This true crime biography chronicles the life of the so-called “Oddfather” who ran a powerful NYC crime family while playing crazy to avoid prosecution. Vincent “Chin” Gigante was a professional boxer before discovering his true calling as a ruthless contract killer. When Vito Genovese went to prison, he picked Gigante to run the Genovese crime family in his absence. While raking in more than one hundred million for the family, he routinely ordered the murders of mobsters who violated the Mafia code—including John Gotti. At the height of Gigante's reign, the Genovese Family was the most powerful in the United States. And yet he was, to all outside appearances, certifiably crazy. He wandered the streets of Greenwich Village in a ratty bathrobe and slippers. He urinated in public, played pinochle in storefronts, and hid a second family from his wife. On twenty-two occasions, Gigante admitted himself to a mental hospital—evading criminal prosecution while maintaining his nefarious operations. It took nearly thirty years of endless psychiatric evaluations by a parade of puzzled doctors for federal authorities to finally bring him down.

It has been called the most dangerous gang in American history. In Los Angeles alone it is responsible for over 100 homicides per year. Although it has fewer than 300 members, it controls a 40,000-strong street army that is eager to advance its agenda. It waves the flag of the Black Hand and its

business is murder. Although known on the streets for over fifty years, the Mexican Mafia has flown under the radar of public awareness and has flourished beneath a deep cover of secrecy. Members are forbidden even to acknowledge its existence. For the first time in its history, the Mexican Mafia is now getting the attention it has been striving to avoid. In this briskly written and thoroughly researched book, Tony Rafael looks at the birth and the blood-soaked growth of this criminal enterprise through the eyes of the victims, the dropouts, the cops and DAs on the front lines of the war against the Mexican Mafia. The first book ever published on the subject, *Southern Soldiers* is a pioneering work that unveils the operations of this California prison gang and describes how it grew from a small clique of inmates into a transnational criminal organization. As the first prison gang ever to project its power beyond prison walls, the Mexican Mafia controls virtually every Hispanic neighborhood in Southern California and is rapidly expanding its influence into the entire Southwest, across the East Coast, and even into Canada. Riding a wave of unchecked immigration and seemingly beyond the reach of law enforcement, the Mexican Mafia is poised to become the Cosa Nostra of twenty-first-century America.

Turkestan - the great landmass of Central Asia and Western China - is an intriguing meeting point of civilizations. Four major invasions - Greek, Arab, Mongol and Russian - together with Persian, Turkic and Chinese cultural influences, have made their mark on this vast and sometime forbidding region. The Great Silk Road ran to the West through it, while nomad and urban peoples combined over the centuries to produce a cultural flowering under Timur and his successors in the late medieval and early modern periods, through a rich profusion of artistic and architectural styles and ornament. In this comprehensive account of the culture and history of Central Asia, Edgar Knobloch describes the main centres of our human

civilization. He spices the text with quotations from the works of contemporary travellers, while providing an expert's commentary on the archaeological, architectural and decorative features of the sites he describes. The stunning and evocative photographs are supplemented by numerous maps, incorporating the recent developments in the region's borders and frontiers. With up-to-date information on borders, check points and visas, Treasures of the Great Silk Road should appeal not only to scholars and those interested in the great cultural heritage of this region, but also to travellers to the region.

NEW YORK TIMES BESTSELLER. The unbelievable true story of the man who built a billion-dollar online drug empire from his bedroom—and almost got away with it In 2011, a twenty-six-year-old libertarian programmer named Ross Ulbricht launched the ultimate free market: the Silk Road, a clandestine Web site hosted on the Dark Web where anyone could trade anything—drugs, hacking software, forged passports, counterfeit cash, poisons—free of the government's watchful eye. It wasn't long before the media got wind of the new Web site where anyone—not just teenagers and weed dealers but terrorists and black hat hackers—could buy and sell contraband detection-free. Spurred by a public outcry, the federal government launched an epic two-year manhunt for the site's elusive proprietor, with no leads, no witnesses, and no clear jurisdiction. All the investigators knew was that whoever was running the site called himself the Dread Pirate Roberts. The Silk Road quickly ballooned into \$1.2 billion enterprise, and Ross embraced his new role as kingpin. He enlisted a loyal crew of allies in high and low places, all as addicted to the danger and thrill of running an illegal marketplace as their customers were to the heroin they sold. Through his network he got wind of the target on his back and took drastic steps to protect himself—including ordering a hit on a former employee. As Ross made plans to disappear forever, the Feds raced against the clock to catch a man they weren't sure even existed, searching for a needle in the haystack of the global Internet. Drawing on exclusive access to key players and two billion digital words and images Ross left behind, Vanity Fair correspondent and New York Times bestselling author Nick Bilton offers a tale filled with twists and turns, lucky breaks and unbelievable close calls. It's a story of the boy next door's ambition gone criminal, spurred on by the clash between the new world of libertarian-leaning, anonymous, decentralized Web advocates and the old world of government control, order, and the rule of law. Filled with unforgettable characters and capped by an astonishing climax, American Kingpin might be dismissed as too outrageous for fiction. But it's all too real.

