Boys' Life

In 1970, President Richard Nixon created the Environmental Protection Agency (EPA) to confront environmental pollution and protect the health of the American people. One of the EPA's top priorities was consolidating numerous state offices to more efficiently carry out its goal of "working for a cleaner, healthier

environment for the American people." But there was one area in which the EPA--like many government agencies of the time--was terribly inefficient: their graphic design and communications department. Millions of dollars were being wasted annually due to nonstandardized formats, inefficient processes and almost everything being designed from scratch. In 1977 the EPA began working with the legendary New York design firm Chermayeff & Geismar (now Chermayeff & Geismar & Haviv, or CGH), responsible for some of the most recognizable visual identities in the world, such as Chase Bank, PBS, National Geographic, the Smithsonian Institution, Mobil Oil and NBC. Partners Ivan Chermayeff, Tom Geismar and Steff Geissbuhler set about tackling this problem. The result was the 1977 US Environmental Protection Agency Graphic Standards System. Forty years later, Jesse Reed & Hamish Smyth--creators of the NYCTA and NASA Graphics Standards Manual reissues--have partnered with CGH and AIGA, the US's oldest and largest professional organization

for design, to publish this classic graphic standards EPA manual as a hardcover volume. Each page is reproduced at the same size as the original three-ring binder pages, using the same vibrant Pantone inks with a total of 14 colors.

Manual of the Mineralogy of Great Britain and

Ireland

Reprint of the original, first published in 1871. Liverpool and Manchester Photographic Journal

This is the third edition of a successful book which offers students and practitioners an up-to-date overview of developments in Internet law and practice. The editors have once again assembled a team of specialist authors to write about those aspects of Internet law which are of special importance in the global regulation of the Internet and focussed around three principal themes- e-commerce, intellectual property, and privacy, data protection and cyber-crime with, in addition a major contribution on Internet Governance. This edition incorporates for the first time areas such as data protection, privacy and electronic surveillance, cyber crime and cyber security, jurisdiction and dispute resolution online. The section on IP contains clear and comprehensive analysis of the many and varied ways in which IP and the internet intersect including open source licenses and the IP problems around search engines. The new edition also takes account of all current cases and

legislation, including the draft revised EC Telecoms Package and the Audio Visual Media Services Directive. This book will be essential reading for students, teachers and practitioners interested in Internet law and practice as well as technologists and social scientists. 'The book is easy to read, and...has been well edited...and flows smoothly through the various topics. ...the book provides a worthwhile overview of this developing area of law throughout the world.' Peter Walsh, International Trade Law Annual 'a thorough and stimulating

survey. ...a good introduction for lawyers and students approaching Internet and e-commerce law for the first time, and a useful course text.' Brian Hutchinson, The Irish Jurist
