dramatic story of transforming military cargo transports into

deadly ground-attack aircraft used by the U.S. and other countries in worldwide conflicts from the Vietnam War to the Middle East today. This comprehensive and detailed accounting of gunships begins with piston-powered, WWII-era C-47s and progresses to the four-engine turboprop C-130 Hercules, showing how gunships evolved from using 20mm miniguns to 105mm Howitzers with digital-age Battle Management Centers housed onboard. These highly effective

airplanes made history by removing the safe haven of night operations from the enemy, and allowing strategic victory that might not have otherwise been possible. Author Wayne Mutza not only carefully researched all of these aircraft and their paths to reality, but also tells the tale of the brave and persevering men who believed in this unique weapon system and who saw its development through to the end. This book features a wealth of outstanding color photographs, many of

which have never before been published, and also contains detailed appendices documenting gunship production data, combat units, and aircraft losses.

*Sport Aviation* Bloomsbury Publishing

The Focke-Wulf Fw 190 is regarded as one of the best fighters of World War II. Designed by Kurt Tank, it first saw combat in the summer of 1941 and went on to be produced in several variants. It remains hugely popular subject for aviation scale-modellers. This title

provides a detailed, step-by-step guide to modelling the Focke-Wulf Fw 190A-4 in 1/48 scale. Key aspects such as finishing techniques, including painting and displaying your model are covered. This guide forms part of Osprey Modelling 27 Modelling the Focke-Wulf Fw 190 A, F and G also available as an ebook.

Modelling a Focke-Wulf Fw 190G-3 Bloomsbury Publishing

The P-47 Thunderbolt, affectionately nicknamed the 'Jug', was one of the

most famous fighter aircraft of World War II. Used as both a high-altitude escort fighter and a low-level fighter-bomber, it quickly gained a reputation for being tough and resilient. Many different air forces operated this plane, and it sported a wide range of camouflage schemes, finishes and markings, including stunning nose art. Modellers have been well served with Thunderbolt kits over the years, right up to the latest highly accurate releases. This book takes

a step-by-step approach to modelling a wide variety of P-47 types in 1/48-scale, from 'Razorbacks' in USAAF colours to RAF T-bolts in the Far East. It provides expert advice on conversions (including a Bubbletop to a P-47M), adding aftermarket items, detailing, and ways to achieve top quality weathering and finishes.

*Texans and Harvards in Latin America* Airlife Pub Limited  
 During the autumn of 1944, III/JG 54 was the first Luftwaffe unit to be supplied with the new FW 190 D-9 Dora, used in base defence missions for the ME 262 jets and against Allied fighter and fighter-bomber formation over NW Europe. This title is a detailed account of this unit's history.

*Modelling the P-47 Thunderbolt* Casemate Publishers  
 Contains 124 extraordinary color

profiles, portraying examples of nearly all types of single-seated fighter aircraft used by the Luftwaffe in World War II. All of the detailed profiles represent aircraft flown by German aces, some of the most famous and successful as well as those of lesser known. Also contains over 100 color illustrations of Luftwaffe unit markings, uniform insignia, camouflage colors, unit code styles, kill markings, and related features.

Focke-Wulf Ta 154 "Moskito" Bloomsbury

## Publishing

This monograph is dedicated to the German Ta 154 night fighter which supposed to be an answer to the British Mosquito. The book covers both Ta 154 development history and the combat record of only few of those fighters ever deployed.

*Three in Thirteen* Crecy Pub

The Focke-Wulf Fw 190 is regarded as one of the best fighters of World War II. Designed by Kurt Tank, it first saw combat in the summer of 1941 and went on to be produced in

several variants. It remains a hugely popular subject for aviation scale-modellers. This book, the first of two to cover the Fw190, provides a detailed, step-by-step guide to modelling the Fw 190's A, F and G variants in 1/72, 1/48, and 1/32 scale. Key aspects such as creating mottled camouflage patterns, undercarriage and cockpit detailing, final weathering and finishing, and diorama bases to display your models are covered.