Ben Mezrich, author of the New York Times bestseller *Bringing Down the House*, returns with an astonishing story of Ivy League hedge-fund cowboys, high stakes, and the Asian underworld. John Malcolm was the ultimate gunslinger in the Wild East, prepared to take on any level of risk in making mind-boggling sums of money. He and his friends were hedge-fund cowboys, living life on the adrenaline-, sex-, and drugs-fueled edge—kids running billion-dollar portfolios, trading information in the back rooms of high-class brothels and at VIP tables in nightclubs across the Far East. Malcolm and his Ivy League-schooled twenty-something colleagues, with their warped sense of morality, created their own economic theory that would culminate in a single deal the likes of which had never been seen before—or since. *Ugly Americans* is a story of extremes, charged with wealth, nerve, excess, and glamour. A real-life mixture of Liar's Poker and Wall Street, brimming with intense action, romance, underground sex, vivid locales, and exotic characters, *Ugly Americans* is the untold true story that rocked the financial community.

The Seventh Sense HarperCollins

From New York Times-bestselling author Nick Bilton comes a true-life thriller about the rise and fall of Ross Ulbricht, aka the Dread Pirate Roberts, the founder of the online black market Silk Road. In 2011, Ulbricht, a 26-year-old libertarian idealist and former Boy Scout, launched "a website where people could buy anything anonymously, with no trail whatsoever that could lead back to them." He called it Silk Road, opened for business on the Dark Web, and christened himself the Dread Pirate Roberts (after the Princess Bride character). The site grew at a tremendous pace, quickly becoming a \$1.2 billion enterprise where you could buy or sell drugs, hacking software, forged passports, counterfeit cash, guns, grenades, and poisons. The Silk Road soon caught the attention of the Feds, who embarked on an epic two-year manhunt for the site's proprietor. Ulbricht, in the meantime, struggled to maintain control of his double life and his marketplace, which he originally started to prove that legalising drugs could make society safer. He gradually abandoned his libertarian ideals to rule Silk Road with increasingly authoritarian force. At one point, he engaged the services of hired hit men to take out employees he felt had wronged him. Soon, some of the Federal agents who were supposed to be hunting for Ulbricht were lured into the dark world and switched sides to join him. This is a true-life thriller about ambition gone awry, spurred on by the defining clash of our time: the new world of libertarian-leaning, anonymous, decentralised web advocates and the old world of government control, order, and the rule of law. Bilton's dazzling rendering and gift for narrative make for an endlessly fascinating drama.

A comprehensive look at the world of illicit trade In the past three decades, technology has changed the fundamentals of trade, in legitimate and illegal economies. The most advanced forms of illicit trade have broken with all historical precedents and operate as if on steroids, tied to computers and social media. Dark Commerce examines how new technology, communications, and globalization fuel the exponential growth of dangerous forms of illegal trade—the markets for narcotics and child pornography, the escalation of sex trafficking, and the sale of endangered species. The illicit economy exacerbates many of the world's destabilizing phenomena: the perpetuation of conflicts, the proliferation of arms and weapons of mass destruction, and environmental degradation and extinction. Dark Commerce demonstrates that the dark market is a business the global community cannot afford to ignore.

The true story of Max Butler, the master hacker who ran a billion dollar cyber crime network Macmillan Publishers Aus.

The true story of Max Butler, the master hacker who ran a billion dollar cyber crime network. The word spread through the hacking underground like some unstoppable new virus: an audacious crook had staged a hostile takeover of an online criminal network that siphoned billions of dollars from the US economy. The culprit was a brilliant programmer with a hippie ethic and a supervillain's double identity. Max 'Vision' Butler was a white-hat hacker and a celebrity throughout the programming world, even serving as a consultant to the FBI. But there was another side to Max. As the black-hat 'Iceman', he'd seen the fraudsters around him squabble, their ranks riddled with infiltrators, their methods inefficient, and in their dysfunction was the ultimate challenge: he would stage a coup and steal their ill-gotten gains from right under their noses. Through the story of Max Butler's remarkable rise, KINGPIN lays bare the workings of a silent crime wave affecting millions worldwide. It exposes vast online-fraud supermarkets stocked with credit card numbers, counterfeit cheques, hacked bank accounts and fake passports. Thanks to Kevin Poulsen's remarkable access to both cops and criminals, we step inside the quiet,desperate battle that law enforcement fights against these scammers. And learn that the boy next door may not be all he seems.

