 Highlights feminist rhetorical practices
 that disrupt and surpass boundaries of
 time and space In 1917, Alice Paul and
 other suffragists famously picketed in front
 of the White House while holding banners
 with short, pithy sayings such as "Mr.
 President: How long must women wait for
 Liberty?" Their juxtaposition of this short
 phrase with the image of the White House
 (a symbol of liberty and justice) relies on
 the same rhetorical tactics as memes, a
 genre contemporary feminists use

frequently to make arguments about
 reproductive rights, Black Lives Matter,
 sex-positivity, and more. Many such
 connections between feminists of different
 spaces, places, and eras have yet to be
 considered, let alone understood. Feminist
 Connections: Rhetoric and Activism across
 Time, Space, and Place reconsiders
 feminist rhetorical strategies as linked,
 intergenerational, and surprisingly
 consistent despite the emergence of new
 forms of media and intersectional
 considerations. Contributors to this volume
 highlight continuities in feminist rhetorical
 practices that are often invisible to
 scholars, obscured by time, new media,
 and wildly different cultural, political, and
 social contexts. Thus, this collection takes

a nonchronological approach to the study
 of feminist rhetoric, grouping chapters by
 rhetorical practice rather than time,
 content, or choice of media. By connecting
 historical, contemporary, and future
 trajectories, this collection develops three
 feminist rhetorical frameworks: revisionary
 rhetorics, circulatory rhetorics, and
 response rhetorics. A theorization of these
 frameworks explains how feminist
 rhetorical practices (past and present) rely
 on similar but diverse methods to create
 change and fight oppression. Identifying
 these strategies not only helps us rethink
 feminist rhetoric from an academic
 perspective but also allows us to enact
 feminist activist rhetorics beyond the
 academy during a time in which feminist

scholarship cannot afford to remain behind its hallowed yet insular walls.

The purpose of this study was to measure the effectiveness of a critical multicultural art curriculum, specifically for young learners. The overarching goal of the curriculum is to help students learn about diverse cultures through art, as well as encourage them to make connections about the universality of art across time and cultures. The study took place in an elementary school in West Philadelphia, over a ten week period. The unit has four objectives: increase student's appreciation for art and culture, expand student's definition of art, familiarize students with the concept of culture and provide students with a framework for critical thinking when discussing art and culture. Through action research, data was collected via observations, photographs of student's work and interviews at pre, mid and post curriculum intervals. The study concludes that non dual culture students grew to enjoy art class more as the unit progressed, whereas the dual culture students began the unit with the highest appreciation of art and culture. --Abstract. *Arts and Culture* Corwin Press

More than 40 years ago, recognizing that higher education would have to take responsibility for educating Americans about other world cultures and societies, Congress passed the National Defense Education Act (later known as the Higher Education Act). Title VI of this act has provided extensive support for foreign languages and area studies development in the nation's universities and colleges. As a result, millions of Americans have been able to acquire knowledge about other parts of the world. Today, there are new issues, demands, and perspectives. Americans are more likely than ever to encounter different cultures, business practices, histories, ideologies, and ways of life. In addition, the United States is increasingly called upon to intervene or mediate in regional and local crises far beyond its borders. U.S. educational institutions must continue to help citizens to have informed opinions about complex international problems. Changing Perspectives on International Education is designed to be used by administrators and planners in U.S. education. It covers the field of international studies as it has developed in the United States, from its beginnings and accomplishments under Title VI to the current paradigmatic shifts taking place in research, teaching, and outreach. A major section is devoted to internationalizing the curriculum of K-12 schools. It concludes with a look at future

trends and how they may affect international scholarship and training in the new century. It also provides an extensive bibliography of international resources.

This volume offers new insights into figurative language and its pervasive role as a factor of linguistic change. The case studies included in this book explore some of the different ways new metaphoric and metonymic expressions emerge and spread among speech communities, and how these changes can be related to the need to encode ongoing social and cultural processes in the language. They cover a wide series of languages and historical stages.

How Small Changes Lead To Lasting Connections Across Cultures Zondervan Brill's Companion to the Reception of Classics in International Modernism and the Avant-Garde examines the ways in which Ancient Greek and Roman culture were appropriated by a global set of authors from the late nineteenth to early twentieth centuries.

This book offers the tools teachers need to get started with a more thoughtful and compelling approach to teaching history, one that develops literacy and higher-order thinking skills, connects the past to students' lives today, and meets social studies 3C standards and most state standards (grades 6-12). The author provides over 90 primary sources organized into seven thematic units, each structured around an essential question from world history. As students analyze carefully excerpted documents--including speeches by queens and rebels, ancient artifacts, and social media posts--they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century citizen of the world. Each unit connects to current events with dynamic classroom activities that make history come alive. In addition to the documents themselves, this teaching manual provides strategies to assess student learning; mini-lectures designed to introduce documents; activities and reproducibles to help students process, display, and integrate their learning; guidance to help teachers create their own units; guidelines for respectful student debate and discussion; and more. Book Features: A timely aid for secondary school teachers tasked with meeting standards and other state-level quality requirements. An

approach that promotes student engagement and critical thinking to replace or augment a traditional textbook. Challenges to the "master narrative" of world history from figures like Queen Nzinga and Huda Sha'arawi, as well as traditionally recognized historical figures such as Pericles and Napoleon. Essential questions to help students explore seven of the most important recurring themes in world history. Role-plays and debates to promote interaction among students. Revised and restructured, this second edition of *Modern Art* traces the historical and contemporary contexts for understanding modern art movements, and the theories that influenced and attempted to explain them. Its radical approach foregoes the chronological approach to art movements in favour of looking at the ways in which art has been understood. The editors investigate the main developments in art interpretation and draw examples from a wide range of genres including painting, sculpture, photography, installation and performance art. This second edition has been fully updated to include many more examples of recent art practice, as well as an expanded glossary and comprehensive marginal notes providing definitions of key terms. Extensively illustrated with a wide range of visual examples, *Modern Art* is the essential textbook for students of art history.

