BRENDEN WELLS

The Experience Economy Edward Elgar Publishing
 Donalyn Miller says she has yet to meet a child she couldn't turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year. Miller's unconventional approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they pick out themselves. Her love of books and teaching is both infectious and inspiring. The book includes a dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read.

Preparing for, Preventing, and Surviving a Public Relations #FAIL CRC Press

Over the past twenty to thirty years, evaluation has become increasingly important to the field of public policy. The number of people involved and specializing in evaluation has also increased markedly. Evidence of this trend can be found in the International Atlas of Evaluation, the establishment of new journals and evaluation societies, and the increase in systems of evaluation. Increasingly, the main reference point has become an assessment of the merit and value of interventions as such rather than the evaluator's disciplinary background. This growing importance of evaluation as an activity has also led to an increasing demand for the type of competencies evaluators should have. Evaluation began as a niche area within the social and behavioral sciences. It subsequently became linked to policy research and analysis, and has, more recently, become trans-disciplinary. This volume demonstrates an association between the evaluation tradition in a particular country or policy field and the nature of the relationship between social and behavioral science research and evaluative practice. This book seeks to offer comprehensive data, which lead to conclusions about patterns that transcend the gap between evaluation and the social scientific disciplines. Mind the Gap has a twofold aim. The first is to highlight and characterize the gap between evaluation practices and debates, and the substantive knowledge debates within the social and behavioral sciences. The second is to show why this gap is problematic for the practice of evaluation, while at the same time illustrating possible ways to build bridges. The book is centered on the value of producing useful evaluations grounded in social science theory and

research.

Organisation Studies and Human Resource Management Cognella Academic Publishing

Endocrine imbalances can cause a whole host of physical and mental health problems. Yet, there is currently no definitive source of information that shows how hormones can bridge the gap between mental health and medical health modalities. This book is a bold crossover between the disciplines of medical and mental health, exploring the understanding that some of the major mental diagnoses belong not only to the field of mental health but also to that of medicine. Clients with depression, anxiety, sexual dysfunction, infertility, suicidality, anger and rage, fatigue, apathy, cognitive impairments, confusion, eating disorders, and poor body image may actually be presenting symptoms of hormonal disorders. Beginning with patient stories that display the devastating effects of misdiagnosis and the struggle to obtain the correct treatment, it provides members of the mental health profession with an authentic understanding of the impact of endocrine imbalances and disorders. With contributions from some of the world's most respected physicians, psychiatrists and psychotherapists, it provides accurate medical and psychological information about hormone imbalances and disorders, how to recognise the signs in patients, and how to treat them effectively. A comprehensive resource that provides all the information needed to identify endocrine disorders in patients successfully; this book will be of immeasurable value to clinical psychologists, marriage and family therapists, social workers, doctors, nurses and mental health clinicians.

Awakening the Inner Reader in Every Child Routledge

The Closing of the American Mind, a publishing phenomenon in hardcover, is now a paperback literary event. In this acclaimed number one national best-seller, one of our country's most distinguished political philosophers argues that the social/political crisis of 20th-century America is really an intellectual crisis. Allan Bloom's sweeping analysis is essential to understanding America today. It has fired the imagination of a public ripe for change.

Brain, Mind, Experience, and School: Expanded Edition Headline Home

Since the late 1980s, green consumerism has been hailed in the West as an efficient solution to environmental problems. However, Chinese consumers have been slow to warm up to eco-friendly products. Consumers prefer SUVs to hybrid cars, health supplements and snake oil medicines to organic foods and eco-fashion is still secluded in high-end designer studios. These choices contradict the findings of many sustainable lifestyle surveys that claim to register a rising desire for green products among the Chinese. This book examines the psycho-cultural differences that disrupt the translation of "eco-friendly" appeals to

China by analyzing environmental advertising. It explores the different notions of "green", the structures of desire that underlies the advertisements, and how they are shaped by ideological, cultural, and historical differences. Rather than arguing the superiority of the American or Chinese version of green consumerism, the book interrogates the role of advertising in the global spread of Western ideologies and explores the possibilities for consumers to resist transnational corporate hegemony in the green movement. This book fills an important gap in the critical scholarship on green marketing and should be of interest to students and scholars of environment studies, green advertising and marketing, environmental communication and media studies, China studies and environmental sociology, ethics and cultural studies.

In the last two decades, the biannual ECPPM (European Conference on Product and Process Modelling) conference series has provided a unique platform for the presentation and discussion of the most recent advances with regard to the ICT (Information and Communication Technology) applications in the AEC/FM (Architecture, Engineering, Construction and *Women's Entrepreneurship and Culture* Que Publishing
 Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in *Invisible Women*, diving into women's lives at home, the workplace, the public square, the doctor's office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable exposé that will change the way you look at the world.

