Great South African Cookbook

LYRIC AMARIS

FCS Financial Management L3 SAGE Publications

This title presents the management of Early Childhood Development (ECD) centres for children from birth to nine years old.

Written Schemes of Examination ASTM International

67 of South Africa's finest cooks, chefs, gardeners, bakers, farmers, foragers and local food heroes let us into their homes - and their hearts - as they share the recipes they make for the people they love. Each recipe is accompanied by stunning original photography that captures the essence of our beautiful country. Featuring over 130 recipes, from tried and true classics to contemporary fare, The Great South African Cookbook showcases the diversity and creativity of South Africa's vibrant, unique food culture.

Mechanotechnics Pearson South Africa

Introduction to Policing, Third Edition continues to focus on the thought-provoking, contemporary issues that underscore the challenging and rewarding world of policing. Steven M. Cox, Susan Marchionna, and experienced law enforcement officer Brian D. Fitch balance theory, research, and practice to give students a comprehensive, yet concise, overview of both the foundations of policing and the expanded role of today's police officers. The accessible and engaging writing style, combined with stories from the field, make policing concepts and practices easy for students to understand and analyze. Unique coverage of policing in multicultural communities, the impact of technology on policing, and extensive coverage of policing strategies and procedures — such as those that detail the use of force — make this bestselling book a must-have for policing courses.

Managing Special Needs Alpha Science International, Limited

Engineering Science N2 serves as a user-friendly handbook both for the student and the lecturer in that it not only contains the complete theoretical component for every module, but it also has a short revision section dealing with necessary material from the previous grade.

FCS Governance L3 Pearson South Africa

This textbook fosters information exchange and discussion on all aspects of introductory matters of modern mechanical engineering from a number of perspectives including: mechanical engineering as a profession, materials and manufacturing processes, machining and machine tools, tribology and surface engineering, solid mechanics, applied and computational mechanics, mechanical design, mechatronics and robotics, fluid mechanics and heat transfer, renewable energies, biomechanics, nanoengineering and nanomechanics. At the end of each chapter, a list of 10 questions (and answers) is provided.

FCS Marketing Communication L4 Pearson South Africa

MACHINES AND MECHANISMS form the backbone of industries, implements in agriculture, space exploration, and various appliances used in our daily lives. This title contains new developments at

the core of the science of machines and mechanisms, as well as their applications in various walks of life. The contents represent contributions made by about two hundred researchers, practising engineers, and educators working in the fields of analysis and synthesis of mechanisms, robotics, compliant mechanisms, dynamics and control, design of machines for the industries, rural and agricultural sectors etc. in the 15th National Conference on Machines and Mechanisms (NaCoMM 2011). The variety of topics and the diversity of view-points should make the title significantly interesting to the beginner and expert alike in the general field of design and analysis of machines and mechanisms.

FCS Electronics L2 Pearson South Africa

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

FCS Applied Engineering Technology L4 Springer Nature

Since its first appearance in the United States in the early 1980's, AIDS has become a sweeping epidemic. At the end of 2005, the Center for Disease Control estimated that 437,982 people were living with AIDS in the United States and that number continues to rise. Medical and political communities have tirelessly struggled to develop policy that will both protect the general public from the spread of the disease as well as safeguard the rights and autonomy of those afflicted. In this third edition of *AIDS and the Law*, Margaret Jasper discusses the legalities associated with this disease, including an individual's rights regarding employment, education, health care, and insurance under various federal, state and local laws. She sets forth an overview of the medical aspects of AIDS, the testing procedures, and some of the common treatments currently available as well as briefly outlines its background and history. In addition, she tackles controversy over mandatory testing, reporting and partnership notification and also the discrimination sufferers' face. *AIDS and the Law* compiles necessary information for someone who wants to learn more about the legal issues surrounding this epidemic.

FCS Introduction to Systems Development L2 Oxford University Press, USA

Covers techniques and theory in the field, for students in degree courses for instrumentation/control,

mechanical manufacturing, engineering, and applied physics. Three sections discuss system performance under static and dynamic conditions, principles of signal conditioning and data presentation, and applications. This third edition incorporates recent developments in computing, solid-state electronics, and optoelectronics. Includes problems and bandw diagrams. Annotation copyright by Book News, Inc., Portland, OR

AIDS Law Pearson South Africa

Shortlisted for the CMI Management Book of the Year Competition 2011, Commuters' Read Category The Mobile MBA delivers all the knowledge you need to fast track your career – this is your portable business coach, explaining MBA skills, models and applications and showing you how to put the grand theory and big talk into practice. Packaged with 11 Skill-Pills, one for each chapter of the book, these can be downloaded to your smart phone, tablet or computer so you can get access to up-to-date advice on the move so you can apply your new skills where and when you need them.

Theory of Machines Pearson South Africa

AIDS and the Law provides comprehensive coverage of the complex legal issues, as well as the underlying medical and scientific issues, surrounding the HIV epidemic. Covering a broad range of legal fields from employment to health care to housing and privacy rights, this essential resource provides thorough up-to-date coverage of a rapidly changing area of law. The Fifth Edition of AIDS and the Law has been updated to include: Updates regarding medical advancements in treating and preventing HIV, including pre-exposure prophylaxis (PrEP) Analysis of the FDA's revised recommendations for blood donations from men who have sex with men Synthesized and streamlined analysis of the Americans with Disabilities Act and the ADA Amendments Act of 2008 Comprehensive discussion of housing protections for people living with HIV Updates regarding the National HIV/AIDS Strategy, including the revised Strategy released in 2015 Important developments

regarding the U.S. government's treatment of HIV-positive immigrants Discussion of the Affordable Care Act's anti-discrimination provisions for people living with HIV Overview of new international and foreign protections for people living with HIV Information on navigating the many public benefit regimes potentially available to people living with HIV Detailed discussion regarding protections for prisoners living with HIV, including new case law forbidding segregation

The Theory of Machines Pearson South Africa

While writing the book, we have continuously kept in mind the examination requirements of the students preparing for U.P.S.C.(Engg. Services) and A.M.I.E.(I) examinations. In order to make this volume more useful for them, complete solutions of their examination papers up to 1975 have also been included. Every care has been taken to make this treatise as self-explanatory as possible. The subject matter has been amply illustrated by incorporating a good number of solved, unsolved and well graded examples of almost every variety.

FCS Professional Engineering Practice L4 Longman Scientific and Technical

Suitable for users of pressure systems in the onshore petrochemical, boiler, pharmaceutical and manufacturing industries, this title explains written schemes of examination, what they are, how to draw one up, what to include, responsibilities, the role of the competent person, and when to review them. It includes references to detailed advice.
