Confronting Inequalities SANJAY KUMAR
Women in Science and Technology: Confronting Inequalities
comprehensively explores women's status in the Science and Technology (S&T) domain by rigorously analysing and interpreting extensive recent

information on major areas such as engineering, medicine, physical sciences, biosciences and mathematics. The book forcefully demonstrates that gender-based differences and expectations play the determining role in limiting women's participation in S&T. These exist in various forms, from making subject choices in school and opting for specific disciplines in college to embracing specific career avenues such as scientific research. This book shows how the construction of gendered identities is perpetuated through a masculine culture in the informal environment of elite educational institutes and in major S&T workplaces such as academia and research laboratories, which serve together to exclude women from peer groups and

opportunities for advancement. The book makes substantive recommendations for policy measures on college admissions, improvement of institutional and organizational environments, and recruitment and capacity building for women in S&T. It calls for substantially reducing the myriad societal and familial barriers through cooperation and understanding.

Emerging Asia was the fairytale story to emerge from the economic horror that engulfed much of the world in 2008 and 2009. Even at the height of the crisis key emerging Asian economies made headlines for extraordinary macro growth numbers. But the question frequently asked is whether emerging Asian nations, especially China, will be able to sustain their pace of growth. In this timely book, Asian expert Aaron Chaze asks whether the booming Asian economies have what it takes to move away from an export-led, external-trade dominated economy and truly embrace

a free-market philosophy. The Asia Investor provides a solid framework for analyzing investment opportunities across the region and picking potential winners. Asia is buoyed by several trends that drive these opportunities and it is the analysis of these trends that forms the core of this book.
