Brannigan's Building Construction for the Fire Service, Fourth Edition is a must read for fire fighters, prospective fire fighters, and fire science students. This edition continues the Brannigan tradition of using plain language to describe technical information about different building types and their unique hazards. This text ensures that critical fire fighting information is easy-to-understand and gives valuable experience to fire fighters

before stepping onto the fireground. The first edition of Building Construction for the Fire Service was published in 1971. Frank Brannigan was compelled to write the most comprehensive building construction text for the fire service so that he could save fire fighters' lives. His passion for detail and extensive practical experience helped him to develop the most popular text on the market. His motto of: "Know your buildings," informs

every aspect of this new edition of the text. Listen to a Podcast with Brannigan's Building Construction for the Fire Service, Fourth Edition co-author Glenn Corbett to learn more about this training program! Glenn discusses his relationship with the late Frank Brannigan, the dangers of heavy construction timber, occupancy specific hazards, and other areas of emphasis within the Fourth Edition. Grand explanations of how to understand the complex twenty-first-century world have all fallen short—until now. In *The Second World*, the brilliant young scholar Parag Khanna takes readers on a thrilling global tour, one that shows how America's dominant moment has been suddenly replaced by a geopolitical marketplace wherein the European Union and China compete with the United States to shape world order on their own terms. This contest is hottest and most decisive in the Second World: pivotal regions in Eastern Europe, Central Asia, Latin America, the Middle East, and East Asia. Khanna explores the evolution of geopolitics through the recent histories of such underreported, fascinating, and complicated countries as Azerbaijan, Uzbekistan, Colombia, Libya, Vietnam, and Malaysia—nations whose resources will ultimately determine the fate of the three superpowers, but whose futures are

perennially uncertain as they struggle to rise into the first world or avoid falling into the third. Informed, witty, and armed with a traveler's intuition for blending into diverse cultures, Khanna mixes copious research with deep reportage to remake the map of the world. He depicts second-world societies from the inside out, observing how globalization divides them into winners and losers along political, economic, and cultural lines—and shows how China, Europe, and America use their unique imperial gravities to pull the second-world countries into their orbits. Along the way, Khanna also explains how Arabism and Islamism compete for the Arab soul, reveals how Iran and Saudi Arabia play the superpowers against one another, unmasks Singapore's inspirational role in East Asia, and psychoanalyzes the second-world leaders whose decisions are reshaping the balance of power. He captures the most elusive formula in international affairs: how to think like a country. In the twenty-first century, globalization is the main battlefield of geopolitics, and America itself runs the risk of descending into the second world if it does not renew itself and

redefine its role in the world. Comparable in scope and boldness to Francis Fukuyama's *The End of History and the Last Man* and Samuel P. Huntington's *The Clash of Civilizations and the Remaking of World Order*, Parag Khanna's *The Second World* will be the definitive guide to world politics for years to come. "A savvy, streetwise primer on dozens of individual countries that adds up to a coherent theory of global politics." -Robert D. Kaplan, author of *Eastward to Tartary* and *Warrior Politics* "A panoramic overview that boldly addresses the dilemmas of the world that our next president will confront." -Dr. Zbigniew Brzezinski, former national security advisor "Parag Khanna's fascinating book takes us on an epic journey around the multipolar world, elegantly combining historical analysis, political theory, and eye-witness reports to shed light on the battle for primacy between the world's new empires." -Mark Leonard, Executive Director, European Council on Foreign Relations "Khanna, a widely recognized expert on global politics, offers an study of the 21st century's emerging "geopolitical marketplace" dominated by three "first

world" superpowers, the U.S., Europe and China... The final pages of his book warn eloquently of the risks of imperial overstretch combined with declining economic dominance and deteriorating quality of life. By themselves those pages are worth the price of a book that from beginning to end inspires reflection." -Publishers Weekly

 Combinatorial Chemistry is a genuine practical guide covering all the major areas of combinatorial chemistry from an experimental and conceptual point of view. Being one of the most powerful of modern technologies, combinatorial chemistry has had implications to many areas of chemistry and biology and the current approaches to drug, catalyst, receptor, and materials development and discovery are all included in this volume. It also contains protocols on solid, liquid, and solution phase synthesis and expedient methods of library screening and evaluation. The use of automation and robotics is also explained. It is written at a level easily accessible to novices and will

enable readers to use combinatorial techniques to the best advantage.

