A wealth of restoration tips and techniques covering E12, E24, E28, E34, 5 and 6 Series BMWs built between 1972 and 1995.

Covers all models from 518 to M6.

Advice is given on acquiring a good BMW 5 & 6 Series model, plus tips on

restoring, engines, bodywork, trim, electrics, suspension & much more. If you have a car like this then you can save thousands as you bring it back up to specification - for your safety or as a restoration project this is the book you need. It is now 40 years since the first BMW 5 Series went down the production lines at Dingolfing. Back in 1972, only the BMW executives with the greatest of foresight

could have predicted that in 2012, the 5 Series would still be in production and still be the class leader - and it's amusing to note that the latest model - the F10 520i - is also a two litre four cylinder just as those first Fives were. BMW occupies a unique position in the hearts of car buyers and enthusiasts for no other marque of car has such a wide fan base. From what are probably the finest range of cars in the

world to an enjoyable secondhand car, through to concours events, track days to drifting championship s plus huge clubs and countless forums, no other manufacturer has such a huge and diverse following as BMW. The large numbers of the first three generations of the 5 Series that still survive attest to that, and this book is aimed at owners wanting to

know more and pick up some useful maintenance, repair and restoration tips. *Catalog of American Car I. D. Numbers 1960-69* Robert Bentley, Incorporated Davenport and Marchand bring together the knowledge managers need to make sense of "mere" data and technology. "Mastering Information Management" organizes the full range of cutting-edge ideas, tools and

techniques for successfully managing the information-driven business.
