Engaging with Crisis, Insecurity and Uncertainty World Scientific

This book for children (roughly 9 to 12 years old) gives an overview of Europe and explains briefly what the European Union is and how it works.--Publisher's description.

Obesity in Europe Cambridge University Press

In the second edition of this witty and infectious book, Madsen Pirie builds upon his guide to using - and indeed abusing - logic in order to win arguments. By including new chapters on how to win arguments in writing, in the pub, with a friend, on Facebook and in 140 characters (on Twitter), Pirie provides the complete guide to triumphing in altercations ranging from the everyday to the downright serious. He identifies with devastating examples all the most common fallacies popularly used in argument. We all like to think of ourselves as clear-headed and logical - but all readers will find in this book fallacies of which they themselves are guilty. The author shows you how to simultaneously strengthen your own thinking and identify the weaknesses in other people arguments. And, more mischievously, Pirie also shows how to be deliberately illogical - and get away with it. This book will make you maddeningly smart: your family, friends and opponents will all wish that you had never read it. Publisher's warning: In the wrong hands this book is dangerous. We recommend that you arm yourself with it whilst keeping out of the hands of others. Only buy this book as a gift if you are sure that you can trust the recipient.

First and Second Language Literacy Development CRC Press

The book intends to give a state-of-the-art overview of flexoelectricity, a linear physical coupling between mechanical (orientational) deformations and electric polarization, which is specific to systems with orientational order, such as liquid crystals. Chapters written by experts in the field shed light on theoretical as well as experimental aspects of research carried out since the discovery of flexoelectricity. Besides a common macroscopic (continuum) description the microscopic theory of flexoelectricity is also addressed. Electro-optic effects due to or modified by flexoelectricity as well as various (direct and indirect) measurement methods are discussed. Special emphasis is given to the role of flexoelectricity in pattern-forming instabilities. While the main focus of the book lies in flexoelectricity in nematic liquid crystals, peculiarities of other mesophases (bent-core systems, cholesterics, and smectics) are also reviewed. Flexoelectricity has relevance to biological (living) systems and can also offer possibilities for technical applications. The basics of these two interdisciplinary fields are also summarized.

How We and All Living Things Came to Be Peter Lang GmbH, Internationaler Verlag Der Wissenschaften

For some, socialism is a potent way of achieving economic, political and social transformations in the twenty-first century, while others find the very term socialism outdated. This book engages readers in a discussion about the viability of socialist views on education and identifies the capacity of some socialist ideas to address a range of widely recognized social ills. It argues that these pervasive

social problems, which plague so-called 'developed' societies as much as they contribute to the poverty, humiliation and lack of prospects in the rest of the world, fundamentally challenge us to act. In our contemporary world-system, distancing ourselves from the injustices of others is neither viable nor defensible. Rather than waiting for radically new solutions to emerge, this book sees the possibility of transformation in the reconfiguration of existing social logics that comprise our modern societies, including logics of socialism. The book presents case studies that offer a critical examination of education in contemporary socialist contexts, as well as reconsidering examples of education under historical socialism. In charting these alternatives, and retooling past solutions in a nuanced way, it sets out compelling evidence that it is possible to think and act in ways that depart from today's dominant educational paradigm. It offers contemporary policy makers, researchers, and practitioners a cogent demonstration of the contemporary utility of educational ideas and solutions associated with socialism. A pioneering collection of essays which is central to understanding the historical and contemporary meanings of socialism in the context of neoliberal globalization. It is a most timely contribution to a growing intellectual project that challenges the hegemony of capitalism, while re-thinking and theorizing alternatives. Iveta Silova, Associate Professor of Comparative Education, Lehigh University, Bethlehem, PA, USA In this significant contribution to recent scholarship the authors use the lens of socialist education to offer an original critique of hegemonic capitalism, and present an intellectually rigorous search for alternatives by reconsidering historical socialism and advancing promising educational experiments that challenge the 'global architecture of education'. Anders Breidlid, Professor of International Education and Development, Oslo University College, Norway

Published in 1993, this book explores the rights that parents have been given over their children's schooling. Parents now have the right to choose the school their children will attend and to be involved with school management. These rights and roles for parents as customers and managers are intended to make schools more responsive to parental concerns and to improve school quality. This book considers these new roles of parents, how they affect traditional notions of home-school

partnerships, and the effect on schools. It will appeal to those interested in home-school relations, in educational governance, and in comparing British policy in these areas with that of Europe.

