Dragons terrorize a Virginia town, and one young man finds friendship--and love--in unlikely places in this near-future post-apocalyptic romance from Lambda award finalist R.W. Day. 'A Strong and Sudden Thaw' is a current finalist for the Lambda Literary Awards. *The Persistence of Memory* Jcp Books After exhausting their resources in the slums of Los Angeles, a junkie and his wife settle in London's "murder mile," the city's most violent and criminally corrupt section. Persevering past failed treatments, persistent temptation, urban ennui, and his wife's ruinous death wish, the nameless narrator fights to reclaim his life. In prose that could peel paint from a car, Tony O'Neill re-creates the painfully comic, often tragic days of a recovering heroin addict.

Mark Hansen thought working as artist's assistant would be glamorous, especially if that artist was a vampire. Black tie events, witty repartee, gracing the pages of the local style section.... Didn't happen. Not even once. Jonathan Varga is an enigma. True, he's quiet, generous, and scrupulously polite. But he has zero social life, refuses to be interviewed or photographed, and insists he can only consume feline blood. Why supermarket blood won't suffice, Mark hasn't asked. He's rarely at a loss for words--he can dish an insult and follow it with a snap as quick as you can say "Miss Thang." But one look at Jonathan's black-as-sin gypsy eyes, and Mark's objections drain away. So he endures the perpetual grind of their routine: Jonathan hiding in his

studio, swiping black paint onto black canvases. Mark hurling insults while he buffs the office to a shine with antiviral wipes. Each of them avoiding the other in a careful choreography...until a blurb in *Art in America* unleashes a chain of harrowing events. As secrets from Jonathan's past are brought to light, it becomes clear that all his precautions weren't nearly enough.

Camp Hell Simon and Schuster

Someone's gone through a lot of trouble to bury the past. But who?

A Queer Kind Of Love Skyhorse Publishing, Inc.
Imagine a world without hunger. In 1960, a superfood was invented that made starvation a thing of the past. Manna, the cheaply manufactured staple food, is now as ubiquitous as salt in the world's cupboards, pantries and larders. Nelson Oliver knows plenty about manna. He's a food scientist according to his diploma, that is. Lately, he's been running the register at the local video rental dive to scrape together the cash for his exorbitantly priced migraine medication. In a job fair gone bad, Nelson hooks up with copywriter Javier and his computer-geek pal Tim, who whisks them away from the worst of the fiasco in his repurposed moving truck. At least,

Nelson thinks those two are acquainted, but they're acting so evasive about it, he's not sure how they know each other, exactly. Javier is impervious to Nelson's flirting, and Tim's name could appear in the dictionary under the entry for awkward. And with a riot raging through Manhattan and yet another headache coming on, it doesn't seem like Nelson will get an answer anytime soon. One thing's for sure, the tension between the three of them is thick enough to cut with a knife...even one of those dull plastic dealies that come in the package with Mannariffic EZ-Mealz.

A PsyCop Novel Dreamspinner Press
Desmond Poole is damaged in more ways than one. If he was an underachiever before, he's entirely useless now that he's lost his right hand. He spends his time drowning his sorrows in vodka while he deliberately blows off the training that would help him master his new prosthetic. Social Services seems determined to try and stop him from wallowing in his own filth, so he's forced to attend an amputee support group. He expects nothing more than stale cookies, tepid decaf and a bunch of self-pitying sob stories, so he's blindsided when a fellow amputee catches his eye. Corey Steiner is a hot young rudeboy who works his robotic limb like an extension of his own body, and he's smitten by Desmond's crusty punk rock charm from the get-go. Unfortunately, Desmond hasn't quite severed ties with his ex-boyfriend, and Corey isn't known for his maturity or patience. Meatworks is set in a bleak near-future where cell phone and personal computer technologies never developed. In their place, robotics flourished. Now robots run everything from cars to coffee pots. Taking the guesswork out of menial tasks was

intended to create leisure time, but instead robots have made society dependent and passive. Desmond loathes robots and goes out of his way to avoid them. But can he survive without the robotic arm strapped to the end of his stump? Genre: Dystopian Science Fiction

Other Half Harper Collins

This book contains new articles by leading philosophers and linguists discussing a promising philosophical framework distinct from currently dominant ones: Linguistic Realism. As opposed to Nominalism and Chomskyan Conceptualism, this approach distinguishes between use of language, knowledge of language, and language as such. The latter is conceived as part of the realm of abstract objects. The authors show how adopting Linguistic Realism overcomes entrenched problems with other frameworks and suggest that Linguistic Realism will best serve those interested in formal linguistics, the cognitive dimension of natural language, and linguistic philosophy. The essays offer different perspectives on Linguistic Realism, either supporting this paradigm or taking it as a starting point for developing modified conceptions of linguistics and for further tying linguistics to the kind of formal theories of sensory cognition that were pioneered in visual perception by David Marr—whose work is predicated on exactly the object/knowledge distinction made by Linguistic Realists.

In his typical restrained fashion, he hasn't been sharing much about what he actually does behind its vigilantly guarded doors. And true to form, Vic hasn't asked.