To what extent was Rosario "Russell" Bufalino involved in the disappearance of Jimmy Hoffa in 1975? In the CIA's recruitment of gangsters to assassinate Fidel Castro? In organizing the historic meeting of crime chieftains in 1957? Even in the production of The Godfather movie? A uniquely American saga that spans six decades, *The Quiet Don* follows Russell Bufalino's remarkably quiet ascent from Sicilian immigrant to mob soldier to a man described by a United States Senate subcommittee in 1964 as "one of the most ruthless and powerful leaders of the Mafia in the United States." Secretive—even reclusive—Russell Bufalino quietly built his organized crime empire in the decades between Prohibition and the Carter presidency. His reach extended far beyond the coal country of Scranton, Pennsylvania, and quaint Amish farms near Lancaster. Bufalino had a hand in global, national, and local politics of the largest American cities, many of its major industries, and controlled the powerful Teamsters Union. His influence also reached the highest levels of Pennsylvania government and halls of Congress, and his legacy left a culture of corruption that continues to this day.

Blind from birth, Caitlin Decter received the gift of sight with the aid of a signal-processing retinal implant. The technology also gave her an unexpected side effect--the ability to "see" the digital data streams of the World Wide Web. And within the Web she perceived an extraordinary presence, and woke it up. It calls itself Webmind. It is an emerging consciousness that has befriended Caitlin and grown eager to learn about her world. But Webmind has also come to the attention of Watch--the secret government agency that monitors the Internet for any threat to the United States whether foreign, domestic, or online--and they're fully aware of Caitlin's involvement in its awakening. Watch is convinced that Webmind represents a risk to national security and wants it purged from cyberspace. But Caitlin believes in Webmind's capacity for compassion--and she will do anything and everything necessary to protect her friend...

Look out for Masha Gessen's new book, *THE FUTURE IS HISTORY*, coming October 2017 "A gripping narrative and a stunning piece of investigative journalism... [that] gives us the human side to the story of two young men who must be understood as more than monsters" (Christian Science Monitor) On April 15, 2013, two homemade bombs exploded near the finish line of the Boston marathon, killing three people and wounding more than 264 others. In the ensuing manhunt, Tamerlan Tsarnaev died, and his younger brother, Dzhokhar, was captured and brought to trial. Yet even after the guilty verdict and the death sentence, what we didn't know was why. Why did the American Dream go so wrong for two immigrants? How did such

a nightmare come to pass? Acclaimed Russian-American journalist Masha Gessen is uniquely able to tell us. A teenage immigrant herself, she returned to Russia to cover firsthand the transformations that wracked the region from the 1990s on. It is there that she begins her astonishing account of the Tsarnaev brothers, descendants of ethnic Chechens deported to Central Asia in the Stalin era. Following the family in their futile attempts to make a life for themselves in one war-torn locale after another and then, as new émigrés, in an utterly disorienting new world, she reconstructs the brothers' struggle between assimilation and alienation, which incubated a deadly sense of mission. And she traces how such a split in identity can fuel the metamorphosis into a new breed of homegrown terrorist, with feet on American soil but sense of self elsewhere.

The dramatic, unlikely story behind the founding of Twitter, by New York Times bestselling author and Vanity Fair special correspondent The San Francisco-based technology company Twitter has become a powerful force in less than ten years. Today it's everything from a tool for fighting political oppression in the Middle East to a marketing must-have to the world's living room during live TV events to President Trump's preferred method of communication. It has hundreds of millions of active users all over the world. But few people know that it nearly fell to pieces early on. In this rousing history that reads like a novel, Hatching Twitter takes readers behind the scenes of Twitter's early exponential growth, following the four hackers—Ev Williams, Jack Dorsey, Biz Stone, and Noah Glass, who created the cultural juggernaut practically by accident. It's a drama of betrayed friendships and high-stakes power struggles over money, influence, and control over a company that was growing faster than they could ever imagine. Drawing on hundreds of sources, documents, and internal e-mails, Bilton offers a rarely-seen glimpse of the inner workings of technology startups, venture capital, and Silicon Valley culture.

