This 1965 book investigates how the plays of Euripides were transmitted across seventeen centuries and finally copied into late Byzantine manuscripts.

th th The 20 International Conference on Chemical Education (20 ICCE), which had rd th "Chemistry in the ICT Age" as the theme, was held from 3 to 8 August 2008 at Le Méridien Hotel, Pointe aux Piments, in Mauritius. With more than 200 participants from 40 countries, the conference featured 140 oral and 50 poster presentations. th Participants of the 20 ICCE were invited to submit full papers and the latter were subjected to peer review. The selected accepted papers are collected in this book of proceedings. This book of proceedings encloses 39 presentations covering topics ranging from fundamental to applied chemistry, such as Arts and Chemistry Education, Biochemistry and Biotechnology, Chemical Education for Development, Chemistry at Secondary Level, Chemistry at Tertiary Level, Chemistry Teacher Education, Chemistry and Society, Chemistry Olympiad, Context Oriented Chemistry, ICT and Chemistry Education, Green Chemistry, Micro Scale Chemistry, Modern Technologies in Chemistry Education, Network for Chemistry and Chemical Engineering Education, Public Understanding of Chemistry, Research in Chemistry Education and Science Education at Elementary Level. We would like to thank those who submitted the full papers and the reviewers for their timely help in assessing the papers for publication. th We would also like to pay a special tribute to all the sponsors of the 20 ICCE and, in particular, the Tertiary Education Commission (<http://tec.intnet.mu/>) and the Organisation for the Prohibition of Chemical Weapons (<http://www.opcw.org/>) for kindly agreeing to fund the publication of these proceedings.

"The Breath of Life" by John Burroughs. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

The laboratory course should do more than just acquaint the students with fundamental techniques and procedures. The laboratory experience should also involve the students in some of the kinds of mental activities a research scientist employs: finding patterns in data, developing mathematical analyses for them, forming hypotheses, testing hypotheses, debating with colleagues and designing experiments to prove a point. For this reason, the student-tested lab activities in *Inquiries into Chemistry*, 3/E have been designed so that students can practice these mental activities while building knowledge of the specific subject area. Instructors will enjoy the flexibility this text affords. They can select from a comprehensive collection of structured, guided-inquiry experiments and a corresponding collection of open-inquiry experiments, depending on their perception as to what would be the most appropriate method of instruction for their students. Both approaches were developed to encourage students to think logically and independently, to refine their mental models, and to allow students to have an experience that more closely reflects what occurs in actual scientific research. Thoroughly illustrated appendices cover safety in the lab, common equipment, and procedures.

*Teaching High School Science Through Inquiry and Argumentation*

For Grades 9-12, this new edition covers assessment, questioning techniques to promote learning, new approaches to traditional labs, and activities that emphasize making claims and citing evidence.
