A landmark publication in the social sciences, Linda Lindsey's *Gender* is the most comprehensive textbook to explore gender sociologically, as a critical and fundamental dimension of a person's identity, interactions, development, and role and status in society. Ranging in scope from the everyday lived experiences of individuals to the complex patterns and structures of gender that are produced by institutions in our global society, the book reveals how understandings of gender vary across time and place and shift along the intersecting lines of race, ethnicity, culture, sexuality, class and religion. Arriving at a time of enormous social change, the new, seventh edition extends its rigorous, theoretical approach to reflect on recent events and issues with insights that challenge conventional thought about the gender binary and the stereotypes that result. Recent and emerging topics that are investigated include the #MeToo and LGBTQ-rights movements, political misogyny in the Trump era, norms of masculinity, marriage and family formation, resurgent feminist activism and praxis, the gendered workplace, and profound consequences of neoliberal globalization. Enriching its sociological approach with interdisciplinary insight from feminist, biological, psychological, historical, and anthropological perspectives, the new edition of *Gender* provides a balanced and broad approach with readable, dynamic content that furthers student understanding, both of the importance of gender and how it shapes individual trajectories and social processes in the U.S. and across the globe.

In a world where global restructuring is leading to both integration and fragmentation, the meaning and practice of

development are increasingly contested. New voices from the South are challenging Northern control over development. *Feminism/Postmodernism/Development* is a comprehensive study of this power struggle. It examines new issues, "voices", and dilemmas in development theory and practice. Drawing on the experiences of women from Africa, Latin America, and Asia, as well as women of colour, this collection questions established development practices and suggests the need to incorporate issues such as identity, representation, indigenous knowledge, and political action. *Feminism/Postmodernism/Development* acknowledges the importance of Third World and minority women's experiences. It acknowledges their importance for development and suggests that postmodernist insights can enhance their quest for empowerment.

Theoretical Perspectives on Gender and Development NYU Press
Gendering Theory in Marketing and Consumer Research showcases state-of-the-art scholarship on gender in the field of marketing and consumer research. The book presents seven original contributions by a group of internationally renowned academics, who take up the task of theorising gender and gendering theory in new ways, accommodating recent intersectional, material-discursive, and practice-oriented theorisations. Connecting the study of marketing and consumer behaviour to different theoretical perspectives on gender, the contributors explore and critically examine the gendered nature and dimensions of contemporary marketplace activity. Through innovative conceptual development and insightful empirical analyses, the book offers important scholarly contributions to the literature on gender, marketing, and consumer research, and

advances our understanding of gender as lived experience and socially regulated performance. It also frequently employ an intersectionalist perspective, theorising gender as only a part of one's subject position, which is constituted by mutually reinforcing categories. The book will be essential reading for students, scholars, and practitioners who are interested in the implications and contemporary manifestations of gender as a cultural category in the marketplace. This book was originally published as a special issue of the *Journal of Marketing Management*.

A Theoretical Perspective on Gender Differences Yale University Press

This book brings to light work done in the area of gender with a penchant to language within the Cameroonian context. It looks at different domains of gender study where language is a significant variable. It is the very first edited collection that examines language and gender side by side. Contributors draw richly on their current theoretical leanings and on the current gendered discourses within the Cameroonian context to interrogate the

interconnections between gender and language through social relationships and interactions. This is a pluri-disciplinary study informed by perspectives from anthropology, sociology and applied linguistics. The book hinges on gender, discourse and social change in historical perspective. Gender and language studies contribute to knowledge of new problems in view of a better understanding of relations between women and men, and its amelioration in the social space. Gender and language studies necessarily incorporate gender and discourse studies. Discourse serves as a unifying factor to these diverse disciplines which bring external support to pure linguistic studies, not only to deepen the understanding of gender but more so to describe how it works in discourse. Here, discourse is seen as being at the centre of gender ideology.

"This book presents an up-to-date analysis of women as victims of crime, as individuals under justice system supervision, and as professionals in the field. The text features an empowerment approach that is unified by underlying themes of the intersection of gender, race, and class, and evidence-based research. Personal narratives supplement research and statistics to help students connect the text material with real-life situations. This new edition is informed by consideration of major ongoing social movements such as #MeToo, Black Lives Matter, and the fight to reduce mass incarceration. The text stresses contemporary topics such as recognition of lesbian, bisexual, and transgender issues in juvenile and adult facilities; the introduction of trauma-informed care in detention centers and prisons; the criminalization of Black girls and women; the effects of an increasingly militarized police culture; and the contributions of Ruth Bader Ginsburg and other influential women. With its emphasis on critical thinking, this text is ideal for undergraduate courses concerning women in the justice system"--

Handbook of the Sociology of Gender Routledge

During the past three decades, feminist scholars have successfully demonstrated the ubiquity and omnirelevance of gender as a sociocultural construction in virtually all human collectivities, past and present. Intrapsychic, interactional, and collective social processes are gendered, as are micro, meso, and macro social structures. Gender shapes, and is shaped, in all arenas of social life, from the most mundane practices of everyday life to those of the most powerful corporate actors. Contemporary understandings of gender emanate from a large community of primarily feminist scholars that spans the gamut of learned disciplines and also includes non-academic activist thinkers. However, while incorporating some cross-disciplinary material, this volume focuses specifically on sociological theories and research concerning gender, which are discussed across the full array of social processes, structures, and institutions. As editor, I have explicitly tried to shape the contributions to this volume along several lines that reflect my long-standing views about sociology in general, and gender sociology in particular. First, I asked authors to include cross-national and historical material as much as possible. This request reflects my belief that understanding and evaluating the here-and-now and working realistically for a better future can only be accomplished from a comparative perspective. Too often, American sociology has been both tempero- and ethnocentric. Second, I have asked authors to be sensitive to within-gender differences along class, racial/ethnic, sexual preference, and age cohort lines.