The Routledge Companion to Media and Tourism IGI Global
 Differences in the earnings of women and men are increasingly being used to justify regulation of the private affairs of employers and employees. Yet there is little evidence that the 'gender pay gap' is the result of unfair discrimination. In fact it can be explained by variations in the kinds of job undertaken by men and women, as well as educational and lifestyle choices. Women may favour quality of life and job satisfaction over higher earnings. The author argues that complete equality of pay is impossible to achieve in a free society of any complexity. Men and women would need to be identical in their qualifications, choice of

occupations, career plans and lifestyle choices. Thus policies that try to impose equality through tighter employment regulation are unlikely to have much impact, and such measures may damage the economic position of both men and women.

Closing the Mind Gap Jessica Kingsley Publishers

American students vary in educational achievement, but white students in general typically have better test scores and grades than black students. Why is this the case, and what can school leaders do about it? In *The Color of Mind*, Derrick Darby and John L. Rury answer these pressing questions and show that we cannot make further progress in closing the achievement gap until we understand its racist origins. Telling the story of what they call the Color of Mind—the idea that there are racial differences in intelligence, character, and behavior—they show how philosophers, such as David Hume and Immanuel Kant, and American statesman Thomas Jefferson, contributed to the construction of this pernicious idea, how it influenced the nature of schooling and student achievement, and how voices of dissent such as Frederick Douglass, Frances Ellen Watkins Harper, and W. E. B. Du Bois debunked the Color of Mind and worked to undo its adverse impacts. Rejecting the view that racial differences in educational achievement are a product of innate or cultural differences, Darby and Rury uncover the historical interplay between ideas about race and American schooling, to show clearly that the racial achievement gap has been socially and institutionally constructed. School leaders striving to bring justice and dignity to American schools today must work to root out the systemic manifestations of these ideas within schools, while still doing what they can to mitigate the negative effects of poverty, segregation, inequality, and other external factors that adversely affect student achievement. While we cannot expect schools alone to solve these vexing social problems, we must demand that they address the dignitary injustices associated with how we track, discipline, and deal with special education that reinforce long-standing racist ideas. That is the only way to expel the Color of Mind from schools, close the racial achievement gap, and afford all children the dignity they deserve.

Closing the Mind Gap Routledge

People currently live in a digital age in which technology is now a ubiquitous part of society. It has become imperative to develop and maintain a comprehensive understanding of emerging innovations and technologies. *Information and Technology Literacy: Concepts, Methodologies, Tools, and Applications* is an authoritative reference source for the latest scholarly research on techniques, trends, and opportunities within the areas of digital literacy. Highlighting a wide range of topics and concepts such as social media, professional development, and educational applications, this multi-volume book is ideally designed for academics, technology developers, researchers, students, practitioners, and professionals interested in the importance of understanding technological innovations.

Should We Mind the Gap? Emerald Group Publishing

This book explores the stress of modern life and how thoughts and feelings can both create and bridge the gap between what we have and what we want.

A Story of Comfort in Desolation Routledge

"Professor Burns has captured the essence of transportation security, one of today's most pressing concerns. As the rate of globalization and world trade increases, security and supply chain resilience are at the core of ones global transportation network. This is a timely and well written contribution to the industry." John A. Moseley, Senior Dir

SBPD Publications Simon and Schuster

The need for the creation of an enabling political, legal and economic environment for women within Turkey is rising. A

growing concern is shown at the ethnic divisions and local discrimination against women, which have spilled over into the labor market. This book lends a supporting voice to the economic and social empowerment of women globally, focusing on the real causes and the unpredictable nature of the ongoing conflicts surrounding the issue. The authors bring to the forefront problems of development within various regions and the implementation of projects, which address the state of women, inequality and risks, that are inimical to their participation in the economy. Emphasis is laid on why women should be permitted access to the many opportunities in information technology and exchange, partnership growth and networking in this digital era. The oppressive policies of Turkey are scrutinized to unravel the dangers they pose to the corporate existence of women in the modern world. Furthermore, this book centers on the deliberation on regional politics and issues on gender and women's empowerment in modern Turkey whilst comparing with other countries. The work sheds light on salient issues and possible remedies within target countries and the concerted efforts made to create a reliable structure to discuss gender conflicts. Ample contributions from countries such as the US, Germany, Serbia, South Africa and United Kingdom are pivotal to comparing and examining the main debates. Addressing several global gender-related examples as well as Turkey's national principles, this book encourages full involvement of women and girls in deciding the fate of their country. This book serves as the rallying point of an array of informative and mind-expanding works of literature in regional studies, gender studies, migration economy, and area studies in countries like Turkey, USA, Serbia, UK, and India. Experts, students, and readers in the academic sphere may find this work educative and intellectually fulfilling.