 Digital Reference Services in Academic Libraries presents the background of DRS, evolution of DRS, the concept of DRS, emerging models of DRS, benefits and limitation of DRS, personalized services, trends and challenges, technological developments, evaluation and guidelines, effectiveness and DRS in academic libraries. The case study examined the existing status of digital reference services (DRS) in four selected public academic libraries in Malaysia. Focused is given on the awareness, usage, users' perception, users' satisfaction, library's performance, and looked at the perceived needs, issues and problems faced by librarians and students. The study is important to determine how academic librarians are exploiting the latest information and communication technologies to improve reference service operations. Recommendations are made on the need for the implementation of synchronous DRS, enhancing the role of DRS, marketing and promotion, staff training, user

education programmes and cooperation. The main contribution of this book is the assessment of effectiveness of DRS in academic libraries in Malaysia, the identification of perceived needs, issues and problems and suggestions on the areas of improvement in the use of DRS. In the process, a conceptual model for the effectiveness of the implementation of DRS in academic libraries in Malaysia is presented. The author also proposes directions for future research in the area of DRS.

A compelling investigation of how intense psychological suffering can lead to a dramatic shift into a new, expansive identity Why do some people who experience the worst that life has to offer respond not by breaking down but by shifting up, into a higher-functioning, awakened state, like phoenixes rising from the ashes? And perhaps more importantly, how can we emulate their transformations? Over many years of observing and studying the phenomenon of life-changing awakening through extreme suffering, Steve Taylor coined the term “transformation through turmoil.” He

calls these people “shifters” and here shares dozens of their amazing stories. In addition, Taylor uncovers the psychological processes that explain these miraculous rebirths after years of struggle or devastating loss, addiction, or imprisonment. He highlights a number of lessons and guidelines that the shifters offer us. In *Extraordinary Awakenings*, readers will find not only riveting stories of transformation that show the amazing resilience of the human spirit, but also hope and guidance to call on during their own struggles, together with inspiration and profound food for thought.

Private Lender Playbook Kementerian Sains Teknologi Dan Alam Sekitar Malaysia Is it time to give up on rehabilitating criminals? Record numbers of Americans are going to prison, and most of them will eventually return to society with a high chance of becoming repeat offenders. But a decision to abandon rehabilitation programs now would be premature warns Ann Chih Lin, who finds that little attention has been given to how these programs are actually implemented and why they tend to fail. In *Reform in the Making*, she not only supplies much-needed information on

the process of program implementation but she also considers its social context, the daily realities faced by prison staff and inmates. By offering an in-depth look at common rehabilitation programs currently in operation--education, job training, and drug treatment--and examining how they are used or misused, Lin offers a practical approach to understanding their high failure rate and how the situation could be improved. Based on extensive observation and over 350 interviews with staff and prisoners in five medium-security male prisons, the book contrasts successfully implemented programs with subverted, abandoned, or neglected programs (those which staff reject or which do not teach prisoners anything useful). Lin explains that staff and prisoners have little patience with programs aimed at long-range goals when they must face the ongoing, immediate challenge of surviving prison life. Finding incentives to make both sides participate fully in rehabilitation is among the book's many contributions to improving prison policy.

