We have gathered a variety of Java exercises

(with answers) for each Java Chapter. Try to solve an exercise by editing some code, or show the answer to see what you've done wrong. Count Your Score. You will get 1 point for each correct answer. Your score and total score will always be displayed. Java Exercises - W3Schools Java exercises - loops: while loop; Java exercises - loops: do while loop; Java exercises - array (Sort an array) Java exercises - array (Search an element of the array) Java exercises - array (Answer statistical information) Java exercises - array (Present data in stem/leaf form) Java exercises - OOP Build a singly linked list; Java exercises - OOP (Define linked list item) Java exercises and solutions: loops in Java Exercise 1: Program Reverse.java stores integers in an array and prints the

given integers in reverse order. Make a copy of Reverse.java and modify it so that it takes exactly seven integers to the array. Also, the program must ensure that the given integers are in the range from 1 to 39. In this exercise you need to put an construct inside the java exercises more - naturalprogramming.com Java Search Exercises [7 exercises with solution] [An editor is available at the bottom of the page to write and execute the scripts.] 1. Write a Java program to find a specified element in a given array of elements using Binary Search. Go to the editor Click me to see the solution. 2. Java Search: Exercises, Practice, Solution - w3resource Exercise 1: Write Java program to allow the user to input his/her age. Then the program will show

if the person is eligible to vote. Then the program will show if the person is eligible to vote. A person who is eligible to vote must be older than or equal to 18 years old.

Java exercises and solutions:
Java if else
Java Method Exercises [16 exercises with solution]

1. Write a Java method to find the smallest number among three numbers. Go to the editor
Test Data: Input the first number: 25
Input the Second number: 37
Input the third number: 29
Expected Output: The smallest value is 25.0
Click me to see the solution.

2. Java Method exercises and solution - w3resource
Java Basic Exercises [150 exercises with solution]
[An editor is available at the bottom of the page to write and execute the scripts.]

1. Write a Java program to print 'Hello' on screen and then print your

name on a separate line. Go to the editor
Expected Output: Hello Alexandra
Abramov. Click me to see the solution.

2. Java Basic Programming Exercises - w3resource
Java Conditional Statement Exercises [32 exercises with solution]

1. Write a Java program to get a number from the user and print whether it is positive or negative. Go to the editor.
Test Data Input number: 35
Expected Output: Number is positive
Click me to see the solution.

2. Write a Java program to solve quadratic equations (use if, else if and else).

Java Exercises: Conditional Statement exercises - w3resource

Exercise 1: Write a Java program to detect key presses. If the user pressed number keys (from 0 to 9), the program will tell the number that is pressed, otherwise, program will show

"Not allowed".Java exercises and solutions: switch caseExercises on Classes Ex: The Circle Class (An Introduction to Classes and Instances). This first exercise shall lead you through all the basic concepts in OOP.. A class called circle is designed as shown in the following class diagram.