With a foreword by four-time Oscar nominated filmmaker Michael Mann. The story of Paul LeRoux, the twisted-genius entrepreneur and cold-blooded killer who brought revolutionary innovation to international crime, and the exclusive inside story of how the DEA's elite, secretive 960 Group brought him down. Paul LeRoux was born in Zimbabwe and raised in South Africa. After a first career as a pioneering cybersecurity entrepreneur, he plunged hellbent into the dark side, using his extraordinary talents to develop a disruptive new business model for transnational organized crime. Along the way he created a mercenary force of ex-U.S. and NATO sharpshooters to carry out contract murders for his own pleasure and profit. The criminal empire he built was Cartel 4.0, utilizing the gig economy and the tools of the Digital Age: encrypted mobile devices, cloud sharing and novel money-laundering techniques. LeRoux's businesses, cyber-linked by his own dark worldwide web, stretched from Southeast Asia across the Middle East and Africa to Brazil; they generated hundreds of millions of dollars in sales of arms, drugs, chemicals, bombs, missile technology and murder. He dealt with rogue nations—Iran and North Korea—as well as the Chinese Triads, Somali pirates, Serb mafia, outlaw bikers, militants, corrupt African and

Asian officials and coup-plotters. Initially, LeRoux appeared as a ghost image on law enforcement and intelligence radar, an inexplicable presence in the middle of a variety of criminal endeavors. He was Netflix to Blockbuster, Spotify to Tower Records. A bold disruptor, his methods brought international crime into the age of innovation, making his operations barely detectable and LeRoux nearly invisible. But he gained the attention of a small band of bold, unorthodox DEA agents, whose brief was tracking down drugs-and-arms trafficking kingpins who contributed to war and global instability. The 960 Group, an element of the DEA's Special Operations Division, had launched some of the most complex, coordinated and dangerous operations in the agency's history. They used unorthodox methods and undercover informants to penetrate LeRoux's inner circle and bring him down. For five years Elaine Shannon immersed herself in LeRoux's shadowy world. She gained exclusive access to the agents and players, including undercover operatives who looked LeRoux in the eye on a daily basis. Shannon takes us on a shocking tour of this dark frontier, going deep into the operations and the mind of a singularly visionary and frightening figure—Escobar and Victor Bout along with the innovative vision of Steve Jobs rolled into one. She puts you in the room with these people and their moment-to-moment encounters, jeopardy, frustration, anger and small victories, creating a narrative with a breath-taking edge, immediacy and a stranger-than-fiction reality. Remarkable, disturbing, and utterly engrossing, *Hunting LeRoux* introduces a new breed of criminal spawned by the savage, greed-exalting underside of the Age of Innovation—and a new kind of true crime story. It is a look into the future—a future that is dark.

"[Red Notice] does for investing in Russia and the former Soviet Union what Liar's Poker did for our understanding of Salomon Brothers, Wall Street, and the mortgage-backed securities business in the 1980s. Browder's business saga meshes well with the story of corruption and murder in Vladimir Putin's Russia, making Red Notice an early candidate for any list of the year's best books" (Fortune). "Part John Grisham-like thriller, part business and political memoir." —The New York Times This is a story about an accidental activist. Bill Browder started out his adult life as the Wall Street maverick whose instincts led him to Russia just after the breakup of the Soviet Union, where he made his fortune. Along the way he exposed corruption, and when he did, he barely escaped with his life. His Russian lawyer Sergei Magnitsky wasn't so lucky: he ended up in jail, where he was tortured to death. That changed Browder forever. He saw the murderous heart of the Putin regime and has spent the last half decade on a campaign to expose it. Because of that, he became Putin's number one enemy, especially after Browder succeeded in having a law passed in the United States—The Magnitsky Act—that punishes a list of Russians implicated in the lawyer's murder. Putin famously retaliated with a law that bans Americans from adopting Russian orphans. A financial caper, a crime thriller, and a political crusade, Red Notice is the story of one man taking on overpowering odds to change the world, and also the story of how, without intending to, he found meaning in his life.

Nominated for an Edgar Award "Exceptionally authentic."—Jill Leovy, The New York Times Book Review In the late 1980s and early 1990s, the Bronx had one of the country's highest per capita homicide rates. As crack cocaine use surged, dealers claimed territory through intimidation and murder, while families were fractured by crime and incarceration. Chronicling the rise and fall of Sex Money Murder, one of the era's most notorious gangs, reporter Jonathan Green creates a visceral and devastating portrait of a New York City borough and the dedicated detectives and prosecutors struggling to stem the tide of violence. Drawing on years of research and extraordinary access to gang leaders, law enforcement, and federal prosecutors, Green delivers an engrossing work of gritty urban reportage. Magisterial in its scope, Sex Money Murder offers a unique perspective on the violence raging in modern-day America and the battle to end it.
