The Operator Handbook takes three disciplines (Red Team, OSINT, Blue Team) and combines them into one complete reference guide. The book contains 100+ individual cheat sheet references for many of the most frequently used tools and techniques by practitioners. Includes content to assist the most seasoned cybersecurity veteran or someone just getting started in the career field. The goal of combining all disciplines into one book was to remove the artificial barriers that only certain knowledge exists within a "Team". The reality is today's complex digital landscape demands some level of knowledge in all areas. The "Operator" culture should mean a well-rounded team member no matter the

"Team" you represent. All cybersecurity practitioners are Operators. The Blue Team should observe and understand Red Team tactics, Red Team should continu.

Due to the intellectual decline that befell the Muslim Ummah during the last few centuries various confusions exist today regarding Islamic jurisprudence (Fiqh). Most of these relate to misunderstanding subjects related to the principles and foundations of jurisprudence (Usul al-Fiqh). Different extremes exist today where some Muslims look at evidences

from the Qur'an and Sunnah and attempt to interpret them without having the necessary framework to extract the correct meanings. Whilst others disregard the Shari'ah evidences altogether, utilising their own logic rather than the revelation and some who believe that the doors of Ijtihad are closed. This book aims to clarify key subjects that establish the framework of Islamic juristic thinking such as: - Understanding the key terminology of Usul including Daleel, Shari'ah and Fiqh.- The definitive sources of Shari'ah - the Qur'an, Sunnah, Ijma' as-Sahabah & Qiyas.- Sources of Shari'ah not agreed upon by all Ulema (scholars) - Ijma' al-Ummah, Maslaha al-Mursalah, Istihsan, laws revealed before Islam and others.- Ijtihad, the Mujtahid & Taqleed.- An overview of the Islamic schools of thought. Most of the books written on this subject in English have been written for academic purposes and rather than for the normal reader. This 243 page paperback book has been written in a clear simple style

understandable to the average reader. Abu Ismael al-Beirawi has ammended the original book 'Studies in Usul al-Fiqh' written by Abu Tariq Hilal. He slightly restructured the book so that the definitive sources of law are discussed before those upon which there is disagreement amongst the scholars. The chapters on the Quran, Qiyas, Ijtihad and Taqleed were brief in the original. He has added to these and in some cases rewritten sections where elaboration was required. In this age of doubt and scepticism Abu Ismael felt it necessary to add some textual evidences and much needed references for some definitions and Ahadith. To distinguish this amended version from the original a new title has been given that keeps to the simplicity of the original. It is clear that in writing the original, Abu Tariq referred to Sheikh Taqiuddin an-Nabhani's (ra) masterpiece 'Shaksiyyah Islamiyyah' (The Islamic Personality). He has done the same, as well as referring to the excellent book 'Teyseer al wusool Ila al-Usul' (To make understanding Usul easy) by Sheikh Ata ibn Khalil Abu al-Rishta (May Allah protect him).

 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published

by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

The authors explain at length the principles of chemical kinetics and approaches to

computerized calculations in modern software suites — mathcad and maple. Mathematics is crucial in determining correlations in chemical processes and requires various numerical approaches. Often significant issues with mathematical formalizations of chemical problems arise and many kinetic problems can't be solved without computers. Numerous problems encountered in solving kinetics' calculations with detailed descriptions of the numerical tools are given. Special attention is given to electrochemical reactions, which fills a gap in existing texts not covering this topic in detail. The material demonstrates how these suites provide quick and precise behavior predictions for a system over time (for postulated mechanisms). Examples, i.e., oscillating and non-isothermal reactions, help explain the use of mathcad more efficiently. Also included are the results of authors' own research toward effective computations.

In the post-Enron climate corporate executives are increasingly pressured to increase productivity and create an ethical, trustworthy organizational

climate. 'Total Performance Scorecard' introduces a concept of organizational improvement and change management that combines the Balanced Scorecard model with the learning organization theory. The TPS contains a personal balanced scorecard, which is tied to an organizational balanced scorecard. These scorecards reflect not only performance goals but personal learning and growth goals as well, and the organizational scorecards also address organizational climate issues. Continuous improvement, change management, 360 degree feedback, and the learning organization are theories that the TPS makes use of in a very straightforward way. If implemented, the TPS enables a company to tie personal goals to organizational goals and tie personal performance to organizational performance, all within a culture that supports integrity, personal growth, learning, and open communication. Introductory Grammar of Amharic Harley-Davidson

This book addresses the problems of identifying human actions behind finds of bones in settlement archaeology, exemplified with the identification of ritual deposits. In order to formulate a methodological framework for approaching the identification of ritual deposits, different methods are tested on four Early Medieval case studysites: Dongjum and Leeuwarden, two artificial dwelling mounds situated in the then undiked salt marches of the Northern Netherlands, Midlaren, an inland settlement in Drenthe, also in the Northern Netherlands, and finally Uppåkra, a central place in the South of Sweden. The bone fragments from the four materials are studied in a five step process of definition, description, identification, interpretation and explanation. The deposits are discussed with the help of various archaeological, ethnographic and historical sources. The results of the analysis lead to a methodological framework for

understanding individual deposits based on a holistic perspective where all information is regarded as potentially valuable, various methods are taken into consideration, and simplification is avoided.