CoRT 1 broadens perception by demonstrating directions thinking can follow. The simplest level of thinking is to identify the situation and react to it. The next stage is to expand the way we look at a situation - to broaden perception. By introducing thinking tools students look for plus and minus points, consider all factors (consequences, aims and objectives), assess priorities, and consider other people's views. By making a deliberate effort to direct their thinking toward these areas, students develop the habit of broadening their thinking.

Emphasising the importance of continuity for young children, *The Outdoor Classroom Ages 3-7* practically demonstrates how early years settings and schools can maximise the learning potential of the outdoor environment. Fully updated to take into account the revised EYFS and Key Stage 1 curricula and including new case studies throughout, this second edition encourages teachers and practitioners to examine and reflect on their use of the outside area to ensure they provide rich play opportunities for children that will further their learning regardless of time, space or financial restraints. Drawing on the Forest School approach, this handy text considers the practical implications for settings using the outdoor classroom and covers: the characteristics of effective learning outdoors; guidance on timetabling and planning; advice on the logistics and health and safety involved; tips for navigating parental and staff opposition; closely linked theory and practice to assessment; the social and emotional aspects of learning. Full of resources, lesson plans and activities to support rich learning opportunities, this book will inspire you to think creatively about the outside area and use its full potential to bring the outdoors alive with interest, exploration and challenge.

The Revolutions of 1848 Vernon Press

An attractive and innovative four-level course for lower-secondary students. Each unit of the Student's Book is divided into 3 manageable steps with clear aims and outcomes. Students can see

quick results through regular 'Use what you know' sections at the end of each step. 'Life and culture' sections provide rich reading material while stimulating students' imaginations. There is a variety of exercises where students can work to their own level, making the course ideal for mixed ability classes. Coursework activities per module allow students to build up portfolios of work while online 'Infoquests' send students on a journey of discovery in English.

Alice in Crazyland Da Capo Press

Brighten up your classroom with English Plus Second Edition! With 80% new content, more video, new grammar animations, puzzles, and games, it's never been so easy to capture your students' attention. You'll find the same clear structure and high level of support for mixed-ability classes. With English Plus, every student can practise at the right level for them, and achieve success. You'll find graded Workbook activities, photocopiable worksheets and tests, plus fast finisher exercises to stretch stronger learners. The extra Options lessons allow you to match the course to your students' interests. The English Plus DVD brings real world language into the classroom. Four different varieties of video will motivate your students and provide them with models for expressing their own opinions and ideas. The English Plus Teacher's Resources offer a wealth of support so that you can

Literacy of Teachers Cambridge University Press

It was in 2003 that the EU Commission Directorate General for Education and Culture commissioned a «Study on young people's lifestyles and sedentariness and the role of sport in the context of education and as a means of restoring the balance». The purpose of this study was to compile an intercultural comparative analysis of adolescents' lifestyles within the EU. This analysis was based on international and national studies from the areas of epidemiology, cardiology, paediatrics, physiology, nutrition, psychology, sociology and sport sciences dealing with physical activity, fitness and motor abilities.

insight will challenge, develop and inspire your students. It will motivate and engage them with thought provoking topics and information rich texts which will challenge their opinions and inspire them to think critically about the world they live in. It will prepare them for a life of learning with a clear focus on developing their skills and autonomous learning habits. It will give your students a deeper awareness of how language works, furnishing them with not just the meaning of vocabulary but also the rules that govern its use, allowing your students to use it with confidence.

Children and Languages Today Peter Lang

"This is a history of a space - a space between the Panonian plain in the East and the most northernmost bay in the Adriatic in the West, from the eastern Alps in the North and the Dinaridic mountain area in the South. It is also a history of all the different people who lived in this area. The authors show that the Slavs did not settle an empty space and simply replace the Celto-Roman inhabitants of earlier times; they are, on the contrary, presented as the result of reciprocal acculturation. The authors show that the Slovenes made more than two important appearances throughout the entire feudal era; the same holds for later periods, especially for the twentieth century. This book offers a concise and complete history of an area that finally became an integral part of Central Europe and the Balkans."--Pub. desc.

English Plus, Level 3 Peter Lang Pub Incorporated

In this groundbreaking volume, the most influential leaders in the field provide essential information to better understand and improve the nature and quality of school and family partnerships for the benefit of all children. These experts examine the various aspects and effects of parental involvement not only on children's academic achievement, but also on their social and emotional

development. Featuring a comprehensive multidimensional framework, the text addresses critical issues facing families and educators, developmental considerations, cultural perspectives, and policy issues. Each chapter includes recommendations to help educators, parents, and policymakers create and sustain successful partnerships to support children's development.