**Aerospace** Pen and Sword Military

The Airfix Book of Scale Modelling is the essential guide to getting the most out of this fascinating and rewarding hobby, explaining how to build scale models to suit all levels of modelling skill. With full colour photography throughout, the book covers the history of modelling and of the Airfix company, and shows how injection moulded kits are made. It then describes and reviews the major modelling scales, as well as outlining the range of paints, tools and

accessories that are available. Chapters include guides to choosing a kit, tools for the job, painting, decals, conversions, figure-painting, dioramas and more. Common problems and how to solve them are addressed, and there is also a series of step-by-step construction projects, including expert builds of the F86 Sabre jet, the Aston Martin DBR9, a Panzer IV tank, the Airfix yeoman figure (reissued for the London 2012 Olympics), a Trafalgar class submarine and a

scenic diorama.

**Doras of the Galland Circus** Bloomsbury Publishing

During the first chaotic months after the fall of the Third Reich, the RAE sent test pilots throughout the British Zone of Occupation to collect examples of the Luftwaffe's standard aircraft and then ferry them to Farnborough. Captain Eric Brown was a pilot in this ferrying operation. Here Brown delivers a detailed assessment of the characteristics of these

principal German aircraft: Fw200C; Heinkel He162; Junkers Ju87; Dornier Do217; Messerschmitt Me262, Bf109G, Bf110, Me163, and several others.

**Modelling a Focke-Wulf Fw 190F-8** Bloomsbury Publishing

R. C. ('Dick') Riley (1921-2006) was one of the country's foremost railway photographers; starting with mono just prior to World War 2, he moved over to colour in the early 1950s, when such film was both expensive and slow.

Working in the banking industry gave him the opportunity to travel widely and, aided by his trackside pass and contacts within the railway industry, he was able to access locations and views from which many other photographers were excluded. From his early work through to the end of main line steam in 1968 he took countless thousands of transparencies; over the years a number have been published but there remain a significant

number that have yet to see the light of day. This large landscape format book showcases over 200 colour images taken by Dick Riley between the early 1950s and 1968. Whilst the bias will be towards the Southern and Western regions, the book will also include a significant number of illustrations on both the Eastern and London Midland regions. Dick Riley was also a prolific photographer of industrial railways, and the book will include a brief selection featuring these sites, as

well as recording aspects such as signs and minutiae, which were largely ignored by other photographers. The book will also include vignettes of these photographs. The text has been compiled by his close friend and executor Rodney Lissenden, who had access to Dick Riley's personal diaries for anecdotal tales relating to the images concerned. *Aviation News* Kalmbach Publishing, Co. Learn everything you need to know about making your dioramas

look real! This fantastic revised edition will show you how with new projects, new photos, and expert tips. Includes painting, weathering, and detailing tips for figures, aircraft, vehicles, and more! By Sheperd Paine. Frog Model Aircraft, 1932-1976 Schiffer Publishing

The Focke-Wulf Fw 190 is regarded as one of the best fighters of World War II. Designed by Kurt Tank, it first saw combat in the summer of 1941 and went on to be produced in several variants. It

remains hugely popular subject for aviation scale-modellers. This title provides a detailed, step-by-step guide to modelling the Focke-Wulf Fw 190F-8 in 1/32 scale. Key aspects such as finishing techniques, including painting and displaying your model are covered. This guide forms part of Osprey Modelling 27 Modelling the Focke-Wulf Fw 190 A, F and G also available as an ebook.

**Modelling a Focke-Wulf Fw 190A-8/R8** AK-INTERACTIVE, S.L.

The aim of the Liberty was to standardize aircraft engine design. The theory was to have an engine design that could be built in several sizes and thus power airplanes for any purpose, from training to bombing. The differences in sizes would be obtained by using different numbers of cylinders in the same design. A large number of other parts would also be used in common by all resulting sizes of the engine series. The initial concept called for four-, six-, eight- and 12-cylinder models. An

X-24 version was built experimentally, and one- and two-cylinder models were built for testing purposes. The engine design eventually saw use on land, sea, and in the air, and its active military career spanned the years 1917 to 1960. In addition, it provided noble service in a multitude of civilian uses, and still does even today, some 90 years after the first engine ran. This book covers the complete history of the Liberty's design,

production, and use in amazing detail and includes appendices covering contracts, testing, specifications, and much more.

**Focke-Wulf Fw 190 Aces of the Western Front** Bloomsbury Publishing

The Focke-Wulf Fw 190 is regarded as one of the best fighters of World War II. Designed by Kurk Tank, it first saw combat in the summer of 1941 and went on to be produced in