Feminist Theory in Diverse Productive Practices is the second of two volumes examining gender and feminist theory in Educational Philosophy and Theory. This collection explores the difference that gender and sexual identities make both to theorizing and working in education and other fields. As the articles contained in this text span nearly 40 years of scholarship related to these issues, this volume sheds light on how feminist, gender, and sexuality theory has evolved within and beyond the field of philosophy of education over time. Key themes explored in the book include women's ways of knowing, the challenges women (and girls) face in taking up professional employment across diverse fields historically and today, and how feminist and related theories can enable women in professional development roles to empower each other. The book tells a rich story of how gender and sexuality theory has been brought to bear on discussions of educational practice in diverse fields over decades of publication of *Educational Philosophy and Theory*. *Feminist Theory in Diverse Productive Practices* will be key reading for academics, researchers and postgraduate students in the fields of philosophy of education, philosophy, education, educational

theory, post-structural theory, and the policy and politics of education.

Philosophising Experiences and Vision of the Female Body, Mind, and Soul: Historical Context and Contemporary Theory Routledge
For decades, the field of gender, sex, and sexualities has been a focal point of increasing interest. This inquiry has been ignited by successive waves of dramatic social change, chief among them: the re-emergence of feminist movements in the U.S. and Europe in the late 1960s; the sustained (and increasingly successful) bids for legal, social, and religious acceptance of non-heterosexual sexualities in many parts of the world; and the burgeoning number of people (whether cisgendered, gender-variant, trans, or questioning) whose individual and collective experiences of gender and sexuality warrant deeper understanding and further progress toward a fuller realization of human potential and civil rights. In psychology, the intellectual project of understanding gender, sex, and sexualities encompasses a variety of subfields spanning neuroscience and developmental, cognitive, social, and cultural psychology, as well as critical theory. As such, these approaches have inspired new and different psychological questions, as well as increased interest in previously unfamiliar topics of investigation. Edited by Nancy K. Dess, Jeanne Marecek, and Leslie C. Bell, *Gender, Sex, and Sexualities* offers both students and scholars the tools they need to consider and approach such questions as: how do children come to embrace (or repudiate) gendered activities and identities; how do people experience intimacy, desire, and sexual arousal; and what strategies can psychologists use to de-center their own points of view and effectively contribute to a decolonial psychology? As a

result, this volume will open new avenues of inquiry as well as cross-disciplinary conversations for readers everywhere.

Law Against Discrimination Routledge

Nancy Chodorow, in her groundbreaking book *The Reproduction of Mothering*, quite simply changed the conversation in at least three areas of study: psychoanalysis, women's studies, and sociology. In her latest book, *Individualizing Gender and Sexuality*, she examines the complexity and uniqueness of each person's personal creation of sexuality and gender and the ways that these interrelate with other aspects of psychic and cultural life. She brings her well-known theoretical agility, wide-ranging interdisciplinarity, and clinical experience to every chapter, advocating for the clinician's openness, curiosity, and theoretical pluralism. The book begins with reflections on Freud's *Three Essays on the Theory of Sexuality*, followed by considerations of Melanie Klein and Stephen Mitchell, as well as on her own work and on the postmodern turn in psychoanalytic gender theory. Subsequent chapters address contemporary clinical-cultural issues such as women and work, women and motherhood, and men and violence. Concluding chapters elaborate on the multiple ingredients and the personal affective, conflictual, and defensive constellations and processes that create sexuality and gender in each individual. Ending with a chapter on homosexualities as compromise formations, Chodorow deepens her account of clinical individuality and sex-gender transference-countertransference while bringing her readers back to Freud and to the many strands that followed, as she consolidates a consistent line of interest in sexuality and gender, theory and practice, sustained over a lifetime.

Vivid narratives, fresh insights, and new theories on where gender theory and research stand today Since scholars began interrogating the meaning of gender and sexuality in society, this field has become essential to the study of sociology. Gender Reckonings aims to map new directions for understanding gender and sexuality within a more pragmatic, dynamic, and socially relevant framework. It shows how gender relations must be understood on a large scale as well as in intimate detail. The contributors return to the basics, questioning how gender patterns change, how we can realize gender equality, and how the structures of gender impact daily life. Gender Reckonings covers not only foundational concepts of gender relations and gender justice, but also explores postcolonial patterns of gender, intersectionality, gender fluidity, transgender practices, neoliberalism, and queer theory. Gender Reckonings combines the insights of gender and sexuality scholars from different generations, fields, and world regions. The editors and contributors are leading social scientists from six continents, and the book gives vivid accounts of the changing politics of gender in different communities. Rich in empirical detail and novel thinking, Gender Reckonings is a lasting resource for students, researchers, activists, policymakers, and everyone concerned with gender justice.

This text provides perspectives on the way in which gender plays a role in leadership dynamics and ethics within organizations. It seeks to offer new theoretical models for thinking about leadership and organizational influence. Most studies of women's leadership draw on an ethics of care as characteristic of the way women lead, but as such, it tends towards essentialist gender stereotypes and does little to explain the complex systemic variables that influence the functioning of women within organizations. This book moves beyond the canon in exploring alternative paradigms for thinking about leadership and gender in organizations. The authors draw on the literature available in systems thinking, systemic leadership, and gender theory to offer alternative perspectives for thinking about the ways women lead. The book offers invaluable theoretical perspectives and insightful narratives to graduate students and researchers who are interested in women's leadership, gender and organization. It will be of interest to all women in leadership positions, but specifically to those interested in understanding the systemic nature of leadership and their role within it.