Now in full color, *Arts and Culture* provides an introduction to global civilizations and their artistic achievements, history, and cultures. The authors consider two important questions: What makes a work a masterpiece of its type? And what qualities of a work enable it to be appreciated over time? Critical thinking is also highlighted throughout the text with 4 different box features that ask students to explore connections across the humanities and different cultures. These boxes are entitled Connections, Cross Currents, Then & Now, and Cultural Impact boxes. Open the new fourth edition of *Arts and Culture* and open a world of discovery. Migrant Labor and Border Securities in Pop Culture explores the conditions for migrant domestic, agricultural, and factory workers as that of continual crisis and examines how the borderlands are a workshop of neoliberalism. These borderland stories present a future of integrated networks in which the border is not just physical but temporal, separating the present time of crisis and migrant phobia, and a future of transborder interaction and settlement based on bridges and networks rather than walls and the proliferation of security technologies. Written in accessible prose for undergraduate and graduate students across American studies, immigration studies, media and cultural studies and more, this book examines the collective action seen in Latina/o cultural productions after the economic crisis and how they reach across racial and geographic lines to imagine new entities.

The Effect of a Critical Multicultural Art Curriculum on Young Learners, with an Emphasis on Dual Culture Students
Routledge

Cultural identities and cross-cultural engagement are not things that anyone can choose to ignore anymore, least of all Christians. Many of us want to have diverse friends and are passionate about

justice. But if we are serious about cross-cultural relationships--real relationships that lead to understanding, healing and solidarity across cultural lines--we need to be willing to change. And that's not something that comes easy for any of us. In *Becoming All Things*, Michelle Reyes offers a poignant discussion on the challenges surrounding cross-cultural relationships in America today, including the reasons for cultural difference, stereotyping, appropriation, gentrification, racism, and more. Seeking to deconstruct these things in our own lives, Reyes focuses on the concept of cultural accommodation in 1 Corinthians 9:19-23, and looks at the ways in which we need to adapt who we are in order to become all things to all people. The problems inherent in cross-cultural relationships have to do with us. We have to do better. With language that's witty, funny, and accessible, Reyes offers hope for majority and minority alike by showing what's possible when all of us are willing to try something new.

Asian Art is the first comprehensive anthology of important primary documents and key contemporary scholarship on Asian art history. Traces the rich artistic traditions in China, Japan, Korea, India, and Southeast Asia across time periods, media, cultural contexts, and geography - from the terracotta armies of the First Emperor of Qin to late 20th-century installation art. Covers both imperially commissioned works and popular, vernacular art. Includes an accessible introduction which provides suggestions of thematic connections across the vast array of visual culture and historical time covered. Captures the diversity and depth of Asian art through primary documents - from inscriptions and imperial decrees to writings by artists and travellers - and through examples of the very best scholarship in the field. Features introductory material for each extract, an easy-to-navigate chronological structure, and has been extensively tested by the editors and their colleagues in classrooms.

This book summarizes the systematic research on the Neolithic cultures of Taiwan, based on the latest archaeological discoveries, and focusing on the maritime interactions between mainland southeast China, Taiwan, and southeast Asia during (5600-1800 BP). The study demonstrates and sheds light on the distinctiveness of Taiwan's Neolithic cultures, their interactions with the external cultures of its surrounding regions, the maritime cultural diffusion and early seafaring across sea regions like the Taiwan Strait, Bashi channel and South China Sea. Drawing on the author's deep understanding of Taiwan and its surrounding regions, the book also incorporates recent archeological findings by Taiwanese researchers. Further, based on a new reconstruction of the spatiotemporal framework of Taiwanese prehistoric cultures, the chronologically arranged chapters discuss Neolithic cultures of the early, middle, late and final stage of this island region, revealing the prehistoric cultural development, regional typology and their maritime interactions with surrounding regions. The typological study of the native traits and external cultural influences of each stage of Neolithic culture shows the prehistoric and early history of this key stepping stone in the Asia-Pacific region.

At the forefront in its field, this Handbook examines the theoretical, conceptual, pedagogical and methodological development of media literacy education and research around the world. Building on traditional media literacy frameworks in critical analysis, evaluation, and assessment, it incorporates new literacies emerging around connective technologies, mobile platforms, and social networks. A global perspective rather than a Western-

centric point of view is explicitly highlighted, with contributors from all continents, to show the empirical research being done at the intersection of media, education, and engagement in daily life. Structured around five themes—Educational Interventions; Safeguarding/Data and Online Privacy; Engagement in Civic Life; Media, Creativity and Production; Digital Media Literacy—the volume as a whole emphasizes the competencies needed to engage in meaningful participation in digital culture.
