If I gave you a box of carpentry tools, could you build me a house? While having the right tools to do a project is a great first step, you still need to learn the overall process of how and when to use those tools to achieve your goals, knowledge that few other web design books present. This book starts from the assumption that you have the right tools -- an Internet connection and a web authoring program or an HTML reference book -- to begin with. (If you don't, the first chapter will bring you up to speed.) Then in clean, clear language, it steps you through the web design and development process from start to finish, from a successful studio owner's perspective: Brainstorming site goals, gathering and converting content, developing a strategic site architecture, balancing elements of tone, message, and navigation, prototyping and presenting designs, organizing and trafficking files, production, subcontracting, publishing and promotion. Whether you're working on a 5-page site for your community organization or you're the project manager for a huge portal site for a Fortune 100, this book will provide you with the essential strategies and checkpoints that ensure a successful web site. Anne-Marie Concepcion is the founder and creative director of a busy cross-media (web, print, and CD-ROM) design firm in Chicago, Illinois. She is a seasoned new media consultant and an Adobe and Quark certified trainer. Her clients have included the

Donnelley and Sons, LobsterGram, the Chicago Tribune and World Book Encyclopedia (for which she wrote their inaugural Desktop Publishing entry in 1994).