“A delightfully original take on...the

prospects for liberal democracy in the broader Islamic Middle East.”—Matthew Kaminski, Wall Street Journal As the Arab Spring threatens to give way to authoritarianism in Egypt and reports from Afghanistan detail widespread violence against U.S. troops and women, news from the Muslim world raises the question: Is Islam incompatible with freedom? In *Islam without Extremes*, Turkish columnist Mustafa Akyol answers this question by revealing the little-understood roots of political Islam, which originally included both rationalist, flexible strains and more dogmatic, rigid ones. Though the rigid traditionalists won out, Akyol points to a flourishing of liberalism in the nineteenth-century Ottoman Empire and the unique “Islam-liberal synthesis” in present-day Turkey. As he powerfully asserts, only by accepting a secular state can Islamic societies thrive. *Islam without Extremes* offers a desperately needed intellectual basis for the reconcilability of Islam and liberty.

Part of the Essential Public Health Series, *Essentials of Public Health Research Methods* is specifically written for undergraduate students studying public health who want to fully understand the range of research methods as applied to public health. Using the circular model of public health research as an overarching framework, *Essentials of Public Health Research Methods* provides a clear, time-tested methodology that leads students step-by-step through the research process -- from framing the questions, identifying the study design and choosing methodology to collecting and analyzing data, and disseminating research findings. By following this process, students learn about various facets of public health, while

also learning how to select and apply various research methodologies.

50 Simple Things You Can Do to Save the Earth W. W. Norton & Company

The many advances in psittacine medicine since the previous edition was published in 1996 are reflected in this Manual, which has been updated and rewritten under the direction of a new editorial partnership. The extended use of colour photographs adds to the extra usefulness of this successor to a well loved volume. Clinical examination is presented in a logical, highly practical way, with integrated photographs of key features. The chapter ends with notes on critical and emergency cases. The basic techniques of injection, crop tubing, microchipping, and wing, claw and beak clipping are described and illustrated. The role of clinical pathology is demonstrated, including colour images of haematology and cytology, and a step-by-step post-mortem examination procedure is presented. Diagnostic imaging encompasses radiography, ultrasonography and endoscopy, with views of both normal and abnormal presentations. Surgical principles plus procedures for both soft and hard tissues

are then described. Subsequent chapters cover systemic illnesses and disease by individual organ system. These are designed to be read in their entirety or to be referred to as needed. For general practitioners the most commonly seen psittacine patients are small parrots, Cockateils and Budgerigars. A chapter is therefore devoted to dealing with common problems in these small patients. This practical approach to the sick bird is extended in an appendix of diagnostic algorithms for common presentations such as 'fluffing up', fitting and feather damage. The editors both developed their interests in avian medicine from general practice and this has resulted in a practical, easy-to-use and relevant guide to psittacine medicine.

Family Law in Malaysia John Wiley & Sons
This open access book explores the concept of Industry 4.0, which presents a considerable challenge for the production and service sectors. While digitization initiatives are usually integrated into the

central corporate strategy of larger companies, smaller firms often have problems putting Industry 4.0 paradigms into practice. Small and medium-sized enterprises (SMEs) possess neither the human nor financial resources to systematically investigate the potential and risks of introducing Industry 4.0. Addressing this obstacle, the international team of authors focuses on the development of smart manufacturing concepts, logistics solutions and managerial models specifically for SMEs. Aiming to provide methodological frameworks and pilot solutions for SMEs during their digital transformation, this innovative and timely book will be of great use to scholars researching technology management, digitization and small business, as well as practitioners within manufacturing companies.

The Myth of the Lazy Native is Syed Hussein Alatas' widely acknowledged

critique of the colonial construction of Malay, Filipino and Javanese natives from the 16th to the 20th century. Drawing on the work of Karl Mannheim and the sociology of knowledge, Alatas analyses the origins and functions of such myths in the creation and reinforcement of colonial ideology and capitalism. The book constitutes in his own words: 'an effort to correct a one-sided colonial view of the Asian native and his society' and will be of interest to students and scholars of colonialism, post-colonialism, sociology and South East Asian Studies.
