The Chinese Army Today is a comprehensive study of the Chinese military, examining its ground forces in a level of detail not found in any other contemporary works. This new, revised edition has been fully updated to take account of recent changes in the institution. In 1999, the military modernization program of the Chinese People's Liberation Army increased in intensity and achieved a focus not seen in the previous two decades. Based primarily on actual Chinese sources, this book details these changes and puts them in the context of the many traditions that still remain. Written by a retired professional military officer who has served in China, the text uses first-hand observation of the Chinese military and three decades of military experience to weave many disparate threads from official Chinese statements, documents, and media reports into an integrated whole. The author also conducts an in-depth exploration into the many forces that constitute the People's Liberation Army. This is an essential book for all students of Chinese military and security affairs, and highly recommended for students of Chinese Politics, Asian Security, and International Relations and Strategic Studies, in general.

#### Report

First published in 1985, the Handbook for Achieving Gender Equity Through Education quickly established itself as the essential reference work concerning gender equity in education. This new, expanded edition provides a 20-year retrospective of the field, one that has the great advantage of documenting U.S. national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX, the landmark federal law prohibiting sex discrimination in education, equity programs and research. Key features include: Expertise - Like its predecessor, over 200 expert authors and reviewers provide accurate, consensus, research-based information on the nature of gender equity challenges and what is needed to meet them at all levels of education. Content Area Focus - The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters including mathematics, science, and engineering. Global/Diversity Focus - Global gender equity is addressed in a separate chapter as well as in numerous other chapters. The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans, Latina/os, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students. Action Oriented - All chapters contain practical recommendations for making education activities and outcomes more gender equitable. A final chapter consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education. New Material - Expanded from 25 to 31 chapters, this new edition includes: \*more emphasis on male gender equity and on sexuality issues; \*special within population gender equity challenges (race, ability and disability, etc); \*coeducation and single sex education; \*increased use of rigorous research strategies such as meta-analysis showing more sex similarities and fewer sex differences and of evaluations of implementation programs; \*technology and gender equity is now treated in three chapters; \*women's and gender studies; \*communication skills relating to English, bilingual, and foreign language learning; and \*history and implementation of Title IX and other federal and state policies. Since there is so much misleading information about gender equity and education, this Handbook will be essential for anyone who wants accurate, research-based information on controversial gender equity issues—journalists, policy makers, teachers, Title IX coordinators, equity trainers, women's and gender study faculty, students, and parents.