Global Learning at Home and Abroad OUP USA

Emotional intelligence is an important trait for success at work. IQ tests are biased against minorities. Every child is gifted. Preschool makes children smarter. Western understandings of intelligence are inappropriate for other cultures. These are some of the statements about intelligence that are common in the media and in popular culture. But none of them are true. In *In the Know* is a tour of the most common incorrect beliefs about intelligence and IQ. Written in a fantastically engaging way, each chapter is dedicated to correcting a misconception and explains the real science behind intelligence. Controversies related to IQ will wither away in the face of the facts, leaving readers with a clear understanding about the truth of intelligence.

In the Know Engaged Learning and Teach

For Dash and Lily, it's beginning to look a lot like...distance! Just in time for the series release of *Dash & Lily* on Netflix comes a new helping of love--this time across the pond as best-selling authors Rachel Cohn and David Levithan send Dash and Lily to England. Dash and Lily were feeling closer than ever...it's just too bad they're now an ocean apart. After Dash gets accepted to Oxford University and Lily stays in New York to take care of her dogwalking business, the devoted couple are struggling to make a long distance relationship work. And when Dash breaks the news that he won't be coming home for Christmas, Lily makes a decision: if Dash can't come to her, she'll join him in London. It's a perfect romantic gesture...that spins out of Lily's control. Soon Dash and Lily are feeling more of a gap between them, even though they're in the same city. Will London bring them together again--or will it be their undoing?

ECPPM 2014 John Wiley & Sons

Ethnography, with all its limitations, has as its strongest impulse the quest to see and understand "others" on their own terms and to step out of our own viewpoints in order to do so. Conjoining ethnography with mindfulness, this book aims to support the best aspects of ethnography by enhancing the capacity to listen more

deeply, see more expansively, keep a check on our biases and connect more compassionately with others. *Mindful Ethnography* addresses a central dilemma of ethnography: the relationship of self and other. It suggests ways of viewing the world from different perspectives, getting beyond the categories of our culture and working with our own thoughts and feelings even as we aim to understand those of our participants. Chapters address various stages of ethnographic research: entering a field and seeing it for the first time, immersing in ongoing participant observation, writing up elaborated fieldnotes, analysis, the re-presentation of results and letting it go. It offers illustrations and activities for researchers to try. The book is aimed at students and researchers who are stepping into the craft of ethnography or looking for new ways in and through ethnographic research. It is for researchers who want to integrate scholarship, social activism and spiritual pursuits in order to do research that is deeply engaged with and transformative of the world.

Mind the Gap Mind the GapCoping with Stress in the Modern World

Thoroughly updated for its Fifth Edition, this convenient, portable handbook is a comprehensive guide to the evaluation of more than 530 signs and symptoms. It has all the assessment information busy clinicians need in a single source. Each entry describes the sign or symptom and covers emergency interventions if needed, history and physical examination, medical and other causes with their associated signs and symptoms, and special considerations such as tests, monitoring, treatment, and gender and cultural issues. This edition identifies specific signs and symptoms caused by emerging diseases such as avian flu, monkeypox, respiratory syncytial virus, norovirus, metabolic syndrome, blast lung injury, Kawasaki disease, and popcorn lung disease.

Perspectives on Policy Evaluation and the Social Sciences Routledge

From the author of *Eating the Sun*, an artistic collection of more than 50 drawings featuring unique, funny, and poignant foreign words that have no direct translation into English Did you know that the Japanese language has a word to express the way sunlight filters through the leaves of trees? Or that there's a Finnish word for the distance a reindeer can travel before needing to rest? *Lost in Translation* brings to life more than fifty words that don't have direct English translations with charming illustrations of their tender, poignant, and humorous definitions. Often these words provide insight into the cultures they come from, such as the Brazilian Portuguese word for running your fingers through a lover's hair, the Italian word for being moved to tears by a story, or the Swedish word for a third cup of coffee. In this clever and beautifully rendered exploration of the subtleties of communication, you'll find new ways to express yourself while getting lost in the artistry of imperfect translation.

Danger and Risk as Challenges for HRM Penguin Random House South Africa

Co-published with Showcasing recent, multi-institutional research related to global learning, this book expands the context of global learning to show its antecedents and impacts as a part of the larger higher education experience. Chapters look at recent developments such as short-term, off-campus, international study and certificate/medallion programs, as well as blended learning environments and undergraduate research, all in the context of multi-institutional comparisons. Global learning is also situated in a larger university context. Thus, there is a growing need for bridging across disciplinary and administrative silos, silos that are culturally bound within academia. The gaps between these silos matter as students seek to integrate off- and on-campus learning, and it is up to the academy to mind those gaps.
