BUCKLEY HARDY

Kompass Italia

HarperCollins UK

"A must-read ecological message of hope . . .

Everyone with an interest in the future of this planet should read this book." --

David Mitchell, The

Guardian When climate activist Greta Thunberg was eleven, her parents Malena and Svante, and her little sister Beata, were facing a crisis in their own home. Greta

had stopped eating and speaking, and her mother and father had

reconfigured their lives to care for her. Desperate

and searching for answers, her parents discovered what was at the heart of Greta's

distress: her imperiled future on a rapidly

heating planet. Steered by Greta's determination

to understand the truth and generate change,

they began to see the deep connections

between their own

suffering and the planet's.

Written by a remarkable family and told through

the voice of an

iconoclastic mother, Our

House Is on Fire is the

story of how they fought

their problems at home by taking global action. And it is the story of how Greta decided to go on strike from school, igniting a worldwide rebellion.

The cleaning of a work of

art often involves

removing not only dirt

and grime but also

unwanted layers of

varnish, gilding, and paint

from the work's surface.

The challenge for

conservators lies in

finding a cleaning agent

that will act on one layer

without affecting the layer being preserved and without leaving any harmful residues on the cleaned work. This book, which examines gel cleaning in the treatment of paintings and painted works of art, presents the methodologies, data, and results of a collaborative project of the Getty Conservation Institute and Winterthur Museum.

Among the issues covered

are the theory and

application of gel cleaning

systems, the detection of

residues left on the

surfaces of objects

cleaned with these

systems, research into

solvent-gel and solvent

residues, stability of

surfactants during natural

and artificial aging, and

recommendations for

formulating gels for

specific cleaning tasks.

Nordic Council of Ministers

A story of seduction,

betrayal and retribution. It is a sentimental, moralistic novel of Eighteenth century that leaves the protagonist, Charlotte, in the midst of a cunning and unforgiving world. The quest of love leaves her in America; lonely and away from home. With moral teachings and guidelines for women, the novel instantly captivates....

Mascot Books

This illustrated book, written by an experienced brewer, explains the process and steps necessary to brew top quality beers, ales, lagers, at home from natural ingredients. The book describes, step by step, a typical 'brew-day' then goes on to explain more completely the equipment that will be needed, the ingredients to include, how to generate a suitable recipe and more in-depth explanation of each of the processes required.

The Residue Question

Springer

Graffiti 101 is a coloring book for adults. To truly master graffiti, you need to be able to "burn" in black and white. No techniques, no tricks, just straight-up style. Graffiti 101 contains "outlines" by elite style writers from all

over the world. It offers anyone the opportunity to add their own flavor to a vast array of styles drawn by graffiti writers ranging from the 1970s pioneers to modern-day masters. *L'acqua in tavola.*

This book provides concise and cutting-edge reviews in astrobiology, a young and still emerging multidisciplinary field of science that addresses the fundamental questions of how life originated and diversified on Earth, whether life exists beyond Earth, and what is the future for life on Earth. Readers will find coverage of the latest understanding of a wide range of fascinating topics, including, for example, solar system formation, the origins of life, the history of Earth as revealed by geology, the evolution of intelligence on Earth, the implications of genome data, insights from extremophile research, and the possible existence of life on other planets within and beyond the solar system. Each chapter contains a brief summary of the current status of the topic under discussion, sufficient references to enable more detailed study, and descriptions of recent findings and forthcoming missions or anticipated research. Written by leading experts in astronomy, planetary science, geoscience,

chemistry, biology, and physics, this insightful and thought-provoking book will appeal to all students and scientists who are interested in life and space.

Guidelines for Quantitative Risk Assessment

UNEP/Earthprint

"An unprecedented historical account of the destruction of Brazil's Atlantic Forest, a required reading for those committed to its preservation, written with genuine love and knowledge."—José Roberto Borges, Brazil Program Director, Rainforest Action Network
"After reading this volume, no one could fail to realize the uniqueness and importance of these coastal forests, which have played such a fascinating role in the history of

Brazil."—Ghilleen T. Prance, Director, Royal Botanic Gardens, Kew

Orge de Brasserie

This richly-illustrated book presents the information necessary for fiber analysis in the field of pulp and paper. A discussion of raw-material structure and the features used for species identification in pulp is followed up by the

description of 117 fiber species. Of these, 83 are wood fibers and 34 are of nonwood origin. The tree species range across all five continents, 29 from Eurasia, 38 from North America and 16 from the southern hemisphere and the tropics. Informative micrographs, identification tables, and distribution maps aid species differentiation, making this atlas ideal for everyone interested in fiber identification.

Solvent Gels for the Cleaning of Works of Art

Courier Corporation
In this text, drawn from presentations and discussion at a May 2005 NATO Advanced Research Workshop, current approaches to the assessment and remediation of contaminated sediments are discussed with emphasis on in-situ management. The text addresses physical, chemical and biological approaches for the assessment and remediation of sediments. The development of regulatory and strategic approaches is discussed with emphasis on the potential for biological remediation in the management of contaminated sediments.

The antique clock keeps ticking, but what does it hide? Nancy seeks its secret as she and the 90s Club at Whisperwood Retirement Village discover swindlers are targeting and defrauding the residents. The scams are online, but the swindlers know too much to be strangers. Did they shoot and kill Nancy's new friend Betts? Nancy and the 90s Club pursue the killer and the con men, but the killer is no fool and attacks first. This time, the killer swears, Nancy will not escape. Another great cozy mystery featuring the 90s Club at Whisperwood Retirement Village.
